Windhager 04598

Windhager Telescopic Door Mosquito Net (Model 04598) - Instruction Manual

1. Product Overview

The Windhager Telescopic Door Mosquito Net is a practical and effective solution for insect protection, ideal for households with children and pets. This high-quality slatted door curtain features four pre-mounted, overlapping fiberglass strips that create a reliable barrier against insects while allowing for undisturbed ventilation. Sturdy PVC clamping rods keep the curtain taut, and rubber end caps ensure silent closing. The slats are integrated into telescopic aluminum profiles, allowing for flexible adjustment to your needs. Designed for easy passage, it's convenient when your hands are full and perfect for allowing children and pets to move freely without opening a traditional screen. Installation is simple and drill-free, utilizing a Velcro strip for external mounting. With dimensions suitable for doors up to 65-120 x 250 cm and a minimal installation depth of 10 mm, this mosquito net seamlessly integrates into various home environments.

Key Features:

- **Space-Saving Design:** Ideal for balcony and patio passages, fitting doors up to 65-120 x 250 cm.
- **Simple & Practical:** Slats are pre-mounted in telescopic aluminum profiles and can be manually adjusted.
- **Easy Passage:** Convenient for hands-free entry/exit, and safe for children and pets.
- **High-Quality Material:** Made from tightly woven, UV-resistant anthracite fiberglass fabric with weights for tension and 'Soft Stop' rubber end caps for silent closing.
- **Drill-Free Installation:** External mounting using a Velcro strip, requiring only 10 mm installation space. Suitable for doors with roller shutters.

2. Components Included

Please ensure all the following components are present before beginning installation:

- Velcro strip for mounting
- PVC clamping profiles
- Telescopic aluminum profiles
- Four overlapping fiberglass strips (pre-mounted)

3. Specifications

Brand	Windhager
Model Number	04598
Color	Anthracite
Material	Aluminum, Fiberglass Fabric
Style	Modern
Dimensions (Max)	120 cm (Width) x 250 cm (Height)
Installation Depth	10 mm
Assembly Required	Yes
Smart Home Compatibility	Not Smart Home Compatible
Country of Origin	China

4. Setup and Installation

The Windhager Telescopic Door Mosquito Net is designed for straightforward, drill-free external mounting. Follow these steps for proper installation:

1. **Measure Your Door Opening:** Carefully measure the width and height of your door frame. The mosquito net is suitable for openings up to a maximum of 120 cm in width and 250 cm in height. Ensure you have a flat surface of at least 10 mm around the frame for mounting.

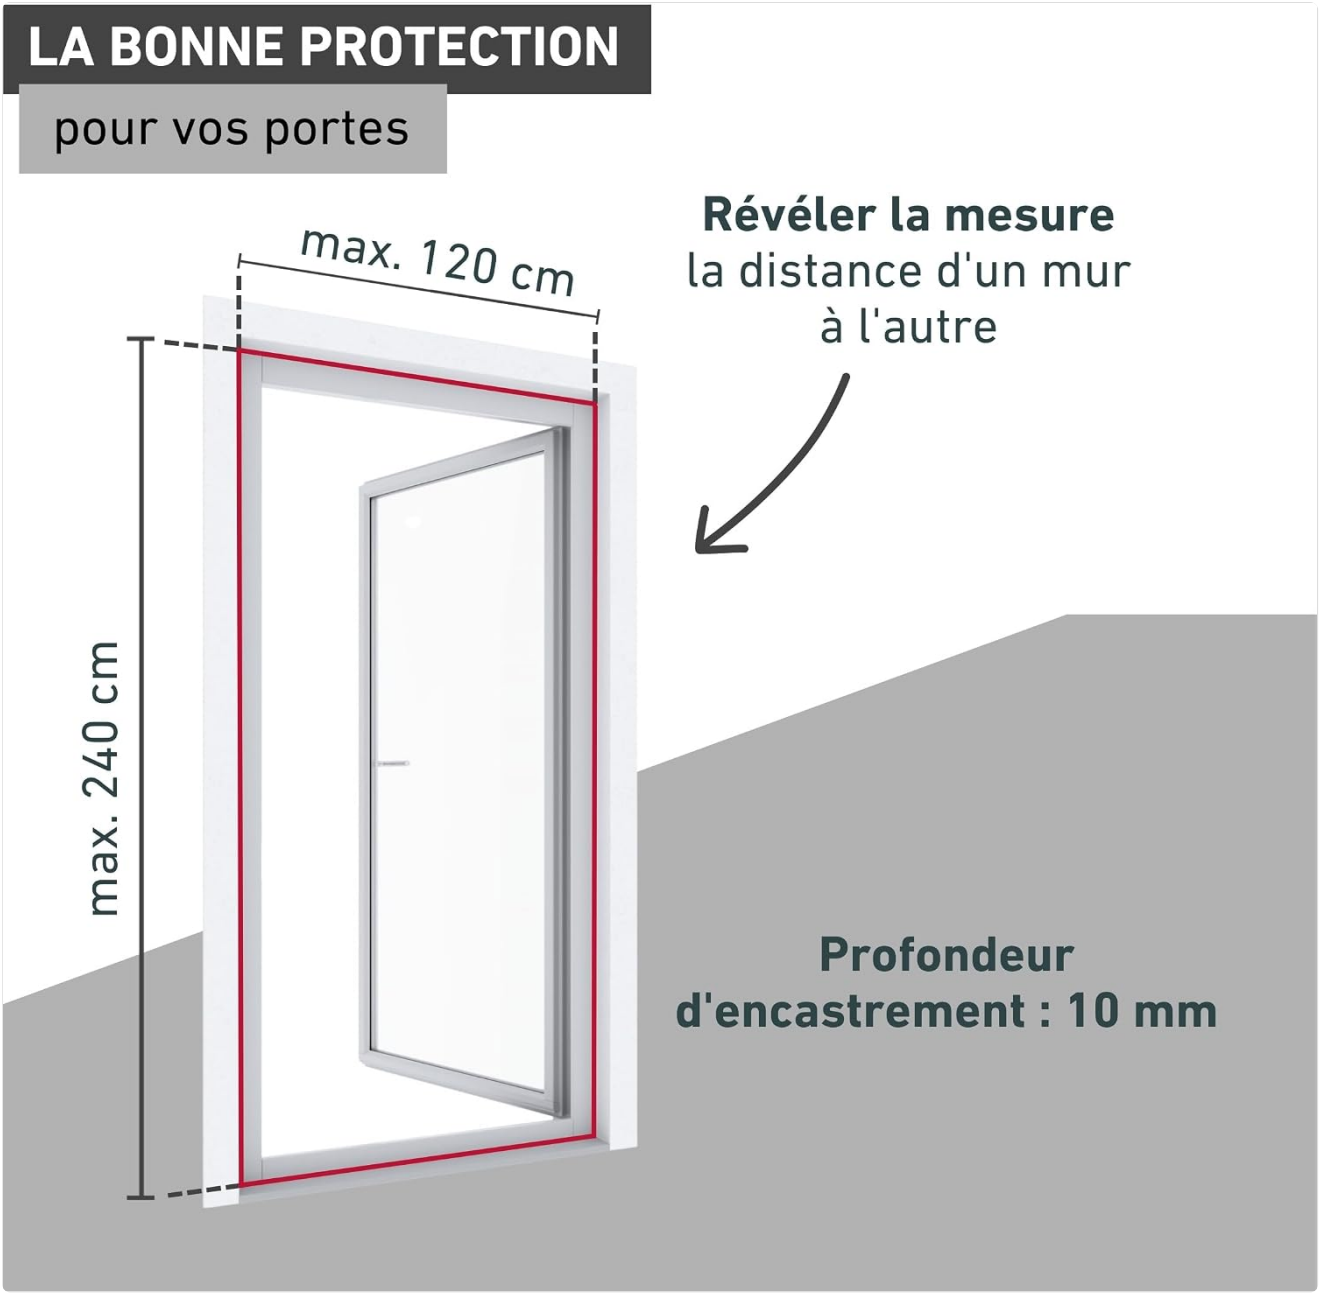

Figure 1: Measuring your door opening. This diagram guides users on how to correctly measure their door opening for the mosquito net. It specifies the maximum width and height the net can accommodate and highlights the minimal 10 mm installation depth required.

2. **Prepare the Mounting Surface:** Clean the area around your door frame where the Velcro strip will be applied. Ensure it is dry and free of dust or grease for optimal adhesion.
3. **Attach the Velcro Strip:** Apply the provided Velcro strip along the top and sides of your door frame, ensuring it is straight and securely pressed into place.

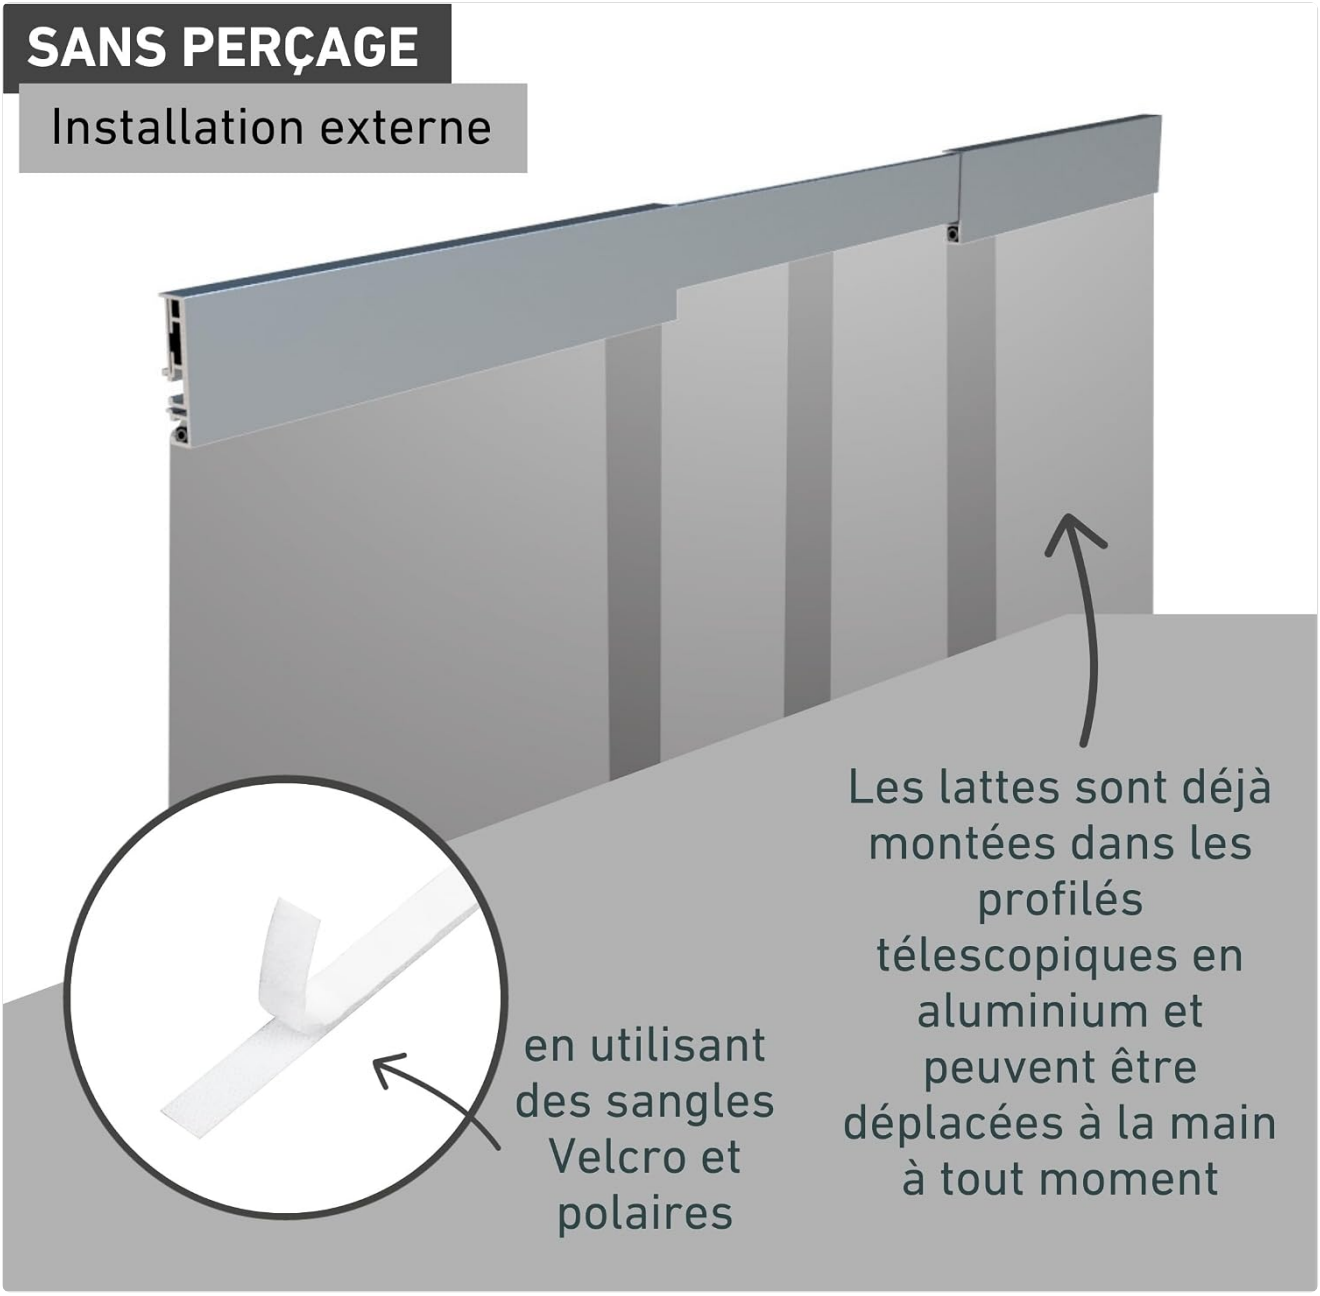

Figure 2: Drill-free installation with Velcro. This image explains the simple, drill-free installation process using Velcro strips. It shows how the slats are already integrated into the telescopic aluminum profiles, making setup quick and easy without permanent alterations to the door frame.

4. **Mount the Mosquito Net:** The fiberglass strips are pre-mounted in the telescopic aluminum profiles. Align the top profile of the mosquito net with the Velcro strip on your door frame and press firmly to secure it.
5. **Adjust Width and Height:** The telescopic aluminum profiles allow for adjustment to fit your door's specific dimensions within the maximum limits. Adjust the width and height as needed to ensure a snug fit.

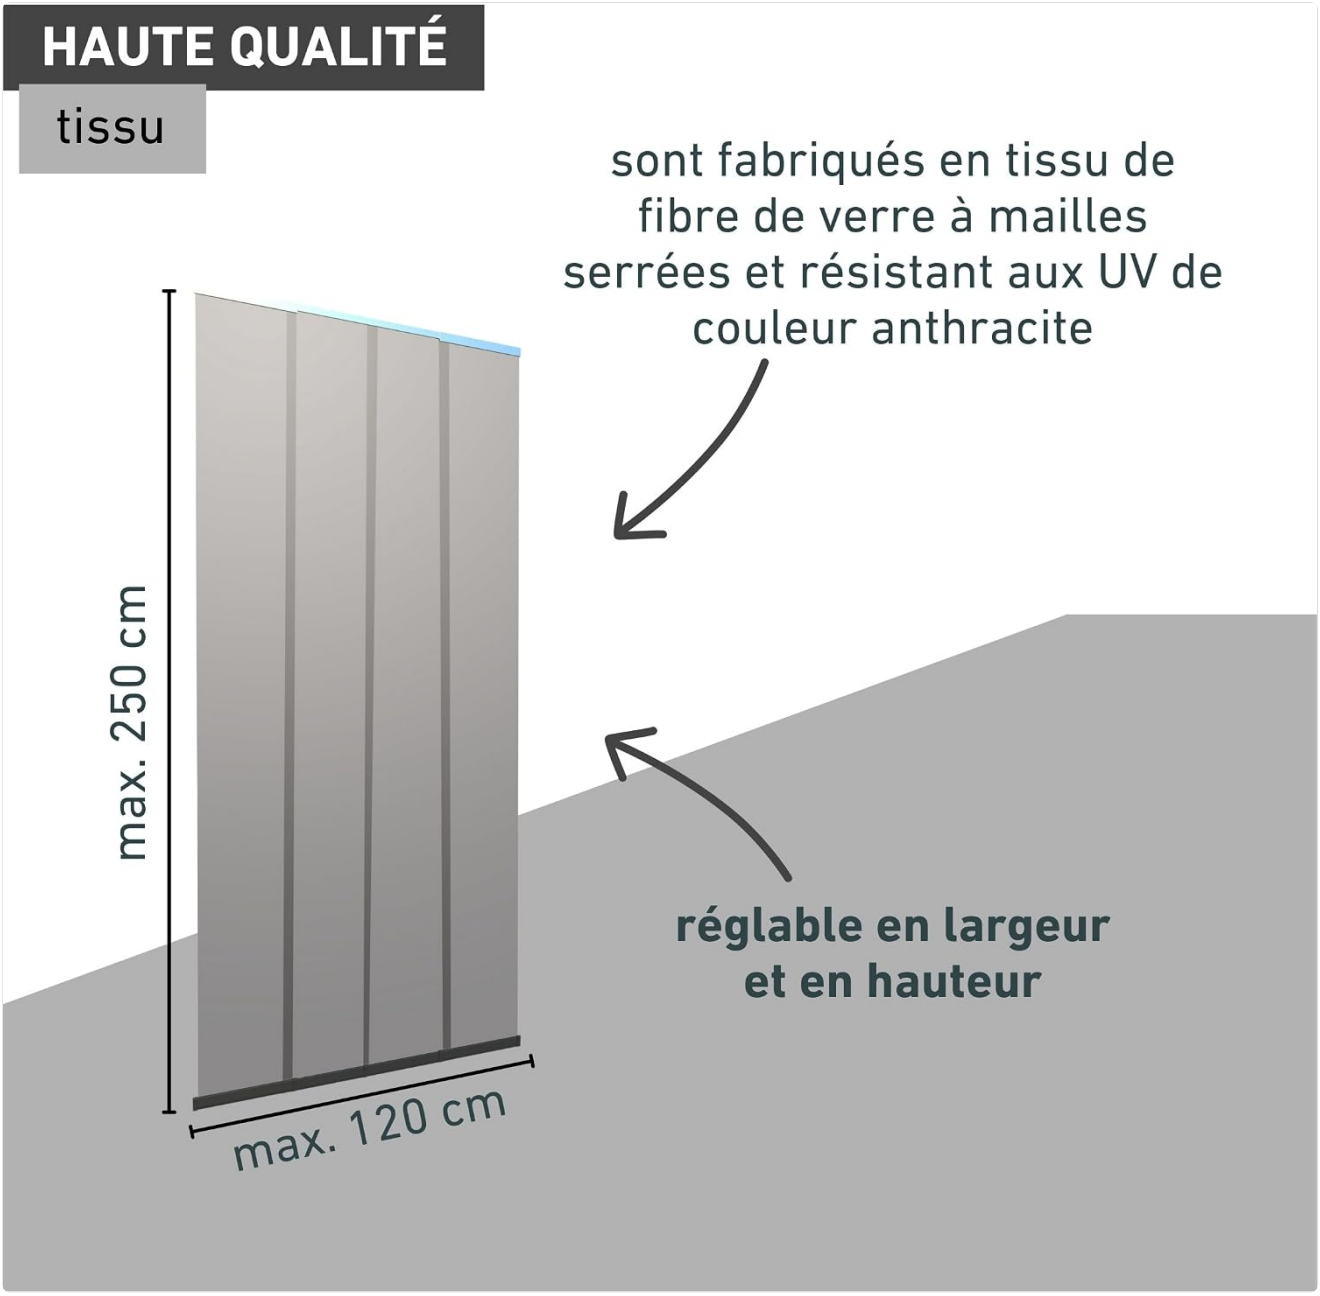

Figure 3: Dimensions and fabric details. A visual representation of the mosquito net's maximum dimensions, illustrating its adjustable width and height. It also points out the high-quality, UV-resistant anthracite fiberglass fabric used for effective insect barrier.

6. **Ensure Proper Tension:** The integrated weight bands at the bottom of each fiberglass strip help keep the curtain taut. Ensure these are hanging freely to maintain proper tension and closure.

Figure 4: Weight bands and 'Soft Stop' end caps. Detail view of the curtain's lower section, demonstrating the integrated weight bands that ensure the net remains taut and closes properly. The 'Soft Stop' end caps are visible, designed for quiet operation.

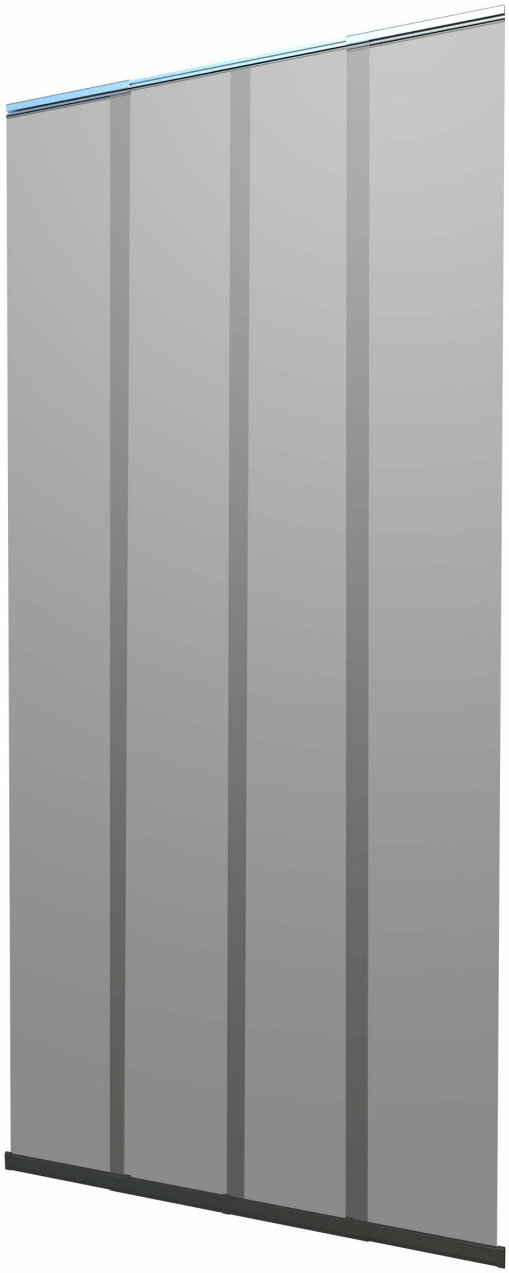

Figure 5: Easy passage through the mosquito net. This image shows a woman effortlessly passing through the Windhager telescopic door mosquito net, highlighting its convenient design for daily use while keeping insects out. The net provides a clear view outside.

Figure 6: Benefits for pets, children, and door compatibility. This visual emphasizes the user-friendly aspect of the mosquito net, allowing children and pets to pass through easily. It also confirms its suitability for various door types, including those with roller shutters.

5. Operating Instructions

The Windhager Telescopic Door Mosquito Net is designed for effortless use and convenient passage:

- **Passage:** Simply walk through the overlapping fiberglass strips. The design allows for easy entry and exit, and the strips will fall back into place automatically.
- **Adjusting Slats:** The individual slats, pre-mounted in the telescopic aluminum profiles, can be manually moved along the profile at any time to fine-tune their position or overlap if needed.
- **Silent Closure:** The 'Soft Stop' rubber end caps on the bottom of the strips ensure that the curtain closes quietly after passage, preventing abrupt movements or noise.

6. Maintenance

To ensure the longevity and optimal performance of your Windhager Telescopic Door Mosquito Net, follow these maintenance guidelines:

- **Cleaning the Fabric:** The fiberglass fabric is UV-resistant and durable. To clean, gently wipe the fabric strips with a damp cloth and mild soap solution. Avoid using harsh chemicals, abrasive cleaners, or stiff brushes, as these can damage the material. Rinse with a clean damp cloth.
- **Cleaning Profiles:** Periodically wipe down the aluminum and PVC profiles with a damp cloth to remove dust and dirt. Ensure the telescopic profiles are free of debris to allow smooth movement of the slats.
- **Inspect Components:** Regularly check the Velcro strip for secure adhesion, the PVC clamping rods for proper tension, and the rubber end caps for any wear or damage.

7. Troubleshooting

If you encounter any issues with your mosquito net, refer to the following common troubleshooting tips:

- **Curtain Not Closing Properly:**
  - Check if the weight bands at the bottom of the strips are obstructed or tangled. Ensure they hang freely.
  - Verify that the PVC clamping rods are correctly tensioned, keeping the curtain taut.
  - Inspect the 'Soft Stop' rubber end caps for any damage or debris that might prevent silent and complete closure.
- **Difficulty Moving Slats:**
  - Examine the telescopic aluminum profiles for any dirt, dust, or small obstructions. Clean the profiles thoroughly.
  - Ensure the slats are correctly seated within the profiles.
- **Velcro Losing Adhesion:**
  - If the Velcro strip begins to peel, ensure the surface was clean and dry during initial application. Re-clean the surface and reapply the Velcro, or replace it if necessary.

8. Warranty and Support

For detailed warranty information, including terms and conditions, please refer to the product packaging or the official Windhager website. If you require technical assistance, have questions about installation, or need to report a defect, please contact Windhager customer support directly through their official channels. Keep your proof of purchase handy when contacting support.
