ADT Security XPP01 Panic Button Sensor

Product Specifications

- **Product Name:** Panic Button Sensor
- **Model Number**: XPP01
- **Mounting Options:** Wristband or Belt Clip
- **Power Source:** Cell Battery

Product Usage Instructions

Mounting the Panic Button Sensor

1. Take the Panic Button Sensor and attach it to your hand wrist or belt clip.
2. Connect the Panic Button Sensor to the panel.

Preparing the Panic Button Sensor

Ensure you have the band bracket and belt clip ready for installation.

Adding Panic Button Sensor to the Panel

To add the Panic Button Sensor to your panel, simply press the button on the sensor and follow the panel's instructions for adding a new device.

Changing the Battery

1. Remove the device from the wristband or belt clip.
2. Unscrew the bracket to access the battery compartment.
3. Remove the old cell battery and replace it with a new one.

Using Your Panic Button Sensor

Add the Panic Button Sensor to your Security Panel. You can wear it on your hand wrist or clip it onto your belt for easy access in case of emergency.

Frequently Asked Questions (FAQ):

Q: How do I know if the Panic Button Sensor is connected to the panel?

- **A:** Once you have connected the Panic Button Sensor to the panel, you may receive a confirmation message or light indicator on the panel.
Q: How long does the cell battery typically last before needing replacement?

- **A:** The battery life can vary based on usage, but it is recommended to check and replace the battery annually to ensure optimal performance.

Panic Button Sensor

- The Panic Button Sensor (XPP01) is designed for emergency calls to a monitoring center.
- It communicates with the XP02 Control Panel via 433 MHz frequency.
