ZOKOP commercial ice maker

ZOKOP Commercial Ice Maker User Manual

Model: Commercial Ice Maker
Brand: ZOKOP

Introduction

This manual provides detailed instructions for the safe operation, installation, maintenance, and troubleshooting of your ZOKOP Commercial Ice Maker. Please read this manual thoroughly before operating the appliance and retain it for future reference. This ice maker is designed for commercial and home use, capable of producing up to 110 lbs of ice per day with a 24 lbs storage capacity.

Important Safety Instructions

To reduce the risk of fire, electric shock, or injury when using your ice maker, follow these basic precautions:

- Read all instructions before use.
- Ensure the appliance is connected to a properly grounded power outlet (120V/60Hz).
- Do not operate the appliance if the power cord or plug is damaged.
- Keep ventilation openings clear of obstructions.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- The appliance uses R134a refrigerant. Handle with care and dispose of properly.
- Allow the unit to stand upright for at least 24 hours before initial operation after transport. This allows the refrigerant to settle.
- Clean the internal water box and mold with detergent before first use. Replace the filter element as instructed.

Package Contents

Verify that all items are included in the package:

- 1 x Ice Maker
- 1 x Filter
- 1 x Drainage pipe
- 1 x Ice Shovel
- 1 x Small accessory bag
- 1 x Manual

Image: Components included with the ice maker: a water filter, drainage hose, power cord, and an ice scoop.

Setup and Installation

The ZOKOP Commercial Ice Maker can be used as a freestanding unit or built-in under a counter.

Unpacking and Placement

- Remove all packaging materials.
- Place the ice maker on a flat, stable surface. Ensure adequate ventilation around the unit.
- Allow the unit to stand upright for at least 24 hours before plugging it in. This allows the refrigerant to settle.

Image: A side view of the ice maker with dimensions labeled: 76cm/30inch height, 36cm/14.2inch width, and 43cm/16.9inch depth.

Water and Drainage Connection

- Connect the water inlet pipe to a potable water supply.
- Connect the drainage pipe to a suitable drain. Ensure the drainage pipe is sloped downwards for proper water flow.

Operating Your Ice Maker

Initial Start-up

- After connecting water and power, press the "ON/OFF" button to start the ice making process.
- The unit will automatically begin its ice making cycle, which typically takes 11 to 18 minutes per cycle.

Control Panel Functions

- **Ice Making Indicator:** Illuminates when the unit is actively making ice.
- **Reservation Function:** Allows scheduling of shutdown and startup times.
- **Add Water Indicator:** Illuminates when water supply is low.
- **Ice Full Indicator:** Illuminates when the ice storage bin is full.
- **Melting Indicator:** Indicates ice is melting.

- **Stoppage Indicator:** Indicates an operational stoppage.
- **Clean Function:** Initiates the one-button cleaning cycle.
- **NANO Blue Light:** For illumination and sterilization inside the ice bin.

Maintenance and Cleaning

Regular Cleaning

- Use the one-button cleaning function regularly to maintain hygiene.
- Clean the inside walls of the water box and ice mold with a mild detergent.
- Wipe the exterior stainless steel surfaces with a damp cloth.

Filter Replacement

- Replace the filter element periodically as indicated by the appliance or as per water quality.

Long-Term Storage

- If storing the unit for an extended period, drain all water and clean thoroughly.
- Disconnect from power supply.

Troubleshooting Guide

Before contacting customer support, refer to the following common issues and solutions:

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Ice maker not producing ice.	No water supply; power off; ambient temperature too high.	Check water connection; ensure power is on; operate in recommended temperature range (50-100°F).
Ice cubes are too small or not forming properly.	Insufficient water flow; dirty condenser.	Check water pressure and filter; clean condenser coils.
"Add Water" indicator is on.	Water supply is low or disconnected.	Ensure water supply is connected and turned on.
Unit is noisy.	Unit not level; fan obstruction.	Adjust leveling feet; check for obstructions around fan.

Product Specifications

Feature	Specification
Brand	ZOKOP
Model Name	Commercial Ice Maker
Material	Stainless Steel
Ice Making Capacity	110 lbs / 24H
Ice Storage Capacity	24 lbs
Ice Making Cycle	11-18 minutes
Ice Cube Shape	0.9 x 0.9 x 0.9 inch
Power	495W
Voltage	120V/60Hz
Refrigerant	R134a
Unit Dimensions (L x W x H)	14 x 17 x 30 inches (36 x 43 x 76 cm)
Item Weight	61.5 lbs (28.8 kg)
Climate Type	SN/N/ST/T
Room Temperature	50-100°F
Ambient Humidity	≤90%

Warranty and Customer Support

For warranty information or technical support, please contact ZOKOP customer service. Refer to your purchase documentation for specific warranty terms and contact details.

If you have any questions or encounter issues not covered in this manual, please reach out to the seller or manufacturer for assistance.

Ask a question about this manual

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.

Answered questions about this manual

Can I run the drain line for the ZOKOP Commercial Ice Maker directly through an outside wall and let it drain outside?

Yes, you can technically run the drain line through an outside wall, but you must adhere to specific installation requirements mentioned in the ZOKOP Commercial Ice Maker manual to ensure the unit functions correctly:...
