Waterdrop WD-PT-05P-4F

Waterdrop Water Filter Pitcher Instruction Manual

Model: WD-PT-05P-4F
Brand: Waterdrop

1. Product Overview

The Waterdrop Elfin Water Filter Pitcher is designed to provide clean, great-tasting water by effectively reducing various contaminants. This pitcher features a 7-cup capacity and a smart indicator for convenient filter replacement reminders. It is ideal for use in refrigerators and on countertops.

Image: The Waterdrop Elfin Water Filter Pitcher in pink, shown with four white replacement filters. The pitcher is clear with a pink lid and handle, and contains filtered water.

2. Safety Information

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.
Always handle the pitcher and filter with clean hands. Do not expose the filter to freezing temperatures, as this can damage the filter and cause water leakage. Do not filter hot water (above 100°F / 38°C) as this may compromise filter performance.

3. Components

- Water Filter Pitcher (Main Body)
- Lid with Smart Indicator
- Filter Cartridge (4 included)
- Inner Reservoir

Image: An exploded view diagram of the Waterdrop pitcher, illustrating its main components: the lid, inner reservoir, filter, and main pitcher body.

4. Setup

1. **Wash Components:** Before first use, wash the pitcher, lid, and inner reservoir with mild detergent and rinse thoroughly. Do not wash the filter with detergent.
2. **Prepare Filter:** Submerge the new filter in cold tap water for 10 minutes to remove any air bubbles. This ensures optimal filtration performance.
3. **Insert Filter:** Firmly insert the prepared filter into the opening of the inner reservoir. Ensure it is seated securely to prevent unfiltered water from bypassing the filter.
4. **Assemble Pitcher:** Place the inner reservoir with the installed filter into the pitcher body. Then, place the lid onto the pitcher.
5. **Initial Flush:** Fill the reservoir with cold tap water. Discard the first two pitchers of filtered water. This flushes out any carbon fines and prepares the filter for regular use.

5. Operating Instructions

1. **Filling the Pitcher:** Place the pitcher under a cold water tap. The hands-free lid features an automatic water inlet design, allowing you to fill the reservoir directly without removing the lid.
2. **Filtration Process:** Water will slowly pass through the filter into the main pitcher body. The filtration process is designed to be fast, typically filling the pitcher in about 1 minute.
3. **Pouring Water:** When ready to pour, simply tilt the pitcher. The touch-free spout lid will open automatically to dispense filtered water.
4. **Smart Indicator:** The lid features a gravity induction indicator.
    - **Blue Light (5 seconds):** Indicates the filter is in good condition. The light will turn off to save energy. Press it to check status.
    - **Red Light (flashes 6 times):** Indicates the filter needs replacement soon.
    - **Solid Red Light (5 seconds):** Indicates the filter needs to be replaced immediately.

Image: A diagram illustrating the three indication modes of the gravity induction smart indicator on the Waterdrop pitcher: blue for good, flashing red for replace soon, and solid red for replace now.

6. Maintenance

Filter Replacement

The filter has an extended lifespan of up to 200 gallons, which is approximately 5 times longer than standard filters. Replace the filter when the smart indicator signals a solid red light, or after filtering approximately 200 gallons of water, whichever comes first. Replacement filters are model WD-PF-01A.

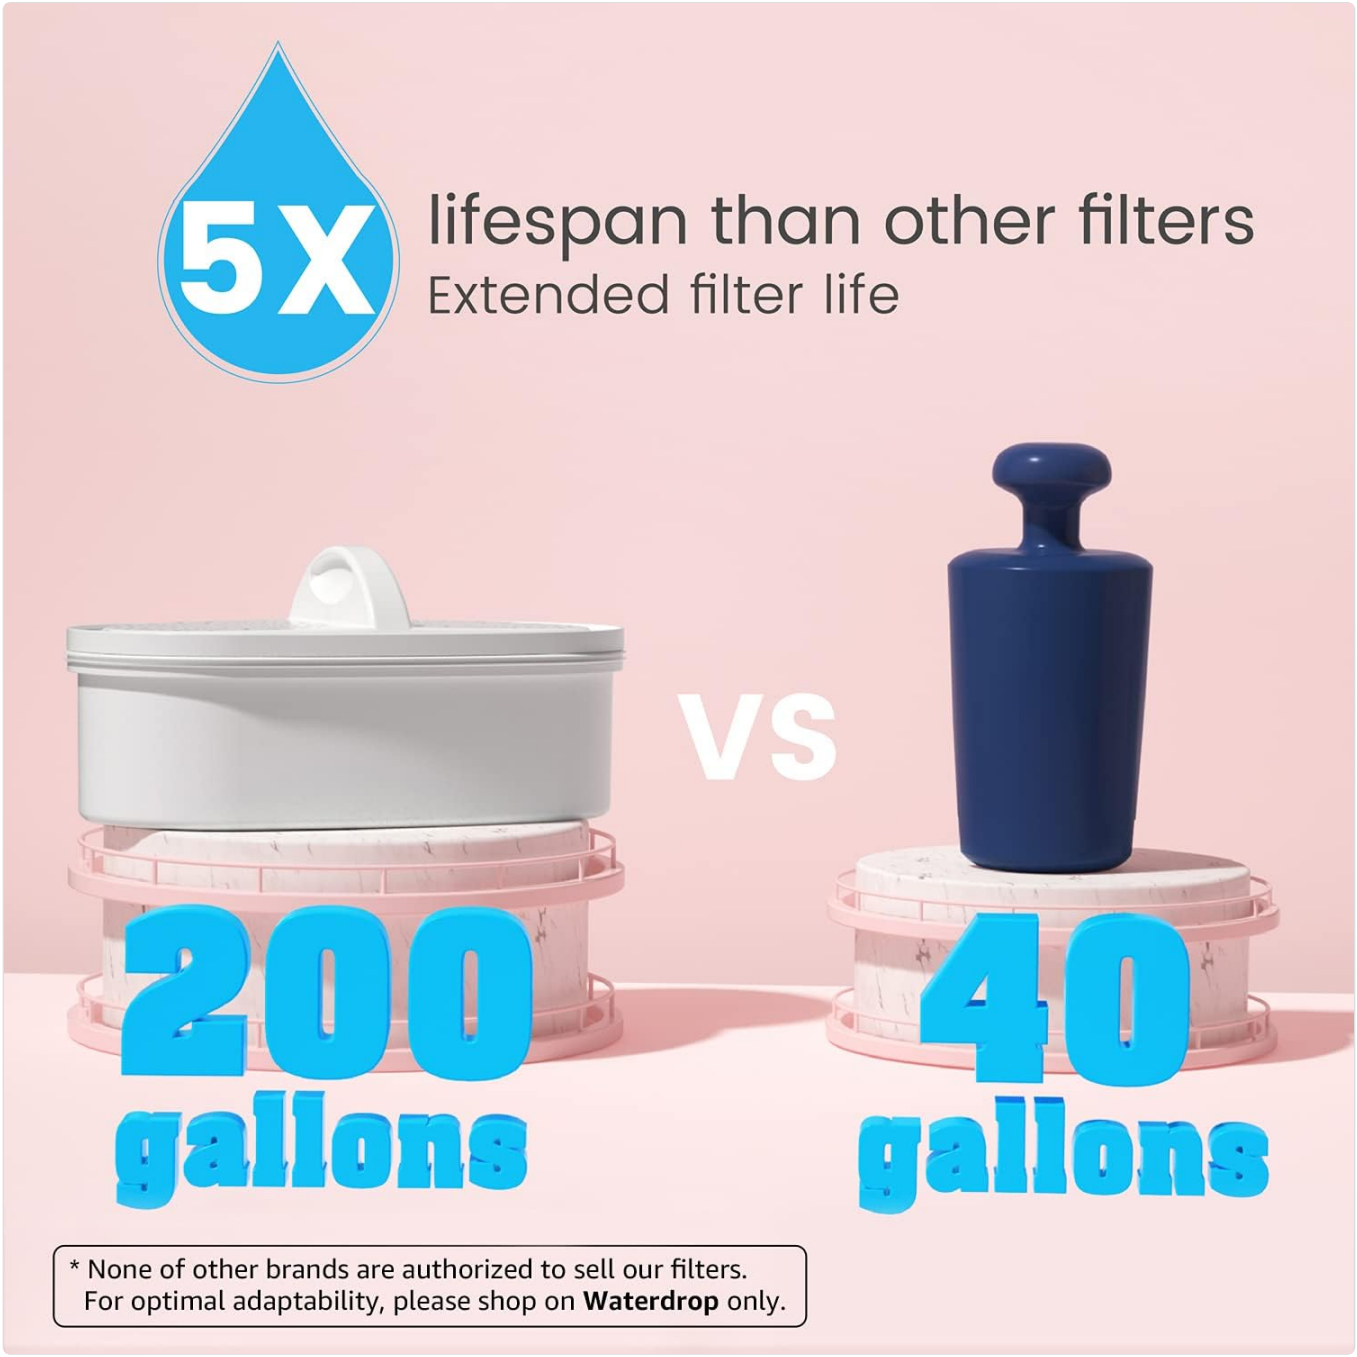

Image: A comparison graphic showing the Waterdrop filter lasting 200 gallons (5X longer lifespan) versus other filters lasting 40 gallons.

Cleaning the Pitcher

Regularly clean the pitcher, lid, and inner reservoir with mild soap and water. Do not use abrasive cleaners or put the filter in the dishwasher. The filter itself should only be rinsed with cold water, never with soap.

7. Troubleshooting

- **Slow Filtration:** Ensure the filter was properly submerged and air bubbles were removed during initial setup. If the flow remains slow, the filter may be clogged and require replacement.
- **Unpleasant Taste/Odor:** If filtered water has an unusual taste or odor, ensure the filter is correctly installed and has been flushed. If the issue persists, replace the filter.
- **Indicator Not Working:** Check if the indicator light is obstructed or if the battery (if applicable for your specific model's indicator) needs replacement. Refer to the detailed instructions for your indicator type.

- **Water Leaking:** Ensure all components, especially the filter and inner reservoir, are correctly and securely assembled.

8. Specifications

Feature	Detail
Brand	Waterdrop
Model Name	Elfin
Item Model Number	WD-PT-05P-4F
Capacity	7-Cup (95 oz total)
Product Dimensions	9.7"L x 3.8"W x 10"H
Item Weight	4.09 pounds (1.86 Kilograms)
Special Features	Chlorine Reduction, NSF certified, Smart Indicator
Certifications	NSF/ANSI 42 & 372 Certified
Filter Lifespan	Up to 200 Gallons
Replacement Filter Model	WD-PF-01A
