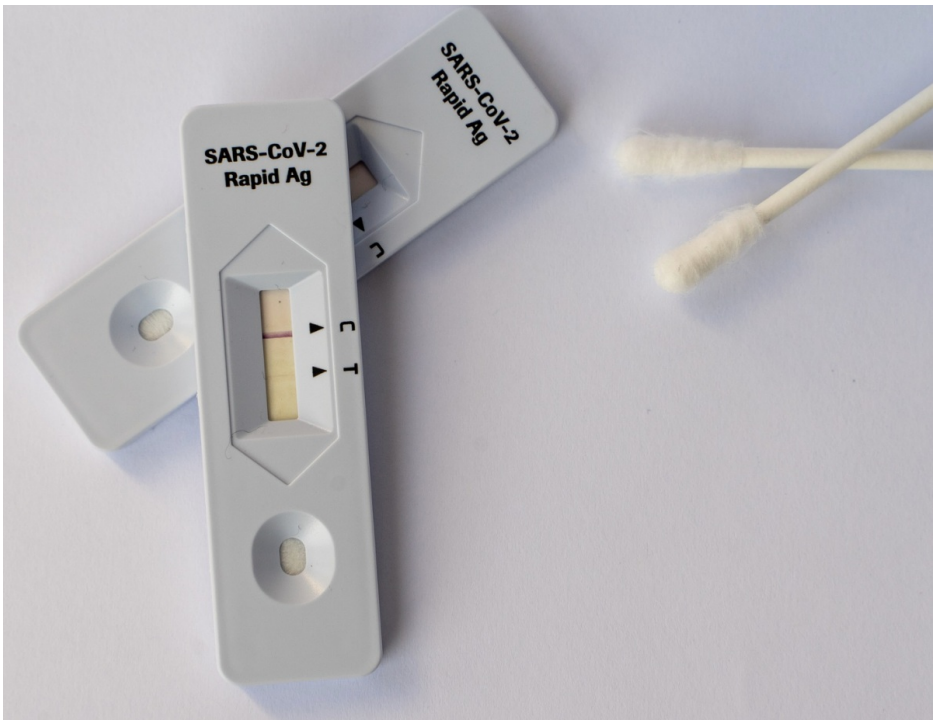
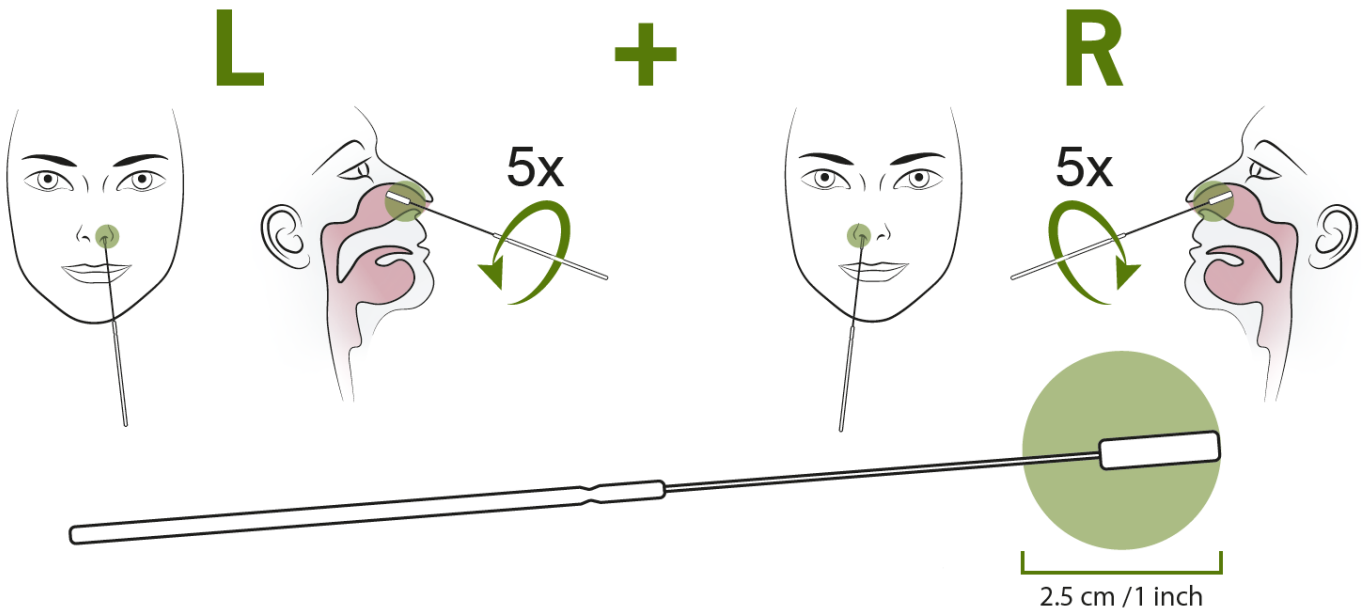
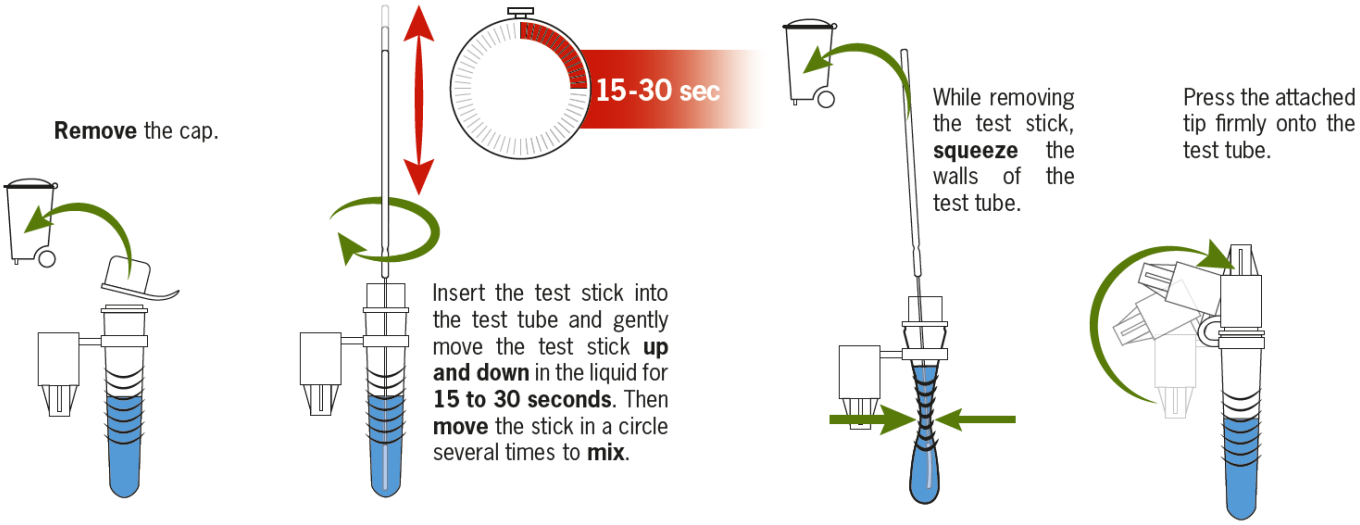
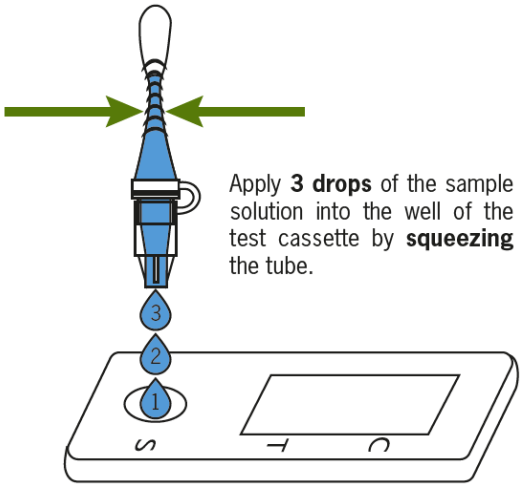
AESKU RAPID Sars-CoV-2 Antigen Test





Insert the test stick about 2.5 cm deep into one nostril. Roll the test stick along the nasal mucosa 5 times. Repeat this process in the other nostril.

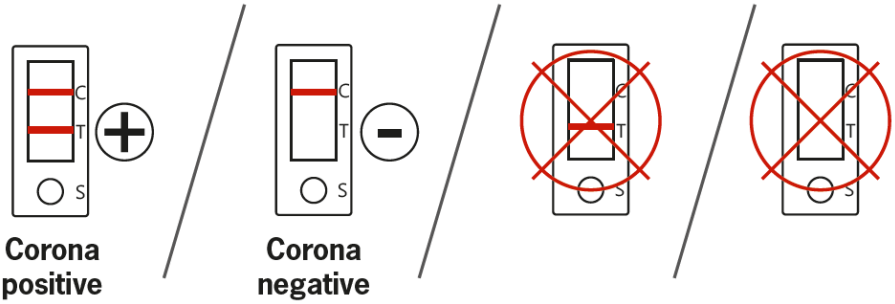




Apply **3 drops** of the sample solution into the well of the test cassette by **squeezing** the tube.

Wait 15 minutes after sample application for the result.

Assess the test result **within a 5-minute** time window.



Corona positive

Corona negative
