SAEUYVB c-160

SAEUYVB Candle Making Kit with Electric Wax Melting Pot (Model c-160) - User Manual

Your guide to creating beautiful, handmade candles.

1. Product Overview

The SAEUYVB Candle Making Kit provides all the necessary components for crafting your own candles. This kit includes an electric wax melting pot with an LED display for precise temperature control, natural soy wax, a variety of essential oils and dye blocks, candle tins, wicks, and decorative elements. It is designed for ease of use, suitable for both beginners and experienced crafters.

2. Kit Contents

Your SAEUYVB Candle Making Kit includes the following items:

- 1 x LED Display Electric Wax Melting Pot (500 ml)
- 2 x 1.5 Pounds Soy Wax
- 16 x Candle Tins
- 8 x Candle Essential Scents
- 12 x Wax Dye Blocks
- 16 x Gift Boxes
- 20 x Ribbons
- 20 x Wooden Wick Holders
- 20 x Wicks
- 20 x Wick Stickers
- 20 x Warning Stickers
- 2 x Anti-scald Gloves
- 1 x Stirring Spoon
- 1 x Silicone Anti-Scalding Mat
- Marker Pen and Writable Label Paper
- Dried Flowers (Lavender, Osmanthus, Rose, Jasmine-buds)

3. Setup Instructions

1. **Prepare Your Workspace:** Ensure your work area is clean, flat, and protected from spills. Place the silicone anti-scalding mat on your surface.
2. **Position the Wax Melting Pot:** Place the electric wax melting pot on the silicone mat. Ensure it is connected to a US 110-120V (50/60HZ) power outlet.
3. **Prepare Candle Tins:** For each candle tin, attach a wick to the center of the tin's bottom using a wick sticker. Use a wooden wick holder to keep the wick upright and centered.

4. Operating Instructions

4.1 Melting the Wax

1. **Add Soy Wax:** Pour the desired amount of soy wax flakes into the inner pot of the electric wax melting pot.
2. **Turn On and Set Temperature:** Plug in the melting pot and turn the knob to the desired temperature. The LED display will show the current temperature. For soy wax, a melting temperature below 257°F (125°C) is recommended.
3. **Melt Wax:** Allow the wax to melt completely, stirring occasionally with the provided spoon to ensure even melting.

4.2 Adding Color and Fragrance

1. **Add Dye Blocks:** Once the wax is fully melted, add a wax dye block. Stir until the color is evenly distributed. You can mix different dye blocks to create custom colors.
2. **Add Essential Oils:** After the dye is mixed and the wax has cooled slightly (refer to specific wax instructions for optimal fragrance addition temperature, typically around 180-185°F or 82-85°C), add your chosen essential oil(s). Stir gently for about 2 minutes to ensure the fragrance is well incorporated.

4.3 Pouring and Cooling

1. **Pour Wax:** Carefully pour the scented and colored wax into the prepared candle tins.
2. **Add Dried Flowers (Optional):** If desired, gently place 2-3 pieces of dried flowers (lavender, osmanthus, rose, jasmine-buds) into the melted wax. Ensure they are kept away from the wick to prevent burning.
3. **Cool and Cure:** Allow the candles to cool completely at room temperature. This process, known as curing, can take several hours to a day. For best results, allow candles to cure for 24-48 hours before lighting.
4. **Apply Warning Stickers:** Once cooled, apply the warning stickers to the bottom of each candle tin.

5. Safety Precautions

- Always use the provided anti-scald gloves and silicone mat when handling hot wax or the melting pot.
- Never leave the wax melting pot unattended while in use.
- Keep the melting pot and hot wax away from children and pets.
- Ensure proper ventilation in your workspace.
- Do not exceed the recommended temperature for wax melting (below 257°F / 125°C).
- When adding dried flowers, ensure they are placed away from the wick to prevent fire hazards.
- Only use the melting pot with the specified voltage (US 110-120V).

6. Maintenance

6.1 Cleaning the Wax Melting Pot

1. **Unplug and Cool:** After use, unplug the wax melting pot and allow it to cool completely.
2. **Remove Excess Wax:** Once the wax has solidified, gently scrape out any remaining wax from the inner pot. You can place the inner pot in a freezer for a short period to make the wax easier to remove.
3. **Wipe Clean:** Use a soft cloth or paper towel to wipe the inner pot clean. For stubborn residue, a small amount of rubbing alcohol can be used.
4. **Exterior Cleaning:** Wipe the exterior of the melting pot with a damp cloth. Do not immerse the main unit in water.

6.2 Storage

Store all kit components in a cool, dry place, away from direct sunlight and extreme temperatures. Ensure all items are clean and dry before storage.

7. Troubleshooting

- **Wax not melting:** Ensure the melting pot is properly plugged in and the temperature knob is set. Check the power outlet.
- **Uneven wax melting:** Stir the wax periodically with the provided spoon to ensure even heat distribution.
- **Wick not staying centered:** Ensure the wick sticker is firmly attached to the bottom of the tin and the wooden wick holder is securely placed across the top of the tin.
- **Weak fragrance:** Ensure essential oils are added at the correct temperature (typically slightly cooler than pouring temperature) and stirred thoroughly. Some essential oils naturally have a lighter scent throw.
- **Dried flowers burning:** Always place dried flowers away from the wick. Use only 2-3 small pieces per candle.
- **Melting pot not working in your region:** This electric wax melting pot is designed for US 110-120V (50/60HZ) outlets. It may not be compatible with other voltage standards without a suitable voltage converter.

8. Specifications

Feature	Detail
Brand	SAEUYVB
Model Number	c-160

Item Dimensions (L x W x H)	10.83 x 7.09 x 11.81 inches
Item Weight	3.7 kg
Wax Melting Pot Capacity	500 ml
Voltage	US 110-120V (50/60HZ)
Power	100W
Material Type	Wax (Soy Wax)
Age Range (Description)	Adult

9. Warranty and Support

The SAEUYVB Candle Making Kit comes with a **3-year warranty**. For any questions, concerns, or support needs regarding your product, please refer to the contact information provided with your purchase or visit the official SAEUYVB store on Amazon.
