Haofy Haofyd8n9rkfp1x7462-01 (32OZ)

Haofy Blender Cup and Lid Replacement User Manual

Model: Haofyd8n9rkfp1x7462-01 (32OZ)

1. Product Overview

This manual provides instructions for the Haofy Blender Cup and Lid Replacement, designed to be compatible with 900W blenders, specifically the NutriBullet 900W series. These replacement parts are essential for maintaining the functionality of your blender, offering a durable and reliable solution for worn or damaged original components.
The cups are available in three different capacities: 18 oz, 24 oz, and 32 oz, catering to various blending needs. This specific product is the 32 oz version. The cup and lid are constructed from food-grade ABS and PC materials, ensuring safety, durability, and ease of cleaning.

Image 1.2: Overview of the three available cup sizes (18oz, 24oz, 32oz) alongside a compatible blender base.

2. Safety Information

- Always ensure the blender cup and lid are clean and dry before use.
- Do not overfill the cup beyond the 'MAX' line indicated on the side. Overfilling can lead to leaks and potential damage to the blender.
- Ensure the lid is securely fastened before operating the blender to prevent spills.
- This cup is designed for cold or room-temperature ingredients. Do not use with hot liquids, as pressure buildup can cause the lid to eject and result in injury.
- Keep out of reach of children.
- Inspect the cup and lid for any cracks, chips, or damage before each use. Discontinue use if any damage is observed.

3. Package Contents

Upon opening your package, please verify that all components are present and in good condition:

- 1 x Blender Cup (32 oz)
- 1 x Blender Lid

Image 3.1: The blender cup and its corresponding lid, shown separately.

4. Setup and Installation

Follow these steps to properly set up your new blender cup and lid:

1. **Clean Before First Use:** Before initial use, wash the cup and lid thoroughly with warm, soapy water. Rinse well and allow to air dry completely.
2. **Fill the Cup:** Add your desired ingredients to the blender cup. Ensure that the contents do not exceed the 'MAX' fill line marked on the side of the cup.
3. **Attach the Lid:** Place the lid onto the cup and twist it clockwise until it is securely tightened. A proper seal is crucial for safe operation and to prevent leaks.
4. **Attach to Blender Base:** Invert the assembled cup and lid, then align the tabs on the cup with the slots on your 900W blender base. Press down and twist clockwise until the cup locks into place.

Image 4.1: A compatible blender base with the cup attached, demonstrating proper setup for blending.

5. Operating Instructions

Once the cup is filled and securely attached to the blender base, you can begin blending. Refer to your blender's specific user manual for detailed operating instructions, as this product is a replacement part and not the blender itself. **Important Note:** Always ensure ingredients are below the 'MAX' line to prevent overflow and ensure proper blending.

Image 5.1: A close-up view of the 'MAX' fill line, indicating the maximum recommended liquid level for safe operation.

6. Cleaning and Maintenance

Proper cleaning and maintenance will extend the life of your blender cup and lid.

- **Dishwasher Safe:** Both the cup and lid are dishwasher safe for convenient cleaning. Place them on the top rack of your dishwasher.
- **Hand Washing:** For hand washing, use warm water and mild dish soap. Use a brush if necessary to clean hard-to-reach areas. Rinse thoroughly to remove all soap residue.

- **Drying:** Allow the cup and lid to air dry completely before storing to prevent odor or bacterial growth.
- **Storage:** Store the cup and lid in a clean, dry place.

7. Troubleshooting

If you encounter issues with your replacement cup or lid, consider the following:

- **Leaking during blending:** Ensure the lid is twisted on tightly and securely. Check the rubber seal inside the lid for proper placement and any signs of wear or damage.
- **Cup not fitting on blender base:** Verify that your blender is a 900W model, as this cup is specifically designed for that wattage. Ensure the cup is aligned correctly with the base and twisted firmly into place.
- **Unusual noises from blender:** If the blender itself is making unusual noises, this is likely an issue with the blender motor or blade assembly, not the cup or lid. Refer to your blender's original manual for troubleshooting these issues.

8. Specifications

Feature	Description
Brand	Haofy
Model Number	Haofyd8n9rkfp1x7462-01
Compatible With	900W Blenders (e.g., NutriBullet 900W)
