CONNECTING PHONE

The following illustration shows how to connect the power and LAN ports of VoIP phone. The following illustration shows how to install the phone and stand. The following illustration shows how to install the handset and battery.

Operation

Answering a Call

An incoming call is indicated by a ringing tone and a flashing indicator at the top of both the handset and base units. You can answer the call by doing one of the following: Pick up the handset to answer the call.

Press the Line Inel/Line key on the base or handset to answer the call

Making a Call

Dialing with the Keypad

Enter the telephone number with the alphanumeric keypad and the call will start automatically.

Using the Speed dial keys

You can use the 0 pre-assigned speed dial hotkeys, to contour the most commonly dialed numbers. Use the function to dial a number quickly, instead of keying in a complete number.

To call a number using speed dialing, follow the steps below

Tress the speed dial hokey that has been pre-assigned to the phone number and the call will start automatically

Call Options

While a call is in progress, a number of additional options are available

Using the Speaker Phone

For hands-free operation, you can use the built-in speaker to talk on the phone. To use the speakerphone, follow the While talking on the phone, press the SPEAKER key on the phone to enable the Speakerphone function. Press the SPEAKER key again to terminate the call.

Putting a Call on Hold (two-line model only)

You may want to put a call on hold temporarily while doing some work or attend to a second incoming or outgoing call. To put a call on hold, do one of the following: Press the HOLD key on the handset to put the call on hold. When you receive a second call, press the next available LINE key to attend to the new call, and the first call will be put on hold automatically.

Mute a Call (single-line model only)

You may need to mute MIC temporarily during a call, do one of the following Press the MUTE key on the handset to mute the microphone. Press the MUTE key again to unmute the microphone

Charging the Handset Battery

You would need to charge the handset battery before using the handset install the battery into the handset Place the handset onto the base unit and the base unit will start to charge the handset automatically.

The charging indicator lights up in red during charging progress. The LED goes off after the handset battery is fully charged

Checking Voice Messages

If the message waiting indicator at the top of the handset or base unit lights up in red, it indicates that there are one or more new messages in the voicemail box.

- Press the MESSAGE key on the phone to retrieve voice messages
- An external label or IBA must support the voice message feature. And you need to set a voice message code between using

Support
