3. Your device will now charge wirelessly.

### **RUNNING A 12V DEVICE**

Your Jump Starter is capable of running 12V device.

### **TROUBLESHOOTING**

If the following operations are unable to troubleshoot, please stop using the jump starter and contact the stores which you bought the jump starter from.

<b>Trouble</b>	<b>Cause</b>	<b>Solution</b>
The power capacity of the device is shown in 100%, but did not fully charged in charging process	The battery shown 100% in the LCD Screen of Jump Starter on means stop charging, and this situation means it is semi-state of charge, which is conducive to long-term storage when the device is not in use for long time.	Pull out the charge plug, then reinsert.
Nothing happens when pressing the switch button	Low voltage protection of the device is started and the device can not be turned on.	Insert the charger plug into the 9V2A input port to activate.

### **WARNING!**

1. After starting your vehicle, Remove the Jump Starter as Soon as possible
2. DO NOT connect the 2 alligator clip together.
