adafruit 969 Articulated Arm Stand for USB Microscope Instructions
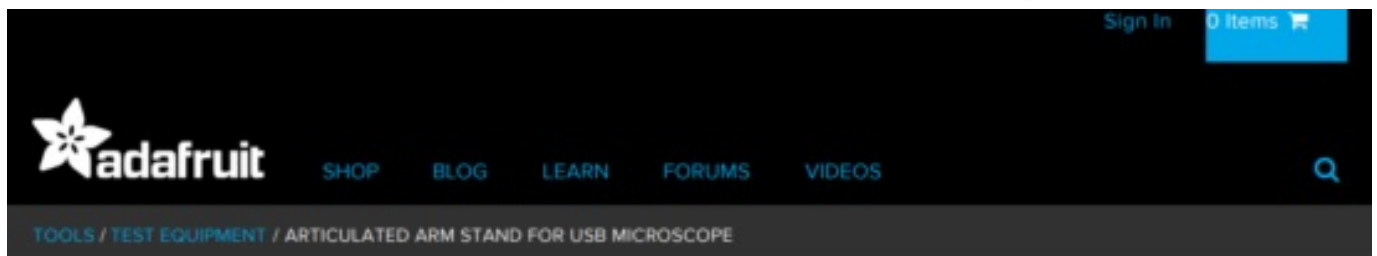

Contents

DESCRIPTION

We love pulling out our 5 Megapixel USB microscope for inspecting PCBs once in a while, but we really got to use it every day when we picked up this beautiful machined aluminum 3D stand.

It has multiple articulated 'joints' for positioning the microscope in any way and is very sturdy and solid with a large flat base.

A single hand-friendly knob is used to loosen all the joints for positioning, then tighten it up to fix the position. The microscope is clamped in solidly but it can easily be removed by releasing the clasp for hand positioning when you need it. This is the best stand available for this microscope and it makes an excellent companion!

This is just a microscope stand. A USB microscope is not included! Suitable for digital microscopes with diameters of 30mm – 35mm. Please check out our **5MP USB Microscope** in

Note: As of Monday, March 14th, 2016, this stand now comes with a camera fixed holder which is suitable for most lightweight cameras.

Articulated Arm Stand for USB Microscope

TECHNICAL DETAILS

Retaining bracket diameter:	30 – 35 mm / 1.1″ – 1.3″
Upper arm length:	120 mm / 4.7″
Lower arm length:	120 mm / 4.7″
Dimensions (W x D):	110 x 118 mm / 4.3″ x 4.6″
Weight:	443 g
