AudioNova B09MV1YT4X

AudioNova Hearing Aid Cleaning Spray User Manual

Model: B09MV1YT4X

Product Overview

The AudioNova Cleaning Spray is an essential product designed for the effective cleaning and maintenance of hearing aids and ear protection devices. This antibacterial spray helps to dissolve earwax and remove debris, ensuring optimal performance and extending the lifespan of your hearing devices.

Each 30ml bottle of AudioNova Cleaning Spray comes with a specialized brush, engineered to reach intricate areas of your hearing aid for thorough cleaning.

Setup and Preparation

Before using the AudioNova Cleaning Spray, ensure your hands are clean and dry. Prepare a clean, dry cloth for wiping the hearing aid after cleaning.

Unboxing and Components

- One (1) 30ml bottle of AudioNova Cleaning Spray.
- One (1) integrated special cleaning brush.

Operating Instructions

Follow these steps for effective cleaning of your hearing aid or ear protection device:

1. **Prepare the Brush:** Gently squeeze the top of the spray bottle to dispense a small amount of cleaning spray onto the integrated special brush. Ensure the brush bristles are adequately moistened with the product.

2. **Apply to Device:** Carefully move the moistened brush over the parts of the hearing aid or ear protection device that require cleaning. Pay special attention to areas where earwax or debris tends to accumulate, such as the sound outlet, microphone openings, and vents. The brush's design allows access to hard-to-reach crevices.
3. **Dissolve Earwax:** The spray is formulated to effectively dissolve earwax without causing damage to the device's components. Allow the spray to work for a few moments if necessary, especially on stubborn wax build-up.
4. **Wipe Clean:** After brushing, use a clean, dry cloth to thoroughly wipe down the hearing aid. Ensure all excess spray and dissolved earwax are removed.
5. **Inspect:** Visually inspect the device to ensure it is clean and dry before storing or reinserting.

Maintenance and Care

Regular and proper maintenance is crucial for the longevity and optimal performance of your hearing aids. The AudioNova Cleaning Spray is designed to be a part of your daily care routine.

General Care Guidelines

Hygiene: Maintain good ear hygiene. Ensure your fingers are clean and dry before handling your hearing aid. This prevents the transfer of dirt and oils to the device.

Protection Against Moisture: Always remove your hearing aid before showering or swimming. If it gets wet, dry it immediately using a drying box. Never use heat sources like hair dryers or radiators to dry your hearing aid.

Avoid Shocks: Be careful not to drop your hearing aid. Even a small impact can damage the delicate internal components.

Protection Against Heat: High temperatures can damage hearing aids. Never expose your device to strong heat, such as in a sauna, outdoors in direct sunlight, or near heating elements.

Specific Maintenance Practices

Daily Cleaning: Daily cleaning is very important. Never use alcohol, solvents, or other cleaning agents not specifically designed for hearing aids. The AudioNova Cleaning Spray is formulated for this purpose.

Batteries for Hearing Aids: When not using your hearing aids, remove the batteries to protect them from damage and prolong their life.

Safe Storage: Store hearing aids out of reach of children and pets. Always keep them in their case or a designated dry box when not in use. When not using the hearing aid, the battery compartment must be open.

Sterilization: Microorganisms are a part of our daily lives. Certain forms of cleaning and care products protect effectively against contamination and effectively prevent infections in the outer ear. The AudioNova Cleaning Spray contributes to this.

Troubleshooting

The AudioNova Cleaning Spray is designed for straightforward use. If you encounter issues, consider the following:

- **Ineffective Cleaning:** Ensure you are applying enough spray to the brush and thoroughly brushing all affected areas. For heavy earwax buildup, a second application might be necessary. Always use a clean, dry cloth to wipe away residue.
- **Spray Nozzle Clogged:** If the spray does not dispense properly, gently clean the nozzle with a soft, damp cloth. Do not use sharp objects to clear the nozzle as this may damage it.
- **Device Damage:** The spray is designed to be safe for hearing aids. If you notice any damage to your device, discontinue use of the spray and consult with a hearing aid professional.

Specifications

Feature	Detail

Product Name	AudioNova Cleaning Spray
Volume	30 ml
Application	Hearing aids and ear protection devices
Key Function	Antibacterial cleaning, earwax dissolution
Included Accessory	Integrated special cleaning brush
