ADVATEK LIGHTING PixLite E16-S Mk3 LED Controller

Physical Connections

Figure 1: Connection Points

In order to connect to the PixLite E16-S Mk3, there must be a working power supply between 5 – 24Vdc connected to the power input, which is the small screw terminal marked “+” & “-”. The screws should be loosened for wire insertion and then tightened again, providing a highly robust and secure connection. The polarity for the connector is clearly marked on the lid.

Startup & Network Connection

Startup

Upon startup for the first time, the PixLite will be using DHCP/AutoIP and the status LED will flash green, indicating normal operation. If you have a router, then DHCP will automatically assign an IP address to both the PixLite and your computer.

No Router? No Problem. Simply connect the PixLite directly to your computer, and open Advatek Assistant 3.

Advatek Assistant 3

The easiest method for connecting to the PixLite E16-S Mk3 is by launching Advatek Assistant 3 to discover the device. Advatek Assistant 3 can be downloaded and installed, using the URL below:

<https://www.advateklights.com/advatek-assistant-3>

Any active PixLite devices on the network will automatically be discovered and displayed. Double-click to open its Management Interface, and begin configuring your new PixLite E16-S Mk3.

Figure 2: Advatek Assistant 3

The screenshot shows the Advatek Assistant 3 application window. It has a menu bar (File, Edit, Help) and a toolbar with a 'Clear' button and a refresh icon. Below the toolbar is a table listing discovered devices. The table has columns for Nickname, Model, IP, MAC, and Firmware. Each row represents a device, with a small icon to the left of the Nickname column. The devices listed are: Entrance Arch, Default Nickname, Sign - Outside Advertisement, Stage 1 - Left, Stage 1 - Right, Stage 2, Themepark Ride East, and Themepark Rise West.

	Nickname	Model	IP	MAC	Firmware
	Entrance Arch	PixLite E4-S Mk3	192.168.2.145	E0:B6:F5:E0:12:CA	1.2.2
	Default Nickname	PixLite A4-S Mk3	192.168.1.133	E0:B6:F5:E0:16:40	1.2.2
	Sign - Outside Advertisement	PixLite E16-S Mk3	192.168.2.146	E0:B6:F5:E0:12:CB	1.2.2
	Stage 1 - Left	PixLite A16-S Mk3	192.168.3.101	E0:B6:F5:E0:12:CC	1.2.2
	Stage 1 - Right	PixLite A16-S Mk3	192.168.3.102	E0:B6:F5:E0:12:CD	1.2.2
	Stage 2	PixLite T8-S Mk3	192.168.3.103	E0:B6:F5:E0:12:CE	1.2.2
	Themepark Ride East	PixLite A4-S Mk3	10.0.0.170	E0:B6:F5:E0:12:CF	1.2.2
	Themepark Rise West	PixLite A4-S Mk3	10.0.0.171	E0:B6:F5:E0:12:D0	1.2.2

Further Information

For a more in-depth understanding of the device, including physical installation, electrical connections, network connections, operation, and specifications, you should consult the PixLite E16-S Mk3 User Manual:
