Troubleshooting

If you experience issues with your phone, refer to the following common solutions:

- **No Dial Tone:** Ensure the telephone line cord is securely connected to both the base unit and the wall jack. Check if the AC adaptor is properly connected to the base unit and power outlet.
- **Cannot Make/Receive Calls:** Verify that the handset batteries are charged. Ensure the handset is registered to the base unit. If not, refer to the full user manual for registration steps.
- **Poor Sound Quality:** Move closer to the base unit. Check for interference from other electronic devices (e.g., microwaves, Wi-Fi routers).
- **Handset Not Charging:** Clean the charging contacts on both the handset and the base/charger with a dry cloth. Ensure the AC adaptor is connected.
- **Display is Blank:** Charge the handset batteries. If the issue persists, the batteries may need replacement.
