Waterdrop WD-C01

Waterdrop Coffee Machine Water Filter User Manual

Model: WD-C01

1. Introduction

Thank you for choosing the Waterdrop Coffee Machine Water Filter. This filter is designed to provide you with clean, great-tasting water for your coffee, enhancing the flavor of your beverages and protecting your coffee machine from limescale buildup. Our filter is **TÜV SÜD certified** for chlorine reduction, ensuring high quality and performance.

2. Product Features

- **TÜV SÜD Certified:** Tested and certified for effective chlorine reduction.
- **Enhanced Taste:** High-quality ion-exchange resin and granular activated carbon reduce chlorine, taste, odor, limescale, and other impurities, leading to sweeter water and improved beverage flavor.
- **Optimal Lifespan:** Recommended replacement every 2 months for best results and continuous refreshment, though this may vary based on water quality.
- **Cost-Effective:** Offers excellent quality at a reasonable price, providing a better coffee experience without compromise.

3. Compatibility

This Waterdrop filter is designed as a replacement for various coffee machine models. Please verify your machine's compatibility before installation.

Compatible Models:

- Bosch Vero Bar / Professional
- Siemens EQ.3, EQ.5 (TE50), EQ.6 (TE60) PLUS, EQ.7 (TE70, TE71, TK7), EQ.8 (TE80), EQ.9 TE65
- Siemens 3200
- Siemens EQ6 Plus S100/S300/S500/S700

- Siemens EQ.6 300 TE613501DE
- Siemens EQ.6 Plus 400
- Siemens EQ6 Plus S800
- Siemens EQ5 Macchiato
- Siemens EQ9 S500 S900
- Krups T.O by Lipton TK750, TES50, TE70, TES70, TES71, TES80
- TCZ7003, 12008246, TCA7 (all models), TCC78 (all models), TCC7 (all models), C77V60, C7760N

Also suitable for:

- UNIWATER 1301
- GOLDEN ICEPURE CMF004
- AquaCrest AQK-01
- FilterLogic CFL-901B
- AquaHouse AH-CBI

Important: This filter is *not* compatible with Brita Intenza+, Saeco, or Philips CA6706 / CA6702 models.

4. Setup and Installation

Follow these steps for quick and easy installation of your Waterdrop filter:

1. Remove the old filter (if any) from your coffee machine's water tank.
2. Unpack the new Waterdrop filter from its sealed packaging.
3. Insert the new filter firmly into the designated slot in the water tank. Ensure it is seated correctly to prevent leaks.
4. Fill the water tank with fresh water.
5. Run a few cycles of plain water through your coffee machine as per your machine's instructions to prime the filter and flush out any carbon fines.

Image: A detailed close-up showing the Waterdrop filter being precisely placed into the water reservoir of a coffee machine, emphasizing a secure and leak-free fit.

5. Operation

Once installed, the Waterdrop filter continuously purifies the water as it passes through, ensuring that every cup of coffee is made with filtered water. The filter's advanced media works to reduce impurities, providing a consistent quality of water for brewing.

Image: A coffee machine actively brewing coffee, with the Waterdrop filter visible in its water tank, illustrating its long lifespan of approximately 100 liters of filtered water.

6. Maintenance

For optimal performance and water quality, regular filter replacement is crucial. The recommended replacement interval is every **2 months** or after filtering approximately **100 liters** of water, whichever comes first. The actual lifespan may vary depending on your local water hardness and usage frequency.
To replace the filter, simply follow the installation steps outlined in Section 4.

7. Troubleshooting

Common Issues and Solutions:

- **Slow Filtration:** If water flow seems unusually slow, ensure the filter is correctly seated and not obstructed. If the issue persists, the filter may be nearing the end of its lifespan and require replacement.
- **Unusual Taste/Odor:** If you notice an unusual taste or odor in your filtered water, it could indicate that the filter's capacity has been exhausted. Replace the filter immediately. Ensure you have run enough water through the new filter to flush out any initial carbon fines.
- **'Leak-free' icon is not showing:** Ensure the filter is fully inserted and sealed correctly in the water tank. Refer to your coffee machine's manual for specific filter compartment details.
