USING LECTROFAN ALPHA FOR THE FIRST TIME

Your new LectroFan Alpha should be charged for at least two hours before first use. You may use the included cable, or any standard USB-A to USB-C cable.

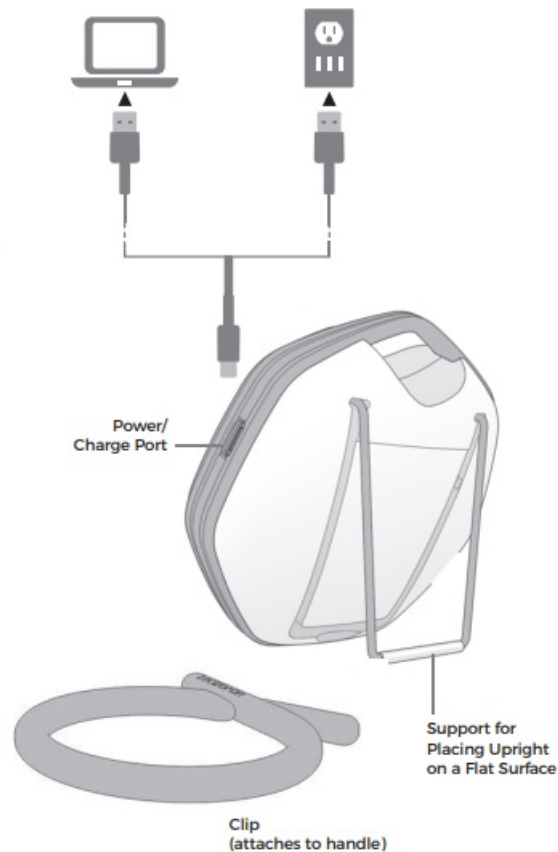

A standard USB-A power adapter or PC USB port can be used to power and charge your Alpha.

CHARGE INDICATOR

The charge indicator lamp glows solid red when charging. Your Alpha is fully charged when the solid red light goes out.

If the red light blinks when the Alpha is playing, the volume will start to reduce and it is time to charge again.

FOR YOUR CHILD'S SAFETY

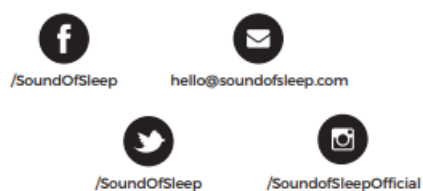

Always use this product with adult supervision, and do not leave a baby or small child alone with the product. Be sure to adjust the volume to an appropriate level. This product should never be placed in a crib. If using with a stroller or carrier, ensure that it does not interfere with proper operation of the stroller or carrier's safety mechanism. Always keep the charging cable away from small children, as it could present a choking hazard.

FCC Statment

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FAQs

Can you adjust the pitch or tone of the sounds on the LectroFan Alpha?

The LectroFan Alpha may offer some level of customization for pitch or tone adjustments, allowing you to find the most soothing sound for your preferences.

Is the LectroFan Alpha portable and easy to carry while traveling?

Yes, it is designed to be portable, making it convenient for travel and use in different locations.

What is the expected battery life when using the LectroFan Alpha on a full charge?

The battery life may vary, but it typically provides several hours of use on a full charge, depending on the volume and settings.

Does the LectroFan Alpha have a battery, or does it need to be plugged in?

You may use the LectroFan Alpha while plugged in with a standard USB-A to USB-C cable or through a USB-A power adapter. It may also have a built-in rechargeable battery for portable use.

Is there a timer feature on the LectroFan Alpha for automatic shutoff?

Yes, it typically includes a timer feature that allows you to set it to automatically turn off after a specific duration, such as 30, 60, or 90 minutes.

Is this sound machine suitable for both babies and adults?

Yes, the LectroFan Alpha is designed for use by babies, toddlers, and adults, making it versatile for different age groups.

What are the seven soothing sounds available on the LectroFan Alpha Portable Sleep Sound Machine?

The LectroFan Alpha offers seven soothing non-looping sounds, including fan, heartbeat, and white noise.

Does the LectroFan Alpha come with a warranty?

Product warranties can vary, so it's advisable to check the manufacturer's website or product packaging for information regarding the warranty coverage for your specific model.

Can you use an external power bank to charge the LectroFan Alpha on the go?

If the LectroFan Alpha has a USB-C charging option, you can typically use an external power bank to charge it while on the go.

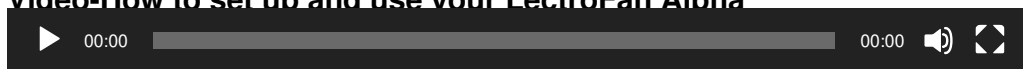

Is the LectroFan Alpha easy to clean or maintain?

It's important to refer to the product's user manual for specific cleaning instructions, but many sound machines are designed to be easy to wipe clean with a soft, damp cloth.

Does the LectroFan Alpha have a headphone jack for private listening?

Some sleep sound machines have a headphone jack, but you would need to check the product's specific features to confirm if it includes this option.
