Wipkviey T6

Wipkviey T6 Drone Replacement Kit User Manual

Comprehensive instructions for installation, operation, and maintenance of your Wipkviey T6 drone accessories.

Introduction

This manual provides detailed instructions for the Wipkviey T6 Drone Replacement Kit. The kit includes essential components such as propeller guards, replacement blades, a screwdriver, a rechargeable lithium battery, and a charging cable, designed to maintain and enhance your drone's performance.

Image 1: Overview of the Wipkviey T6 Drone Replacement Kit components.

Setup and Installation

Follow these steps to correctly install the replacement parts on your drone.

1. Propeller Guard Installation

1. Identify the four propeller guards. Each guard is designed to fit a specific motor arm.
2. Carefully align each propeller guard with the corresponding drone arm.
3. Gently snap or secure the guards into place. Ensure they are firmly attached and do not obstruct propeller movement.

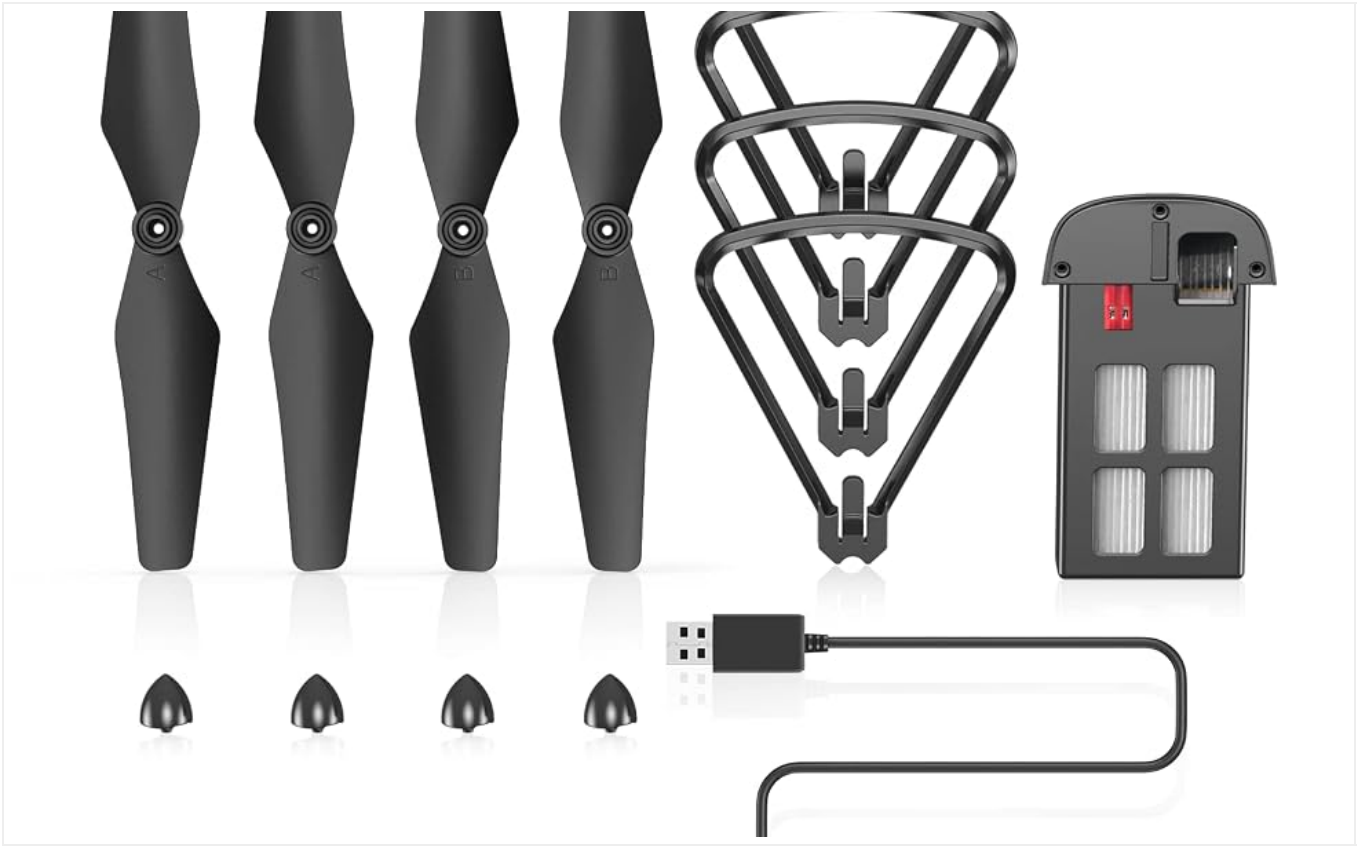

Image 2: Detailed view of propeller guards and blades.

2. Replacement Blade Installation

1. Before replacing blades, ensure the drone is powered off and the battery is removed.
2. Using the provided screwdriver, carefully remove the screw securing the old blade to the motor.
3. Remove the old blade. Note the orientation and type (A or B) of the blade.
4. Select the correct replacement blade (A or B) matching the motor.
5. Place the new blade onto the motor shaft, aligning the screw hole.
6. Secure the new blade with a screw using the screwdriver. Do not overtighten.
7. Repeat for all blades requiring replacement.

3. Battery Installation

1. Locate the battery compartment on your drone.
2. Insert the 3.7V 600mAh modular lithium battery into the compartment, ensuring the connectors align correctly.
3. Gently push the battery until it clicks into place or is securely seated.

Operating Instructions

Battery Charging

To ensure optimal performance and battery longevity, follow these charging guidelines:

- Connect the provided charging cable to the battery.
- Plug the other end of the charging cable into a suitable USB power source (e.g., computer USB port, USB wall adapter).
- The battery has a capacity of 3.7V / 600mAh. The approximate charging time is 40 minutes.
- **Charging Indicator:** When the LED on the charging cable or battery is continuously lit, the battery is charging. If the LED is

off, the battery is fully charged.

- Once fully charged, disconnect the battery from the charging cable and power source.

A fully charged battery provides approximately 10 minutes of operating time for the drone.

Maintenance

Regular maintenance helps prolong the life of your drone accessories.

- **Cleaning:** Periodically clean propeller guards and blades with a soft, dry cloth to remove dust and debris.
- **Inspection:** Before each flight, inspect propeller blades for any cracks, bends, or damage. Replace damaged blades immediately. Check propeller guards for secure attachment and integrity.
- **Battery Care:** Store the battery in a cool, dry place away from direct sunlight and extreme temperatures. Do not overcharge or completely discharge the battery.

Troubleshooting

This section addresses common issues you might encounter.

- **Drone not flying stably after blade replacement:** Ensure all blades are installed correctly according to their A/B markings and are securely fastened. Check for any bent blades.
- **Battery not charging:** Verify that the charging cable is properly connected to both the battery and the USB power source. Ensure the USB power source is active. Check the charging indicator LED.
- **Propeller guard loose:** Re-attach the propeller guard firmly to the drone arm. If it repeatedly comes loose, inspect for damage to the guard or the drone's attachment points.

Specifications

Product Name	Wipkviey T6 Drone Replacement Kit
Model Number	T6 (Manufacturer Reference: 001)
Kit Contents	4 Propeller Guards, 4 Replacement Blades, 1 Screwdriver, 1 Rechargeable Lithium Battery, 1 Charging Cable
Battery Type	Modular Lithium-ion
Battery Capacity	3.7V / 600mAh
Charging Time	Approximately 40 minutes
Operating Time (per battery)	Approximately 10 minutes
Material	Acrylonitrile Butadiene Styrene (ABS)
Item Weight	28 Grams (total kit)

Customer Support

For any issues or questions regarding your Wipkviey T6 Drone Replacement Kit, Wipkviey customer service is available online 24 hours a day to assist you promptly.
