Reinica S 500

Instruction Manual for Reinica Scrubber Brush

Model: S 500 | **Brand:** Reinica | **For:** Numatic Multideck BMD 1000

1. Introduction

This manual provides essential information for the safe and effective use of your Reinica Scrubber Brush, model S 500. Designed for compatibility with Numatic Multideck BMD 1000 floor cleaning machines, this brush is engineered to deliver optimal cleaning performance for various floor types. Please read these instructions carefully before installation and operation to ensure proper usage and to maximize the lifespan of your product.

2. Product Overview

The Reinica S 500 Scrubber Brush is a high-quality accessory designed for professional floor cleaning. It features durable bristles and a robust body for efficient scrubbing.

Key Features:

- **Bristle Material:** Polypropylene (Poly 0.75 mm), smooth white.
- **Body Diameter:** 460 mm.
- **Working Width:** 485 mm.
- **Compatibility:** Specifically designed for Numatic Multideck BMD 1000 machines.
- *Note: This is not an original spare part from Numatic.*

Figure 2.1: This image displays three distinct scrubber brushes, illustrating variations in bristle material and design. The brush on the left features grey/brown bristles and a red central attachment point. The brush at the top right has blue bristles, indicating a potentially stiffer or different material. The brush at the bottom right also has brown bristles and a black central attachment. These brushes are designed for floor cleaning machines, such as the Numatic Multideck BMD 1000, and are selected based on the specific cleaning task and floor type.

3. Setup and Installation

Proper installation of the scrubber brush is crucial for safe operation and effective cleaning. Always ensure the machine is turned off and unplugged before attempting installation or removal.

1. **Prepare the Machine:** Ensure your Numatic Multideck BMD 1000 machine is powered off and disconnected from the power supply.
2. **Access Brush Mount:** Tilt the machine back or lift it to expose the brush mounting area. Refer to your Numatic machine's manual for specific instructions on accessing the brush head.
3. **Align the Brush:** Carefully align the central attachment point of the Reinica S 500 brush with the drive hub on the machine. Ensure the brush is centered and flat against the mounting surface.
4. **Secure the Brush:** Rotate the brush slightly until it locks into place. Some machines may require a specific twist or click mechanism. Verify that the brush is securely fastened and does not wobble.
5. **Pre-Operation Check:** Before powering on, manually spin the brush to confirm it rotates freely and is properly seated.

4. Operating Instructions

The Reinica S 500 Scrubber Brush is designed for efficient floor cleaning. For best results, consider the following

operational guidelines:

- **Floor Type:** This brush is suitable for hard surfaces. For delicate or highly polished floors, ensure the bristle type is appropriate to avoid damage.
- **Cleaning Solution:** Use appropriate cleaning solutions recommended for your floor type and machine. Follow the dilution instructions provided by the cleaning solution manufacturer.
- **Machine Speed:** Operate the Numatic machine at a speed that allows the brush to effectively scrub the surface without causing excessive splashing or wear.
- **Overlap Passes:** For thorough cleaning, ensure each pass of the machine slightly overlaps the previous one.
- **Regular Inspection:** Periodically check the brush during operation for any signs of entanglement or unusual wear.

5. Maintenance

Regular maintenance extends the life of your Reinica Scrubber Brush and ensures consistent cleaning performance.

After Each Use:

- **Rinse:** Remove the brush from the machine and rinse it thoroughly with clean water to remove dirt, debris, and cleaning solution residue.
- **Inspect:** Check the bristles for any embedded foreign objects (e.g., string, hair, small stones) and remove them. Inspect for excessive wear or damage.
- **Dry:** Allow the brush to air dry completely in a well-ventilated area before storage. Do not store wet brushes, as this can lead to mold or bristle deformation.

Storage:

- Store the brush flat or hanging to prevent bristle deformation. Avoid storing it in direct sunlight or extreme temperatures.

Replacement:

- Replace the brush when bristles show significant wear, are splayed, or no longer provide effective scrubbing. The lifespan of the brush depends on usage frequency, floor type, and maintenance.

6. Troubleshooting

This section addresses common issues you might encounter with your scrubber brush.

Problem	Possible Cause	Solution
Brush not spinning or spinning slowly	Incorrect installation; Obstruction; Worn drive hub on machine.	Re-install brush, ensuring it's securely locked. Check for debris caught in bristles or mounting area. Inspect machine's drive hub.
Poor cleaning performance	Worn bristles; Incorrect cleaning solution; Inadequate water/solution flow.	Replace brush if bristles are worn. Verify cleaning solution concentration. Check machine's water/solution delivery system.
Excessive splashing	Too much water/solution; Machine speed too high; Incorrect brush for surface.	Reduce water/solution flow. Lower machine operating speed. Ensure brush type is suitable for the floor.

Problem	Possible Cause	Solution
Unusual noise or vibration	Loose brush; Damaged bristles; Foreign object caught in brush.	Check brush installation. Inspect bristles for damage. Remove any foreign objects.

7. Specifications

Attribute	Detail
Brand	Reinica
Model	S 500
Compatibility	Numatic Multideck BMD 1000
Bristle Material	Polypropylene (Poly 0.75 mm), smooth white
