## Safety & Warnings

Read these instructions, keep them available for reference. This manual can be downloaded from <https://www.adamsonsystems.com/en/support/downloads-directory/is-series/is7p>

Heed all warnings and follow all instructions.

A qualified technician must be present during the installation and use of this product. This product is capable of producing extremely high sound pressure levels and should be used according to the specified local sound level regulations and good judgment. Adamson Systems Engineering will not be liable for damages caused by any possible misuse of this product.

Servicing is required when the loudspeaker has been damaged in any way, such as when the loudspeaker has been dropped; or when for undetermined reasons the loudspeaker does not operate normally.

Protect the cabling from being walked on or pinched.

Read the appropriate IS-Series Rigging Manual before installing the product.

Pay attention to rigging instructions included in both Blueprint AV™ and the IS-Series Rigging Manual.

Use only with the rigging frames/accessories specified by Adamson, or sold with the loudspeaker system.

This speaker enclosure is capable of creating a strong magnetic field. Please use caution around the enclosure with data storage devices such as hard drives.

In an effort to continuously improve its products, Adamson releases updated accompanying software, presets, and standards for its products. Adamson reserves the right to change the specifications of its products and the content of its documents with no prior notice.

## IS7p Ultra-Compact Point Source

- The IS7p is an ultra-compact point source enclosure. It contains two symmetrically arrayed 7" LF transducers and a 3" HF compression driver mounted on an Adamson waveguide, available in two configurations; with dispersion patterns of either 70° x 40° (HxV) or 100° x 50° (HxV) each rotatable in increments of 90°.
- The operational frequency range of the IS7p is 80Hz to 18kHz. The use of proprietary technologies such as Advanced Cone Architecture allows a high maximum SPL of 136.5 dB.
- The enclosure has an unobtrusive visual design that blends seamlessly into the surrounding space, is made of marine-grade birch plywood, and has steel rigging discs on the top, bottom, and on each side, to be used with a

wide variety of rigging accessories. Without sacrificing low resonance to the composite material, the IS7p weighs only 15 kg / 33.1 lbs.

- The IS7p is intended to be used as either a standalone system or a fill enclosure in tandem with other IS-Series products. The IS7p is designed to pair easily and coherently with all IS-Series subwoofers.
- The IS7p is designed for use with Lab. Gruppen's D-Series line of installation amplifiers. The nominal impedance of the IS7p is 8  $\Omega$  per band, maximizing amplifier efficiency.

## Wiring

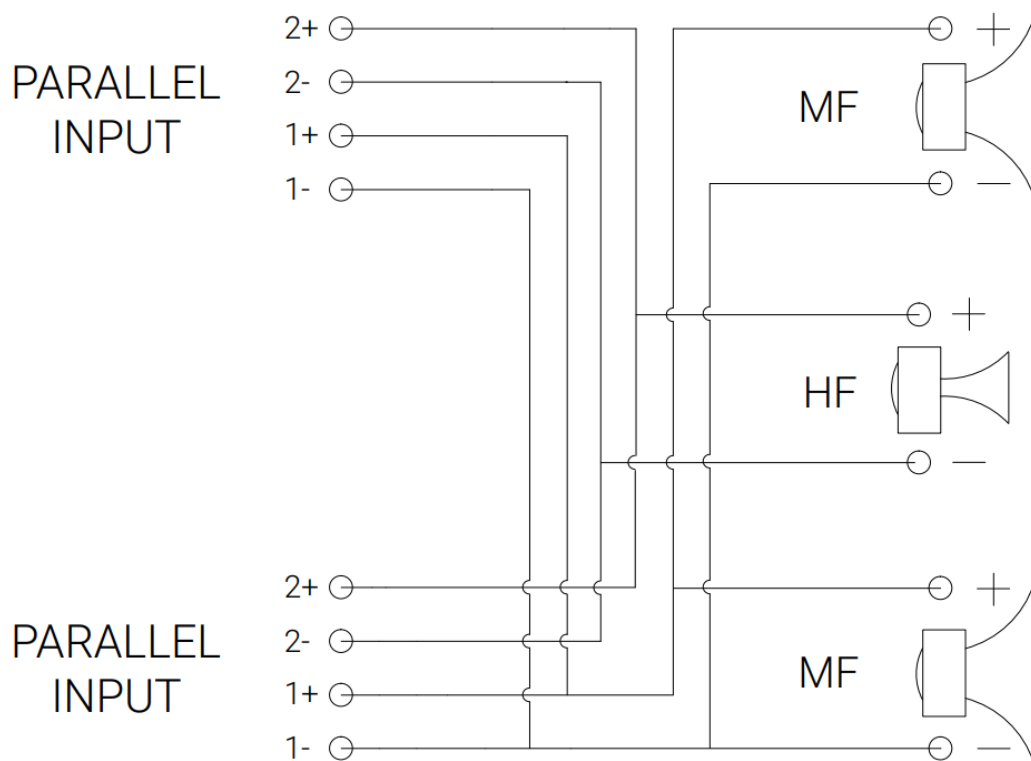

- The IS7p (70×40 – 967-0001/100×50 – 967-0003) comes with 2x Neutrik Speakon™ NL4 connections, wired in parallel.
- The IS7pb (70×40 – 967-0002/100×50 967-0005) comes with an external barrier strip.
- Pins 1+/- are connected to the 2x ND7-LM16 MF transducers, wired in parallel.
- Pins 2+/- are connected to the NH3-8 HF transducer.

## Amplification

The IS7p is paired with Lab.Gruppen D-Series amplifiers. Maximum quantities of the IS7p per amplifier model are shown below. For a master list, please refer to the Adamson Amplification Chart, found on the Adamson website.

Enclosure	Frequency Band	Output Channel	Cable
IS7p #1	LF	1	#1 (Pin 1, +/-)
	HF	2	#1 (Pin 2, +/-)
IS7p #2	LF	3	#2 (Pin 1, +/-)
	HF	4	#2 (Pin 2, +/-)

## Presets

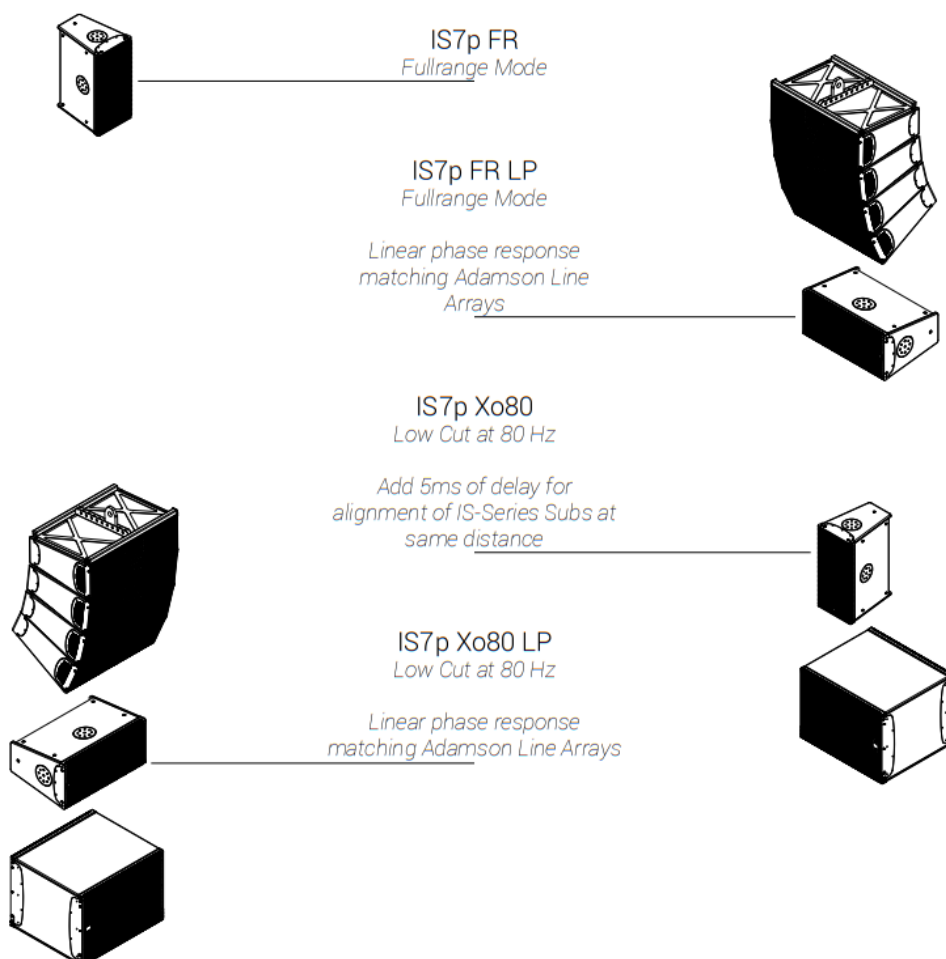

The Adamson Load Library, found on the Adamson website, contains presets designed for a variety of IS7p applications. Furthermore, there are presets designed to pair with either Adamson subs or Adamson Line Arrays. For a master list, please refer to the Adamson PLM & Lake Handbook, found on our website.
