TotalBoat 520937

TotalBoat Wood Honey Food Safe Wood Finish Instruction Manual

Model: 520937 | Brand: TotalBoat

Product Overview

TotalBoat Wood Honey is a food-safe wood finish designed to provide a beautiful satin oil finish on bare or new interior wood surfaces quickly and easily. This non-toxic blend of oil and wax enhances the natural wood grain and offers protection against water and stains.

It is suitable for a variety of wooden items, including cutting boards, charcuterie boards, butcher block countertops, wooden salad bowls, kitchen utensils, and even wooden toys.

Safety Information

- **Food Safe:** TotalBoat Wood Honey is 100% food-safe, non-toxic, and solvent-free. Once cured, the surface is safe for food contact, adhering to FDA regulation 21CFR 175.300.
- **Low VOCs & Mild Odor:** This product does not contain solvents, toxic chemicals, or metals, resulting in a mild odor during application.
- **Color Impartation:** The product may impart a slight amber color on white or clear wood surfaces. It is recommended to test on an inconspicuous area first to ensure the desired finish.
- **Allergen Information:** While Wood Honey does not contain nut oils, the manufacturer cannot guarantee that it has not been processed in a facility that also processes other potential allergens. The wax material is proprietary and does not contain wax from soy, bees, or paraffin.

Preparation and Setup

Ensure the wood surface is clean, dry, and free from dust or previous finishes. For best results, sand the wood surface to a smooth finish, typically with 320-400 grit sandpaper, before application.

Operating Instructions: Application

Applying TotalBoat Wood Honey is a straightforward process that enhances the natural beauty and durability of your wood items.

1. **Apply the Finish:** Dispense a few drops of Wood Honey directly onto the wood surface.
2. **Spread Evenly:** Using a clean, lint-free rag or a gloved hand, wipe the oil evenly across the entire surface of the wood.
3. **Allow to Soak:** Let the oil soak into the wood for approximately 10-20 minutes. The wood grain will begin to pop and the tone will become richer.
4. **Wipe Off Excess:** With a clean rag, wipe off any excess oil from the surface.
5. **Second Coat (Optional but Recommended):** For maximum protection, water resistance, and stain resistance, apply a second coat. A second coat will make the grain even more pronounced.

Maintenance

To ensure the longevity and beauty of your finished wood surfaces, apply an occasional maintenance coat of TotalBoat Wood Honey as needed. This will help to keep the wood nourished and protected.

For cleaning, hand wash finished items only. Avoid dishwashers or harsh chemical cleaners, as these can degrade the finish.

Image: A large, dark wooden bowl accompanied by a matching wooden spoon, both displaying a well-maintained, lustrous finish.

Troubleshooting

- **Raised Wood Grain After First Application:** If the wood grain appears slightly raised after the initial application, wait 3-5 days for the oil finish to fully dry. Then, lightly sand the surface in the direction of the grain using 320-400 grit sandpaper. Remove any residue with a clean cloth and apply another coat of Wood Honey.
- **Amber Color on Light Surfaces:** TotalBoat Wood Honey may impart a slight amber color, particularly on white or clear wood surfaces. To avoid unexpected results, always test the product on a small, inconspicuous area of the wood before applying it to the entire piece.

Specifications

Attribute	Detail
Brand	TotalBoat
Model Number	520937
Item Weight	0.5 Pounds (8 ounces)
Product Dimensions	6"L x 3"W
Material	Wood (for application)
Color	Golden (product color)
Recommended Uses	Charcuterie, Cutting Boards, Butcher Blocks, Wooden Utensils, Toys
Product Care Instructions	Hand Wash Only
Special Feature	Long Lasting
Included Components	Wood Oil
Country of Origin	USA
Date First Available	October 25, 2021
