AERCO 24793-1 Edge Controller

AERtrim Activation on Edge Controller

Step-by-Step Activation Instructions

1. Check if O₂ Monitoring Kit is installed on the unit.

If the O₂ field is blank, the kit is not installed. If O₂ has values, skip step 2. (*Calibration > Input/Output > O₂ Sensor*)

2. If kit is not installed:

1. Buy the kit (Part# 24793-1) and AERtrim feature (Part# not released).
2. Install the hardware and go to step 4 after completing this step.

3. To activate the AERtrim feature, provide the required unit information from the “AERtrim Activation” screen to AERCO Customer Service:

- Unit Serial #
- Fixed ID
- AERtrim ID

(*Advanced Setup > Performance > AERtrim > AERtrim Settings > AERtrim Activation*)

Note: Power cycling the unit generates a new AERtrim ID and a new AERtrim Activation Code associated with it is required to activate the feature. Follow steps 3 and 4 to get a new code.

4. **Get the AERtrim Activation Code associated with the above unit information from AERCO Customer Service.** Enter this code on the activation screen and press enter. "AERtrim Status" on the screen changes to "Active" upon successful activation. Once AERtrim is activated, it will stay active even if the unit is power cycled or the firmware is updated.

Specifications

Feature	Details
O ₂ Sensor Offset	2.1
Last Calibration Time	1:20 AM
Calibration Frequency	07/24/2022

AERtrim Activation Details

Parameter	Value
O ₂	5.5
Unit Serial #	E-00-00245
Fixed ID	740703
AERtrim ID	6462
AERtrim Activation Code	Enter
AERtrim Status	Inactive

FAQ

- What should I do if my O₂ Sensor field is blank?
- If the O₂ Sensor field is blank, it indicates that the O₂ Monitoring Kit is not installed and you should proceed with step 2.
- Where can I find the AERtrim Activation screen?
- The AERtrim Activation screen can be found under Advanced Setup > Performance > AERtrim > AERtrim Settings > AERtrim Activation.
- Will AERtrim remain active after power cycling or firmware updates?
- Yes, once AERtrim is activated, it will stay active even if the unit is power cycled or the firmware is updated.

Using Instructions

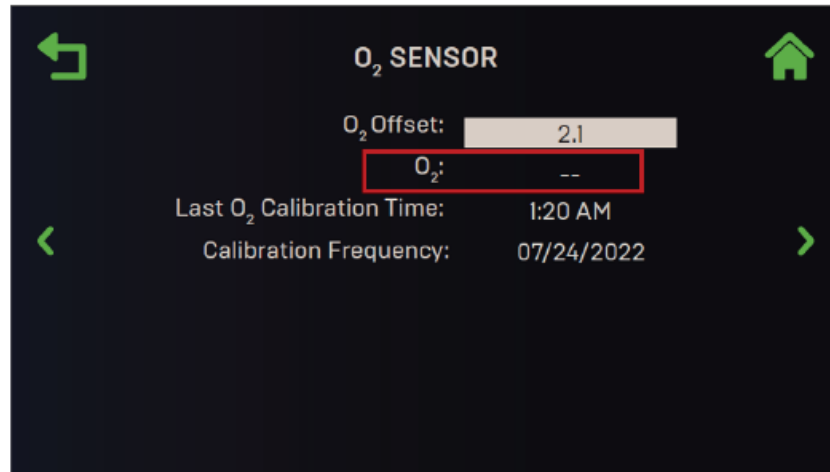

To activate the AERtrim feature on the Edge Controller, follow the steps below:

- Check if the O₂ Monitoring Kit is installed on the unit.

If the “O₂” field is blank, the kit is not installed.

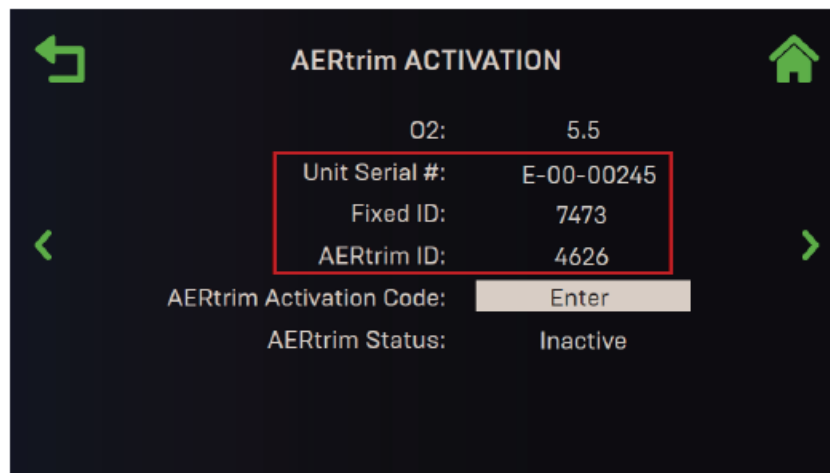

If “O₂” has values, skip step 2.

(Calibration > Input/Output > O₂ Sensor)

O ₂ SENSOR	
O ₂ Offset:	2.1
O ₂ :	--
Last O ₂ Calibration Time:	1:20 AM
Calibration Frequency:	07/24/2022

- If the kit is not installed:
 - Buy the kit (Part# 24793-1) and AERtrim feature (Part# not released).
 - Install the hardware and go to step 4 after completing this step.
- To activate the AERtrim feature, provide the required unit information from the “AERtrim Activation” screen to AERCO Customer Service:

AERtrim ACTIVATION	
O ₂ :	5.5
Unit Serial #:	E-00-00245
Fixed ID:	7473
AERtrim ID:	4626
AERtrim Activation Code:	Enter
AERtrim Status:	Inactive

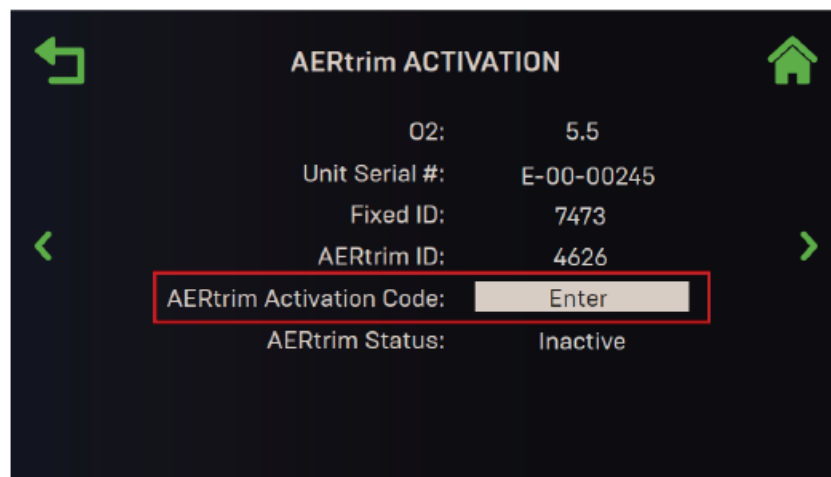

- Unit Serial #
- Fixed ID
- AERtrim ID

(Advanced Setup > Performance > AERtrim > AERtrim Settings > AERtrim Activation)

Note: Power cycling the unit generates a new AERtrim ID and a new AERtrim Activation Code associated with it is required to activate the feature. Follow steps 3 and 4 to get a new code.

- Get the AERtrim Activation Code associated with the above unit information from AERCO Customer Service. Enter this code on the activation screen and press enter. “AERtrim Status” on the screen changes to “Active” upon successful activation.

Once AERtrim is activated, it will stay active even if the unit is power cycled or the firmware is updated.
