Braun 9590cc

Braun Series 9 Pro+ Electric Shaver

User Manual

Product Overview

The Braun Series 9 Pro+ is a premium 2-in-1 electric shaving system designed for an exceptionally close shave with ultimate skin comfort. It features the best shaving head from Braun with 5 synchronized shaving elements, ensuring a smooth experience even on longer beards. This model includes a unique ProComfort shaving preparation attachment and a comprehensive 6-in-1 cleaning station for daily maintenance.

This image displays the Braun Series 9 Pro+ electric shaver, its ProComfort attachment, and the 6-in-1 cleaning station. The shaver is black with silver accents, featuring a digital display. The cleaning station is a compact black unit. A 'Made in Germany' tag is visible, highlighting the product's origin and quality.

- **Effortless shaving preparation:** ProComfort attachment straightens and massages hair using micro-vibrations.
- **Smooth shave:** 5 synchronized shaving elements for a close and comfortable shave.
- **Durable design:** Made entirely in Germany, 100% waterproof, with a powerful Li-ion battery.
- **Convenient cleaning:** 6-in-1 cleaning station cleans, dries, and charges the shaver.

Safety Information

Please read all safety instructions carefully before using the Braun Series 9 Pro+ Electric Shaver.

- Always hold the shaver away from your face while turning it on or off.
- Be careful when using the shaver near water. Although it is waterproof, ensure it is completely dry before charging.
- Thoroughly clean and dry the shaver after each use to prevent bacterial growth and ensure optimal performance.

- Always supervise children when using the shaver.

Setup

Follow these steps for initial setup and charging:

1. **Unboxing:** Carefully remove all components from the packaging: the electric shaver, ProComfort attachment, 6-in-1 cleaning station with cleaning cartridge, travel case, charging cable, and cleaning brush.
2. **Initial Charge:** Place the shaver in the 6-in-1 cleaning station. Connect the cleaning station to a power outlet using the provided charging cable. Allow the shaver to fully charge before first use. A full charge provides approximately 60 minutes of runtime.
3. **Cleaning Cartridge:** Insert the cleaning cartridge into the cleaning station as per the station's instructions.

Operating Instructions

The Braun Series 9 Pro+ can be used for both dry and wet shaving.

1. **Preparation (Optional):** For optimal results, especially with longer or flat-lying hairs, attach the ProComfort attachment to the shaver head. Turn on the shaver and gently move the ProComfort attachment over your beard area to straighten and lift the hairs.
2. **Shaving:** Turn on the shaver. Hold the shaver at a right angle (90 degrees) to your skin and shave against the direction of hair growth. Apply gentle pressure. The flexible head adapts to your facial contours.
3. **Wet Shaving:** For a refreshing shave, you can use the shaver with foam or gel. Apply your preferred shaving product to your face before shaving.
4. **ProTrimmer Use:** Utilize the integrated ProTrimmer for precise styling of sideburns or longer hairs. Slide the trimmer up to engage.

Maintenance and Cleaning

Regular cleaning ensures optimal performance and hygiene of your shaver.

- **Daily Cleaning with Cleaning Station:** After each shave, place the shaver in the 6-in-1 cleaning station. Press the start button on the station to initiate the cleaning, drying, and charging cycle. This process keeps your shaver hygienic and ready for the next use.
- **Manual Cleaning (if needed):** If the cleaning station is not available, or for quick rinsing, detach the shaver head and rinse it thoroughly under warm running water. You can use the provided cleaning brush to remove any stubborn hair particles. Ensure the shaver is completely dry before storing or charging.
- **Cleaning Cartridge Replacement:** Replace the cleaning cartridge in the cleaning station approximately every 3 months, or when the indicator light on the station signals replacement.
- **Shaver Head Replacement:** For continued optimal shaving performance, it is recommended to replace the shaver head (cassette) approximately every 18 months.

Troubleshooting

If you encounter any issues with your Braun Series 9 Pro+ shaver, refer to the following common solutions:

Shaver not turning on or low power:

Ensure the shaver is fully charged. Place it in the cleaning station or connect directly to the charging cable. If the battery drains quickly, ensure it is charging correctly and consider the age of the battery if it's an older unit.

Poor shaving performance or irritation:

Poor shaving performance or irritation:

Clean the shaver head thoroughly. Hair and debris can accumulate and reduce efficiency. Ensure the shaver head is not damaged and consider replacing it if it's older than 18 months. For irritation, ensure you are using the ProComfort attachment for preparation and shaving against the grain with gentle pressure. Try wet shaving with foam or gel.

Cleaning station not functioning:

Check if the cleaning cartridge is correctly inserted and contains enough cleaning fluid. Ensure the station is properly connected to power. Refer to the cleaning station's specific manual for detailed troubleshooting.

If problems persist, please contact Braun customer support.
