Vevlom 7in1 Hydrafacial Machine

Vevlom 7-in-1 Hydrafacial Machine User Manual

Model: 7in1 Hydrafacial Machine

Introduction

This manual provides detailed instructions for the safe and effective use of your Vevlom 7-in-1 Hydrafacial Machine. This multifunctional facial care device is designed for both home and professional beauty salon use, offering a comprehensive range of skin treatment functions. Please read this manual thoroughly before operation and retain it for future reference.

Important Safety Information

To ensure safe operation and prevent injury or damage, please observe the following precautions:

- Keep the device out of reach of children.
- Do not leave the device unattended during operation.
- Allow the device to cool down completely before handling or refilling the water reservoir.
- Exercise caution with hot steam to prevent burns or scalding.
- Do not use the device if the power cord or plug is damaged.
- Do not immerse the main unit in water or other liquids.
- Consult a medical professional before use if you have any pre-existing skin conditions or health concerns.

Product Components

The Vevlom 7-in-1 Hydrafacial Machine comes with several components designed for various skin treatments. Familiarize yourself with each part before use.

Image: The main unit of the Vevlom 7-in-1 Hydrafacial Machine, showcasing the control panel, solution reservoirs (A, B, C), and multiple treatment probes attached to the top and sides.

Image: A comprehensive view of the Vevlom 7-in-1 Hydrafacial Machine, including the main unit, a facial mask, and all seven distinct treatment probes and their associated tips, demonstrating the full range of accessories.

The machine typically includes:

- **Main Unit:** Houses the control panel, solution reservoirs, and internal mechanisms.
- **Solution Bottles (A, B, C):** For different treatment solutions and waste collection.
- **Hydra-Dermabrasion Handle:** For deep cleansing and exfoliation.
- **Oxygen Spray Gun:** For nutrient and oxygen infusion.
- **Ultrasonic Scrubber:** For gentle exfoliation and product penetration.
- **RF (Radio Frequency) Handle:** For skin tightening and collagen stimulation.
- **Cold Hammer:** For soothing skin, reducing redness, and shrinking pores.
- **Bio Microcurrent Handle:** For facial lifting and toning.
- **LED Facial Mask:** For light therapy treatments (e.g., red for anti-aging, blue for acne).

Setup Instructions

Follow these steps to set up your Hydrafacial Machine before its first use:

1. **Unpack:** Carefully remove all components from the packaging and inspect for any damage.
2. **Placement:** Place the main unit on a stable, flat, and dry surface, ensuring adequate ventilation.
3. **Connect Power:** Plug the power cord into the designated port on the machine and then into a suitable electrical outlet.
4. **Attach Probes:** Connect each treatment probe to its corresponding port on the main unit. Ensure connections are secure.
5. **Fill Solution Bottles:**
    - **Bottle A:** Fill with a cleansing solution (e.g., salicylic acid solution).
    - **Bottle B:** Fill with a hydrating or nourishing solution (e.g., hyaluronic acid solution).
    - **Bottle C:** This is typically the waste collection bottle. Ensure it is empty before starting a treatment.
6. **Initial Check:** Turn on the machine and perform a brief function check to ensure all components are working correctly.

Operating Instructions

This section outlines the general operation of the Vevlom 7-in-1 Hydrafacial Machine. Specific treatment protocols may vary based on desired results and skin type.

1. **Preparation:**
    - Cleanse the client's face thoroughly.
    - Ensure all solution bottles are correctly filled and connected.
    - Select the appropriate probe for the first step of the treatment.
2. **Power On:** Turn on the main power switch, usually located at the back or side of the unit. The control screen will illuminate.
3. **Select Function:** Use the touch screen or control buttons to select the desired function (e.g., Hydra-Dermabrasion, Oxygen Spray).
4. **Adjust Settings:** Adjust intensity, vacuum level, or solution flow rate as needed for the selected function. Start with lower settings and gradually increase.
5. **Perform Treatment:**
    - **Hydra-Dermabrasion:** Apply the probe to the skin, moving in gentle, even strokes. The vacuum will extract impurities while infusing solution.
    - **Oxygen Spray Gun:** Hold the gun a few inches from the skin and spray a fine mist of solution evenly across the face.
    - **Ultrasonic Scrubber:** Glide the spatula over damp skin to exfoliate or help product absorption.
    - **RF Handle:** Apply a conductive gel to the skin and move the RF handle in circular motions to generate heat.
    - **Cold Hammer:** Use after treatments to soothe skin, reduce redness, and close pores.
    - **Bio Microcurrent Handle:** Apply conductive gel and use the probes to gently lift and tone facial muscles.
    - **LED Facial Mask:** Place the mask on the client's face and select the desired light color and duration.
6. **Monitor Client:** Continuously check on the client's comfort level throughout the treatment.
7. **Post-Treatment:** After completing all desired functions, turn off the machine, disconnect probes, and clean the device as per maintenance instructions.

Maintenance

Regular cleaning and maintenance are crucial for the longevity and optimal performance of your Vevlom Hydrafacial Machine.

- **After Each Use:**
  - Empty and rinse the waste collection bottle (Bottle C).
  - Rinse all used probes and their tips with distilled water.
  - Wipe down the main unit and control panel with a soft, damp cloth. Do not use abrasive cleaners.
- **Weekly/Bi-Weekly:**
  - Perform a deeper clean of the internal tubing system by running distilled water through the machine using a cleansing cycle (if available) or by manually flushing.
  - Inspect all hoses and connections for any signs of wear or damage.
- **Storage:** Store the machine and its accessories in a clean, dry, and cool place, away from direct sunlight and extreme temperatures.
- **Solution Management:** Do not leave solutions in the bottles for extended periods. Replace solutions regularly to maintain hygiene and efficacy.

Troubleshooting

If you encounter any issues with your Vevlom Hydrafacial Machine, refer to the table below for common problems and their solutions.

Problem	Possible Cause	Solution
Machine does not power on.	Power cord not connected; power switch off; faulty outlet.	Check power cord connection; ensure power switch is on; try a different outlet.
No suction from hydra-dermabrasion handle.	Solution bottle empty; waste bottle full; clogged tip/hose; vacuum setting too low.	Refill solution bottle; empty waste bottle; clean tip/hose; increase vacuum setting.
Solution not flowing.	Solution bottle empty; hose kinked; flow setting too low.	Refill solution bottle; straighten hose; increase flow setting.
Oxygen spray gun not spraying.	Solution reservoir empty; nozzle clogged.	Refill reservoir; clean nozzle with distilled water.
Error message on screen.	System malfunction; sensor issue.	Turn off and restart the machine. If the error persists, contact customer support.

If the problem persists after attempting these solutions, please contact Vevlom customer support for further assistance.
