Important Safety Instructions

Please read all instructions carefully before using the Chicco 3-in-1 Modular Electric Steam Sterilizer. Failure to follow these instructions may result in injury or damage to the product.

- Always keep the appliance out of reach of children.
- Do not immerse the base unit in water or other liquids.
- Use only distilled water for sterilization to prevent mineral buildup.
- Ensure the lid is properly closed before starting a cycle.
- Exercise caution when opening the lid after a cycle, as hot steam will be released.
- This product is not intended for use with items that cannot be steam sanitized. Refer to the manufacturer's guidelines for all items placed inside.

- Unplug the sterilizer from the electrical outlet when not in use and before cleaning.

Components Overview

The Chicco 3-in-1 Modular Electric Steam Sterilizer consists of several key components designed for easy assembly and effective sterilization:

- **Base Unit:** Contains the heating plate and control button.
- **Lower Basket:** For holding larger items like baby bottles in Full-Size mode.
- **Upper Basket/Lid:** For smaller items like nipples, pacifiers, and bottle caps. Also serves as the lid for Compact and Microwave modes.
- **Measuring Cup:** For precise water measurement.
- **Tongs:** To safely remove hot sterilized items.

Setup Guide

Before first use, wash all components of the sterilizer with warm soapy water, rinse thoroughly, and dry. Place the sterilizer on a flat, stable, heat-resistant surface.

1. Ensure the base unit is unplugged.
2. Pour the recommended amount of distilled water into the heating plate of the base unit. Refer to the operating instructions for specific water levels for each mode.
3. Place the appropriate basket(s) onto the base unit, ensuring they are correctly aligned.
4. Arrange the items to be sterilized in the basket(s), ensuring steam can circulate freely.
5. Place the lid securely on top of the assembled unit.
6. Plug the sterilizer into a suitable electrical outlet.

Carefully pour distilled water into the ceramic coated heating plate before starting a sterilization cycle.

Operating the Sterilizer

The Chicco 3-in-1 Modular Electric Steam Sterilizer offers three distinct operating modes to suit your needs:

Full-Size Mode

This mode is ideal for sterilizing a full load of items, such as up to six baby bottles along with their nipples, caps, and rings. It provides comprehensive sterilization for larger quantities.

1. Assemble the sterilizer with both the lower and upper baskets.
2. Place bottles in the lower basket and smaller accessories in the upper basket.
3. Add the required amount of distilled water to the heating plate (refer to the manual for exact measurement).
4. Press the power button to start the sterilization cycle. The cycle typically takes approximately 5 minutes (excluding heating time).

Full-Size Mode allows for the sterilization of up to 6 bottles simultaneously, ensuring efficient use.

Compact Mode

Use Compact Mode for smaller loads or when you need to sterilize only a few items, such as pacifiers or breast pump parts. This mode is more energy-efficient and quicker.

1. Use only the upper basket placed directly on the base unit.
2. Arrange smaller items in the basket.
3. Add the specified amount of distilled water for Compact Mode.
4. Press the power button to begin the cycle.

Compact Mode is designed for efficiently sterilizing smaller items, saving time and energy.

Microwave Mode

For the quickest sterilization, the Microwave Mode allows you to use the sterilizer's upper basket and lid directly in a microwave oven. This is ideal for rapid sanitization.

1. Place items in the upper basket and cover with the lid.
2. Add the specified amount of distilled water to the base of the upper basket (refer to the manual for exact measurement).
3. Place the assembled upper basket and lid into a microwave oven.
4. Microwave for the recommended duration (e.g., 2 minutes at 1,200 watts), adjusting based on your microwave's power.
5. Allow to cool before handling.

Microwave Mode offers the quickest sterilization cycle for immediate needs.

Maintenance and Cleaning

Regular cleaning and maintenance will ensure the longevity and optimal performance of your Chicco Sterilizer.

- **Daily Cleaning:** After each use, unplug the sterilizer and allow it to cool. Discard any remaining water from the heating plate. Wash all removable components (baskets, lid) with warm soapy water and rinse thoroughly.

- **Heating Plate Descaling:** Over time, mineral deposits may accumulate on the ceramic coated heating plate, especially if hard water is used. To descale, mix 50ml of white vinegar with 100ml of water and pour it onto the heating plate. Let it sit for 30 minutes, then scrub gently with a soft brush or sponge. Rinse thoroughly. Perform descaling regularly, depending on water hardness.
- **Exterior Cleaning:** Wipe the exterior of the base unit with a damp cloth. Do not use abrasive cleaners or immerse the base unit in water.
- **Storage:** When not in use, ensure all parts are clean and dry. Store the sterilizer in a cool, dry place away from direct sunlight.

The ceramic coated heating plate is designed for easy cleaning and maintenance to prevent mineral buildup.

Troubleshooting Guide

If you encounter any issues with your Chicco Sterilizer, refer to the table below for common problems and their solutions.

Problem	Possible Cause	Solution
Sterilizer does not turn on.	Not plugged in; power outlet issue; unit not assembled correctly.	Ensure the power cord is securely plugged into a working outlet. Check if all components are correctly assembled.
No steam or insufficient steam.	Insufficient water; mineral buildup on heating plate.	Add the correct amount of distilled water. Descale the heating plate as per maintenance instructions.
Items are not completely dry (if applicable to model).	Overloaded basket; items not positioned correctly.	Do not overload the basket. Ensure items are placed to allow air circulation.
White residue on heating plate or items.	Mineral deposits from tap water.	Use only distilled water. Descale the heating plate regularly.
