Bushnell 214201

Bushnell Pacifica 10x42 Binocular User Manual

Model: 214201

1. Overview

The Bushnell Pacifica 10x42 Binocular is designed for versatile use in various outdoor activities such as nature observation, sports events, and bird watching. Featuring 10x magnification and 42mm objective lenses, it provides clear and bright images. The robust rubber coating offers protection against scratches and dirt, ensuring durability. Its user-friendly design includes an easy-to-reach focus wheel and rubber eyecups, making it suitable for all users, including those who wear spectacles. This model, 214201, combines modern technology with a compact and durable design, making it a reliable companion for your outdoor pursuits.

2. What's in the Box

Upon opening your Bushnell Pacifica 10x42 Binocular package, you should find the following items:

- One (1) Bushnell Pacifica 10x42 Binocular
- One (1) Carrying Case
- One (1) Neck Strap
- Two (2) Objective Lens Covers
- One (1) Rainguard (Eyepiece Cover)
- One (1) Cleaning Cloth (typically included with optics)

3. Key Features

The Bushnell Pacifica 10x42 Binocular incorporates several features designed for optimal viewing experience and durability:

- **Coated Lenses:** Ensures high light transmission, brightness, and fine image sharpness with natural color rendition.
- **Versatile Application:** Ideal for a wide range of activities including bird watching, wildlife observation, nature study, and camping.
- **Extreme Ruggedness:** Features a sturdy body with a robust rubber coating, making it resilient against tough conditions, including marine environments, rain, or fog, while maintaining sharp lens performance.

- **Color:** Black finish for a sleek and discreet appearance.
- **Easy-to-Reach Focus Wheel:** Allows for quick and precise focusing on subjects at various distances.
- **Rubber Eyecups:** Provides comfort and prevents scratching of eyeglasses for spectacle wearers.

4. Setup and Initial Use

Follow these steps to set up your Bushnell Pacifica binocular for optimal viewing:

1. **Attach the Neck Strap:** Thread the neck strap through the strap lugs on each side of the binocular. Ensure it is securely fastened to prevent accidental drops.
2. **Adjust Interpupillary Distance (IPD):** Hold the binocular up to your eyes and look through it. Adjust the two halves of the binocular by rotating them on the central hinge until you see a single, clear circular field of view. This ensures proper alignment with your eyes.
3. **Adjust Eyecups:**
    - *For Non-Spectacle Wearers:* Extend the eyecups by twisting or pulling them out. This positions your eyes at the optimal distance from the eyepieces.
    - *For Spectacle Wearers:* Retract the eyecups by twisting or pushing them in. This allows you to view the full field of view while wearing your glasses.
4. **Focus the Binocular:**
    - First, close your right eye and focus on a distant object using the central focus wheel until the image in your left eye is sharp and clear.
    - Next, close your left eye and adjust the diopter ring (usually on the right eyepiece) until the image in your right eye is sharp and clear.
    - Once both eyes are individually focused, you will only need to use the central focus wheel for subsequent focusing on objects at different distances.

5. Operating Your Binocular

Using your Bushnell Pacifica binocular is straightforward once initial setup is complete:

- **Holding the Binocular:** Hold the binocular firmly with both hands. For extended viewing, try to brace your elbows against your body or use a tripod (if compatible) to minimize shake and provide a steadier image.
- **Scanning:** When searching for an object, start with a wider view and slowly scan the area. Once you locate your target, use the central focus wheel to fine-tune the image.
- **Low Light Conditions:** The 42mm objective lenses are designed to gather ample light, providing good performance in low-light conditions such as dawn or dusk.

6. Maintenance and Care

Proper maintenance will ensure the longevity and performance of your binocular:

- **Lens Cleaning:**
    - Always use a soft, clean lens brush or compressed air to remove any loose dust or debris from the lenses before wiping.
    - Use a microfiber lens cleaning cloth (preferably the one provided) to gently wipe the lens surfaces.
    - For stubborn smudges or fingerprints, apply a small amount of specialized lens cleaning fluid to the cloth, not directly to the lens, and gently wipe in a circular motion.

- Avoid using abrasive cloths, paper towels, or household cleaners, as these can scratch or damage the lens coatings.

- **Body Cleaning:** Wipe the rubberized body with a soft, damp cloth. Avoid harsh chemicals.
- **Storage:** Store your binocular in its protective case in a cool, dry place when not in use. Avoid storing it in direct sunlight or in areas with high humidity.
- **Protection:** Always replace the objective lens covers and rainguard when the binocular is not in use to protect the lenses from dust, dirt, and scratches.
- **Water Resistance:** While rugged, avoid submerging the binocular in water. If it gets wet, wipe it dry immediately.

7. Troubleshooting

If you encounter issues with your binocular, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Image is blurry or out of focus.	Improper focus adjustment or diopter setting.	Adjust the central focus wheel. If still blurry, re-adjust the diopter for your right eye as described in Section 4.
Seeing two overlapping images or a non-circular field of view.	Incorrect interpupillary distance (IPD) adjustment.	Adjust the binocular halves on the central hinge until a single, clear circular field of view is achieved (refer to Section 4).
Fogging on lenses.	Rapid temperature change or high humidity.	Allow the binocular to acclimate to the ambient temperature. If internal fogging persists, contact customer support. External fogging can be wiped with a clean cloth.
Dust or smudges on lenses.	Accumulated debris or fingerprints.	Clean lenses carefully as described in Section 6.

8. Specifications

Detailed specifications for the Bushnell Pacifica 10x42 Binocular (Model: 214201):

Specification	Value
Brand	Bushnell
Model Number	214201
Magnification Maximum	10x
Objective Lens Diameter	42 Millimeters
Item Weight	1.21 pounds (approx. 0.55 kg)
Special Feature	Fog Proof
Age Range (Description)	Kids (suitable for various ages)

Date First Available	November 23, 2020
