Help and Troubleshooting

How to reset the language?
There are two ways to reset the language as shown below.

1. Find ⚙(Settings) in the home menu and confirm it by pressing button ▶|| . Select the first (upper) option and

   press button ▶|| to confirm. Scroll down and select the language you want to set.

2. Find ⚙(Settings) in the home menu, enter and scroll down to the last menu. Press button ▶|| to enter and choose the first (upper) option which means "Yes" with button ▶|| to confirm and restore to factory settings. And then the player will power on automatically and then you can choose language again.

Can't turn on the player; the screen of player goes blank/black; the player is crashed or has a firmware bug.

1. Power off the player and try again.
2. Update the firmware. Please contact our customer service or check our website at **https://www.agptek.com/blog** to download the firmware.

Can't download files from computer.

1. Please confirm whether it's connected properly;
2. Please check whether the storage space of the internal memory is full;
3. Please check whether the USB cable is damaged.

Can't recognize the player when connected to the computer via USB cable.

1. Reconnect it.
2. Restart the computer and reconnect it.
3. Connect your player to another USB port.
4. Charge the player for about 10 minutes first.

Notes On Battery Charging

1. Please use the PC USB port or a 5V/1A power adapter to charge the device.
   Note:
   A. When using the PC USB port to charge, the current output capability of the USB port of different PCs is different and the charging time will be slightly different. It is recommended that when using the PC USB port to charge, try to power off the device to
   speed up the charging.
   B. The charger and the MP3 player will heat up to a certain extent during charging, which is a normal phenomenon.
2. New battery needs to go through several charging and discharging processes to achieve the best performance.
3. Under normal circumstances, the player can be fully charged in about 3h. It is recommended to pull out from the USB port after charging, and do not connect to the power supply for a long time.
4. The battery of this device is a polymer lithium battery, which can be recharged and used.
5. The polymer lithium battery must be replaced by a professional, and the user must not replace it by himself

(Note: If the battery is replaced improperly, there will be a danger of explosion, and it can only be replaced with the same type or equivalent type of battery); in order to protect the environment, please hand over the waste batteries to a professional organization for recycling.

6. The lifespan of the battery may vary with the conditions of use and production time.
7. The battery should not be exposed to sunlight, fire or similar overheating environment.

Tips for Hearing Conservation

1. It is recommended to turn down the volume of the device before using the earphones, and gradually increase until it is suitable when you start to listen.
2. In order to protect hearing, please do not turn up the volume too high (doctors pointed out that listening at high volume for a long time will damage the listener's hearing).
3. When tinnitus occurs, please lower the volume or stop using it.

Caution

1. Before formatting the device, it is recommended to back up the personal data stored in it in time.
2. Ensure that the product is placed safely to avoid accidents and drops caused by children touching.
3. Do not overvoltage, strain the power cord, bend it or be squeezed by heavy objects, so as not to cause overheating or fire.
4. Please keep the product away from the electromagnetic environment; keep away from excessive humidity, smoke and dust and other harsh environments.
5. Do not immerse the device in water; do not use any corrosive or abrasive cleaners to clean it.
6. Do not expose the product to moisture or rain, it may cause the device to malfunction or even be difficult to repair due to the penetration of water and moisture.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.
These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and

2. this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
