BESTIME MT-32

BESTIME MT-32 Three-in-one Double Sided Metal Wall Clock User Manual

Model: MT-32

Introduction

Thank you for choosing the BESTIME MT-32 Three-in-one Double Sided Metal Wall Clock. This manual provides essential information for the proper setup, operation, and maintenance of your new clock. Please read it thoroughly before use to ensure optimal performance and longevity of the product.

Image: The BESTIME MT-32 Three-in-one Double Sided Metal Wall Clock, featuring a classic design with Roman numerals and integrated thermometer and hygrometer dials.

Product Features

- **Double Sided Display:** Two clear clock faces for easy viewing from multiple angles.
- **Integrated Thermometer:** Measures temperature from -60°F to 120°F (-50°C to 50°C).
- **Integrated Hygrometer:** Measures humidity from 0% to 100%.
- **Durable Construction:** Made of wrought iron with rust-resistant powder coating for indoor and outdoor use.
- **Accurate Timekeeping:** Features a high-quality Quartz movement for precise time.
- **Easy Read Dial:** Large black bold numbers against a light background for high visibility.
- **Dimensions:** Approximately 20"L x 4.7"W x 16.5"H with a 12.6" dial size.

Package Contents

Please ensure all items are present and in good condition upon opening the package.

- BESTIME MT-32 Double Sided Metal Wall Clock (1 unit)
- Mounting Bracket (1 unit)
- Instruction Manual (this document)

Note: 2 AA zinc carbon batteries are required for operation and are not included in the package.

Setup

1. Battery Installation

1. Carefully open the clock face by unlatching the side clasp.
2. Locate the battery compartment on the back of each clock mechanism.
3. Insert one (1) AA zinc carbon battery into each clock mechanism, ensuring correct polarity (+/-).
4. Close the clock face securely.

Image: The BESTIME MT-32 clock opened, revealing the two clock mechanisms and their respective battery compartments.

2. Setting the Time

1. Locate the time setting knob on the back of each clock mechanism.
2. Rotate the knob to set the correct time for each clock face.
3. Ensure both clock faces display the same time if desired, or set them to different time zones.

3. Mounting the Clock

The clock is designed for wall mounting. Choose a sturdy location that can support the weight of the clock (approximately 7.69 pounds).

1. Identify the desired mounting location. Consider visibility from both sides.
2. Mark the positions for the mounting screws using the bracket as a template.
3. Drill pilot holes if necessary, suitable for your wall material.
4. Securely attach the mounting bracket to the wall using appropriate screws (not included).
5. Carefully hang the clock onto the mounted bracket, ensuring it is stable and level.

Operating Instructions

Timekeeping

The clock operates continuously once batteries are installed and the time is set. The Quartz movement ensures accurate timekeeping.

Thermometer Function

The integrated thermometer automatically measures and displays the ambient temperature. No manual adjustment is required for this function.

Image: A detailed view of the thermometer dial on the clock face, indicating temperature readings.

Hygrometer Function

The integrated hygrometer automatically measures and displays the relative humidity. This function also requires no manual adjustment.

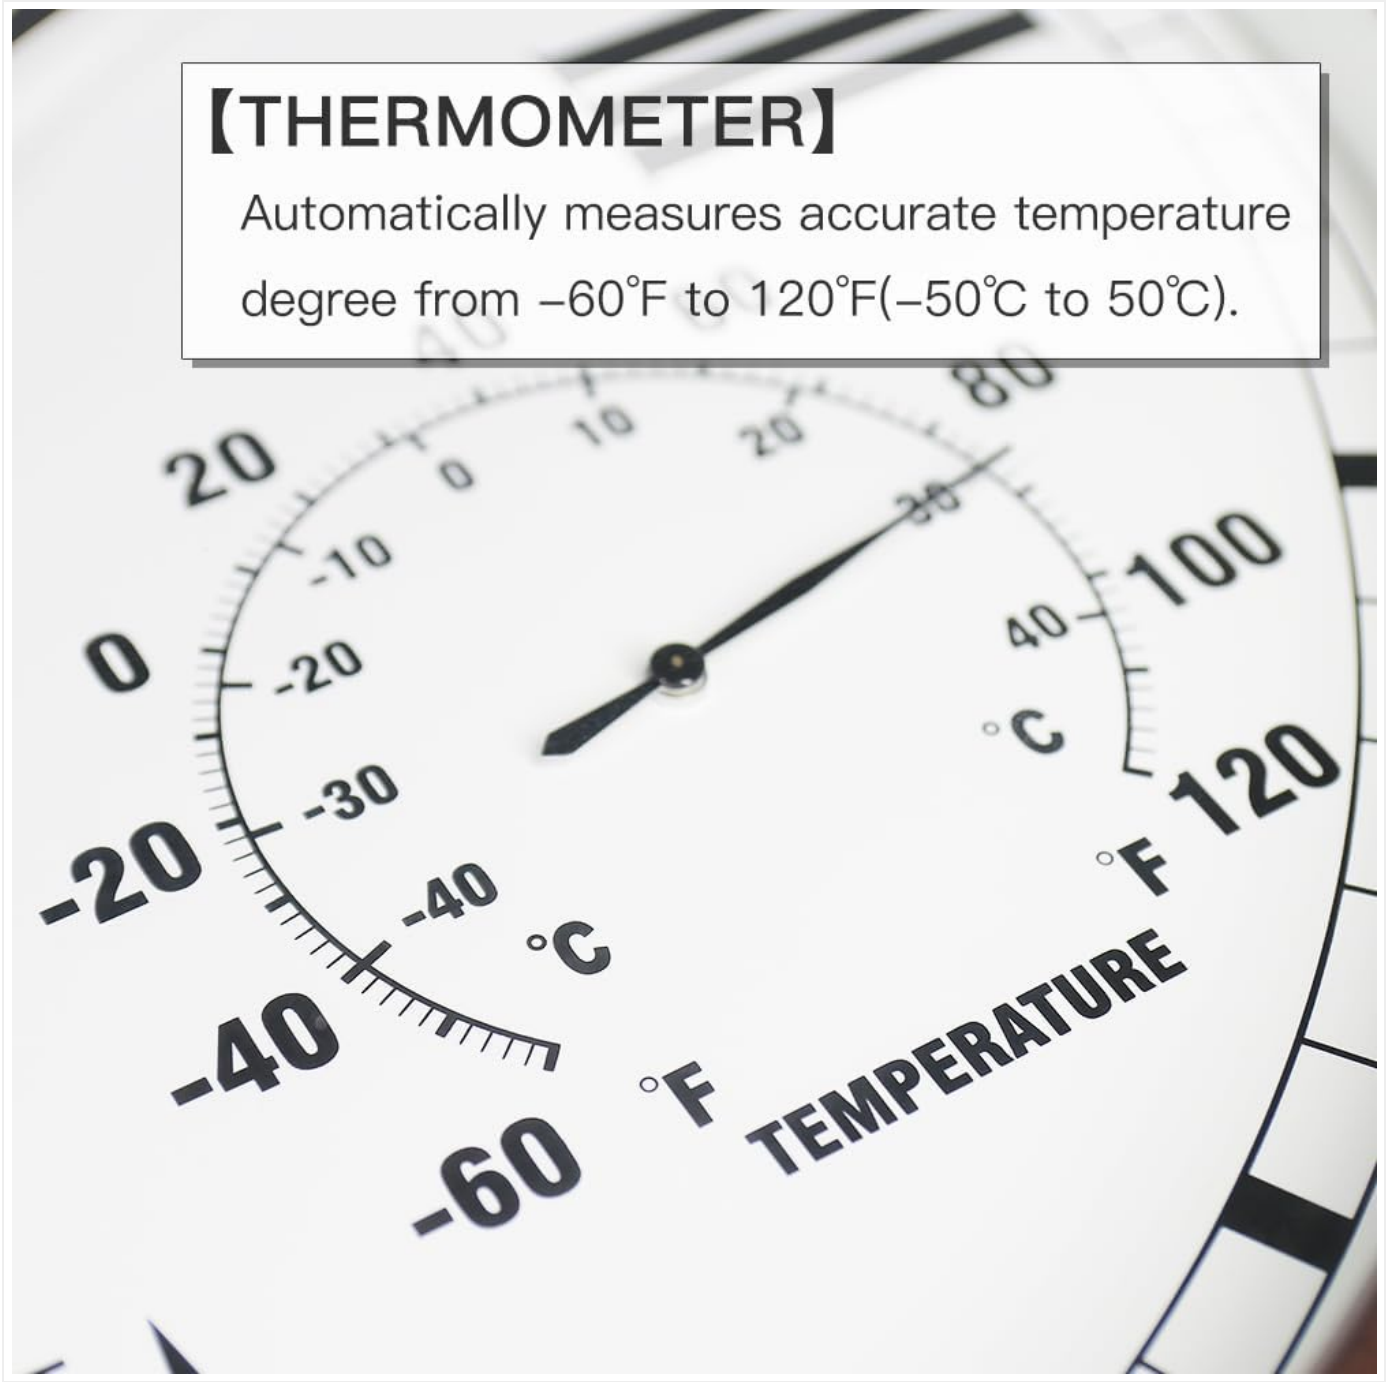

Image: A detailed view of the hygrometer dial on the clock face, indicating humidity readings.

Maintenance

- **Cleaning:** Use a soft, dry cloth to wipe the clock faces and metal frame. Avoid abrasive cleaners or solvents that may damage the finish.
- **Battery Replacement:** Replace batteries annually or when the clock starts losing time. Always use new AA zinc carbon batteries.
- **Weather Protection:** While designed for outdoor use with rust-resistant coating, prolonged exposure to extreme weather conditions (e.g., heavy rain, snow, direct intense sunlight) may affect longevity. Consider placing it under a covered area for extended durability.
- **Seasonal Storage:** If storing the clock for an extended period, especially during harsh winter months, remove the batteries to prevent leakage and store it in a dry, protected environment.

Troubleshooting

Problem	Possible Cause	Solution
Clock not working / losing time	Dead or low batteries; Incorrect battery polarity; Faulty movement.	Replace with new AA zinc carbon batteries, ensuring correct polarity. If problem persists, contact customer support.
Thermometer/Hygrometer inaccurate	Extreme environmental conditions; Sensor obstruction.	Ensure the clock is not in direct sunlight or near heat/cold sources. Clean the sensor area if accessible. Note that these are general indicators and not precision instruments.
Rust or corrosion	Prolonged exposure to moisture or harsh elements.	Clean affected areas and apply a rust-inhibiting clear coat if necessary. Consider relocating to a more sheltered area.

Specifications

- **Model:** MT-32
- **Brand:** BESTIME
- **Dimensions:** 20"L x 4.7"W x 16.5"H
- **Dial Size:** 12.6"
- **Material:** Wrought Iron, Glass, Metal
- **Power Source:** 2 x AA Zinc Carbon Batteries (not included)
- **Clock Movement:** Quartz
- **Temperature Range:** -60°F to 120°F (-50°C to 50°C)
- **Humidity Range:** 0% to 100%
- **Item Weight:** 7.69 Pounds
- **Indoor/Outdoor Usage:** Yes
