## AudioNova A08

# AudioNova Hearing Aid Batteries Size 10 (PR70) User Manual

Model: A08

## 1. Introduction

Thank you for choosing AudioNova Hearing Aid Batteries Size 10 (PR70). These premium quality, mercury-free Zinc Air batteries are specifically designed to provide reliable and long-lasting power for your hearing aids. This manual provides essential information on how to properly use, store, and dispose of your batteries to ensure optimal performance and safety.

## Product Overview

AudioNova is a specialist in hearing solutions, offering a wide range of hearing aids and accessories, including these high-quality hearing aid batteries. Unlike traditional batteries, this pack of 60 AudioNova 10 hearing aid batteries ensures optimized performance and stable voltage. They are made of stainless steel.

Modern hearing aids require significant power due to advanced features like connectivity and Bluetooth. AudioNova 10 hearing aid batteries are engineered to meet these demands, providing excellent voltage stability and ensuring your hearing aids function without issues.

## 2. Setup and Activation

AudioNova hearing aid batteries are Zinc Air batteries, which means they are activated by air. Follow these steps for proper activation and insertion:

1. **Remove the Protective Tab:** Carefully remove the protective yellow tab from the back of the battery. This tab seals the air holes and prevents activation.

Image: A single AudioNova hearing aid battery with its yellow protective tab partially removed, illustrating the activation process.

2. **Allow to Breathe:** After removing the tab, allow the battery to sit in the open air for at least one minute before inserting it into your hearing aid. This allows the battery to fully activate and reach its optimal voltage.

Image: An icon depicting an open book with an 'i' symbol, representing "Before Use" instructions.

3. **Insert into Device:** Insert the activated battery into your hearing aid. Ensure the "+" sign on the battery aligns with the "+" sign inside the battery compartment of your hearing aid. Avoid letting batteries touch each other or other types of batteries.

## 3. Operating Your Hearing Aid with AudioNova Batteries

AudioNova Size 10 (PR70) batteries are designed for high compatibility with all types of hearing aids, amplified earpieces, and hearing assistants that use size 10 batteries. The yellow color code on the packaging and battery itself helps identify the correct size.

The packaging includes 10 rigid blister packs, each containing six batteries arranged in a circular shape, making it easy to remove and use individual batteries.

Once inserted correctly, your hearing aid should power on as usual. If you experience any issues, refer to the troubleshooting section or your hearing aid's specific manual.

## 4. Maintenance and Storage

### Storage Guidelines

Proper storage is crucial for maximizing the lifespan of your AudioNova hearing aid batteries.

- Store batteries in a dry place at room temperature.
- Avoid hot environments, as heat can significantly reduce battery life. The ideal storage temperature is between 10°C and 30°C (50°F and 86°F).
- Do not store batteries in the refrigerator.
- Keep batteries out of reach of babies and children.

## 5. Troubleshooting

If your hearing aid is not functioning correctly after inserting new AudioNova batteries, consider the following:

- **Check Activation:** Ensure the yellow protective tab was fully removed and the battery was allowed to "breathe" for at least one minute before insertion.
- **Correct Insertion:** Verify that the battery is inserted with the correct polarity (the "+" sign on the battery aligns with the "+" sign in the hearing aid compartment).
- **Battery Life:** If the battery has been in use for a long time, it might be depleted. Replace it with a new one.
- **Hearing Aid Issue:** If the problem persists with a new, properly activated battery, the issue might be with the hearing aid itself. Consult your hearing aid's user manual or contact a hearing aid specialist.

## 6. Specifications

| Feature | Detail |
|---|---|
| **Brand** | AudioNova |
| **Model Number** | A08 |
| **Battery Size** | 10 (PR70) |
| **Color Code** | Yellow |
| **Battery Composition** | Zinc Air (Mercury-free) |
| **Voltage** | 1.45 Volts |
| **Ampere** | 15 A |
| **Number of Units** | 60 batteries (10 blisters of 6) |
| **Recommended Use** | Hearing Aids, Amplified Earpieces, Hearing Assistants |
| **Reusability** | Single Use |
| **Item Weight** | 50 Grams |
| **Manufacturer** | Phonak |
| **Compliance** | CE Certified (Made in Germany) |

## 7. Disposal and Recycling

These batteries are single-use and are not rechargeable. It is important to dispose of used batteries responsibly.

- Do not throw used batteries into general waste bins or in nature.
- Batteries are considered hazardous waste and can explode if exposed to heat or mishandled, potentially causing harm.
- Dispose of batteries at designated battery collection points or recycling centers in accordance with local regulations.
