Certificate of conformity

This product has been inspected by our quality control department Performance parameters in line with technical standards, authorized to leave the factory.

Compliance Guidelines

1. Do not operate the device in a way that may cause harmful interference to other devices.
2. Ensure that the device accepts any interference it receives, even if it leads to undesired operation.

Modifications

Any changes or modifications to the device that are not expressly approved by the responsible party for compliance are not recommended. Unauthorized modifications could void the user's authority to operate the equipment.

FCC Statment

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, under part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used by the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.

FAQs

Q: What should I do if I encounter interference issues with the device?
