PKPOWER PKP-5USB-BLK

PKPOWER 5ft Mini USB Charging Cable Cord for UniMed Pro TENS Unit Massager

Model: PKP-5USB-BLK

Introduction

This manual provides essential information for the proper use and care of your PKPOWER 5ft Mini USB Charging Cable. This cable is designed as a reliable replacement charging cord for the UniMed Pro TENS Unit Massager (model SM9156) and other electronic devices that utilize a Mini USB port for power or data transfer. Please read these instructions carefully to ensure optimal performance and longevity of your cable.
The PKPOWER cable is engineered to meet high standards, featuring CE, FCC, and RoHS certifications, and includes built-in Over Voltage Protection (OVP), Over Current Protection (OCP), and Short Circuit Protection (SCP) to safeguard your devices during charging.

Setup

Setting up your PKPOWER Mini USB charging cable is a straightforward process. Follow these steps to connect your device for charging:

1. **Identify the Connectors:** The cable has two distinct ends. One end is a standard USB-A connector, typically found on power adapters, computers, or USB hubs. The other end is a Mini USB connector, which is smaller and designed to plug into your UniMed Pro TENS Unit Massager or other compatible devices.
2. **Connect to Device:** Carefully insert the Mini USB connector into the corresponding port on your UniMed Pro TENS Unit Massager. Ensure it is fully seated and secure. Do not force the connector.
3. **Connect to Power Source:** Insert the standard USB-A connector into a compatible USB power source. This can be a USB wall adapter (5V output recommended), a USB port on a computer, or a portable power bank.
4. **Verify Connection:** Once both ends are connected, your device should indicate that it is receiving power or charging. Refer to your device's manual for specific charging indicators.

Operating Instructions

The PKPOWER Mini USB charging cable is designed for simple plug-and-play operation. No special software or drivers are required.

- **Charging:** Once the cable is correctly connected to your device and a power source, the device will automatically begin charging. The charging status is typically indicated by an LED light or an on-screen icon on your device.
- **Data Transfer (if supported by device):** While primarily a charging cable, this Mini USB cable may also facilitate data transfer between your device and a computer, depending on your device's capabilities. Connect the Mini USB end to your device and the USB-A end to your computer's USB port. Your computer should recognize the device.
- **Disconnection:** To disconnect, gently pull the connectors straight out from the device and power source. Avoid pulling on the cable itself to prevent damage.

Maintenance

Proper maintenance will extend the life of your charging cable and ensure reliable performance.

- **Storage:** When not in use, coil the cable loosely. Avoid tight coiling or sharp bends, which can stress the internal wires and outer jacket. Store in a cool, dry place away from direct sunlight.
- **Cleaning:** If the cable or connectors become dirty, gently wipe them with a soft, dry, lint-free cloth. Do not use liquid cleaners or abrasive materials. Ensure connectors are free of dust and debris before use.
- **Handling:** Always grasp the connector housing when plugging in or unplugging the cable. Never pull on the cable itself. Avoid placing heavy objects on the cable or exposing it to extreme temperatures.

Troubleshooting

If you encounter issues with your PKPOWER Mini USB charging cable, consider the following troubleshooting steps:

- **Device Not Charging:**
  - Ensure both ends of the cable are securely connected to the device and the power source.

- Try using a different USB power source (e.g., a different wall adapter or computer USB port) to rule out issues with the power source.
- Verify that your device (e.g., UniMed Pro TENS Unit Massager) is compatible with a Mini USB charging cable.
- Check the device's charging port for any obstructions or damage.

- **Loose Connection:**
  - If the connection feels loose, ensure the connectors are fully inserted.
  - Inspect the connectors on both the cable and your device for any physical damage or bent pins.
- **Cable Damage:**
  - Visually inspect the entire length of the cable for any cuts, fraying, or severe kinks. A damaged cable should not be used.

If these steps do not resolve the issue, please refer to the "Warranty and Support" section for further assistance.

Specifications

Brand	PKPOWER
Model Number	PKP-5USB-BLK
Cable Length	5 feet (approximately 1.5 meters / 60 inches)
Connector Type	Mini USB (Male) to USB-A (Male)
Color	Black
Input Voltage Compatibility	100-240V 50-60Hz (for connected power adapter)
Safety Certifications	CE, FCC, RoHS
Protection Features	OVP (Over Voltage Protection), OCP (Over Current Protection), SCP (Short Circuit Protection)
Item Weight	1.58 ounces

Warranty and Support

PKPOWER is committed to providing high-quality products and excellent customer service.

- **Customer Service:** Our friendly and reliable customer service team is available to assist you. We aim to respond to all inquiries within 24 hours.
- **Contact Information:** For support, warranty claims, or any questions regarding your PKPOWER product, please refer to the contact details provided with your purchase or visit the official PKPOWER website.
