PITIKI 61INX18.9IN

PITIKI Chair Cushion Instruction Manual

Model: 61INX18.9IN

Introduction

This manual provides instructions for the proper use and care of your PITIKI Chair Cushion. Designed for comfort and durability, this cushion is suitable for various chairs, including rocking chairs, desk chairs, dining chairs, and kitchen chairs.
The cushion features high-resilience polyester fiber wadding for comfortable support and a fabric dyed for fade resistance. The back cushion includes ties, and the seat cushion has a non-slip backing to ensure it stays securely in place.

Setup

To properly install your PITIKI Chair Cushion:

1. **Unpack:** Carefully remove the cushion from its packaging. Note that the cushion may appear compressed due to one-time packaging. It will regain its original shape after washing and drying, or with use.
2. **Position the Seat Cushion:** Place the seat portion of the cushion onto your chair. Ensure the non-slip backing is in direct contact with the chair surface to prevent movement.
3. **Secure the Back Cushion:** If your cushion includes a back portion, position it against the chair back. Utilize the attached ties to secure the back cushion firmly to the chair frame. Tie them securely to prevent slipping.

Operating Instructions

Your PITIKI Chair Cushion is designed for comfort and versatility:

- **Comfort:** The high-resilience polyester fiber wadding provides comfortable support and quickly regains its shape after use.
- **Reversible Design:** For extended life and even wear, the cushion can be used reversibly on both sides.

Maintenance

To ensure the longevity and cleanliness of your PITIKI Chair Cushion, follow these care instructions:

- **Washing:** The cushion is machine washable. Use cold water on a normal cycle.
- **Drying:** Tumble dry on a low heat setting, normal cycle. Do not use high heat.
- **Bleaching & Ironing:** Do not bleach or iron the cushion.
- **Restoration:** If the cushion appears compressed after unpacking, washing and drying will help it fully restore its original shape and fluffiness.

Troubleshooting

This section addresses common concerns regarding your chair cushion.

Problem	Solution
Cushion appears flat or compressed.	This is normal due to packaging. Wash and tumble dry the cushion according to maintenance instructions to help it regain its original shape and fluffiness.
Cushion slides off the chair.	Ensure the back cushion ties are securely fastened to the chair frame. For the seat cushion, verify that the non-slip backing is directly on the chair surface and not obstructed.
