XIAOMI AIRDOTS S

Xiaomi Airdots 2 Basic S Wireless Earbuds User Manual

Model: AIRDOTS S (TWSEJ061LS)

Introduction

The Xiaomi Airdots 2 Basic S are advanced true wireless earbuds designed for an immersive audio experience with enhanced features for gaming and daily use. This manual provides detailed instructions on how to set up, operate, maintain, and troubleshoot your earbuds to ensure optimal performance.

Setup and First Use

Charging the Earbuds and Case

Before first use, ensure both the earbuds and the charging case are fully charged. Place the earbuds into the charging case. The indicator lights on the earbuds will show charging status. Connect the charging case to a power source using a Micro-USB cable (not included). The charging case has a 300 mAh battery capacity, providing multiple charges for the earbuds.

Pairing with Your Device

1. Take both earbuds out of the charging case. They will automatically power on and enter pairing mode.
2. On your smartphone or Bluetooth-enabled device, go to Bluetooth settings and search for new devices.
3. Select "Redmi AirDots 2" or "Mi True Wireless Earbuds Basic 2" from the list of available devices.
4. Once connected, you will hear a confirmation tone. The earbuds support ultra-fast pairing and can connect to more than one device concurrently.

The Airdots 2 Basic S features a no master-slave connection, allowing each earbud to be used independently or together as desired.

Operating Instructions

Single Button Control

Each earbud features a multi-function button for easy control:

- **Single Press:** Play/Pause music, Answer/End call.
- **Double Press:** Activate voice assistant (Siri, Google Assistant).
- **Triple Press:** Activate Low Latency Gaming Mode.

Low Latency Gaming Mode

For an optimized gaming experience, activate the low latency mode by triple-pressing the button on either earbud. This mode reduces audio delay, allowing you to hear in-game sounds like footsteps as they happen, providing a competitive edge in mobile or PC gaming.

Independent Earbud Use

The Airdots 2 Basic S allows for seamless switching between mono and binaural modes. You can use either the left or right earbud independently, or both together, without any master-slave connection restrictions. Simply take one earbud out of the case to use it in mono mode.

Care and Maintenance

Cleaning

To maintain optimal sound quality and hygiene, regularly clean your earbuds and charging case. Use a soft, dry, lint-free cloth to wipe the surfaces. For the ear tips, you can gently remove them and clean with a damp cloth, ensuring they are completely dry before reattaching.

Water Resistance

The Xiaomi Airdots 2 Basic S earbuds are rated IP4X water resistant, meaning they are splash-proof and sweat resistant. They are suitable for jogging or intense workouts and can resist splashes of liquid. However, they are not fully waterproof and should not be submerged in water or worn in the shower. The charging case itself is not water resistant.

Troubleshooting

- **Earbuds not pairing:** Ensure both earbuds are charged and out of the case. Turn off and on your device's Bluetooth, then try pairing again.
- **Only one earbud working:** Place both earbuds back into the charging case, close the lid, wait a few seconds, then take them out again. This often resets the connection.
- **No sound:** Check the volume level on your connected device. Ensure the earbuds are properly paired and selected as the audio output.
- **Charging issues:** Verify the Micro-USB cable and power adapter are working. Clean the charging contacts on both the earbuds and the case.
- **Low latency mode not activating:** Ensure you are triple-pressing the button quickly and firmly.

Product Specifications

Feature	Specification
Model	AIRDOTS S (TWSEJ061LS)
Wireless Connectivity	Bluetooth 5.0
Bluetooth Profiles	HFP/A2DP/HSP/AVRCP
Wireless Range	Up to 32 Feet (Unobstructed) / 9.75 Meters
