Reobiux Q26

Reobiux Indoor Camera Q26 User Manual

Model: Q26

Introduction

Thank you for choosing the Reobiux Q26 Indoor Camera. This manual provides detailed instructions for setting up, operating, and maintaining your camera to ensure optimal performance and security for your home, pets, baby, or elders. Please read this manual thoroughly before use and keep it for future reference.

What's in the Box

Upon opening the package, please verify that all components are present and in good condition:

- Reobiux Q26 Indoor Camera(s)
- Power Adapter(s)
- Mounting Accessories (screws, wall anchors)
- User Manual (this document)

Figure 2: Key features of the Reobiux Q26 Indoor Camera, including 2K resolution, two-way audio, 2.4GHz WiFi only, push notifications, 24/7 recording, motion detection, SD card/cloud storage, and infrared/full-color night vision.

Setup Guide

1. **Download the App:** Search for "Tris Home APP" on the Google Play Store or Apple App Store and download it to your smartphone.
2. **Power On:** Connect the camera to a power source using the provided power adapter. The camera will power on automatically.
3. **Network Pairing:** Open the Tris Home APP and follow the on-screen instructions to add your camera. The app facilitates easy network pairing without the need for scanning. Ensure your Wi-Fi network is 2.4GHz, as the camera does not support 5GHz Wi-Fi.
4. **Mounting (Optional):** The camera can be placed on a flat surface or mounted to a wall using the included mounting accessories.

Figure 3: The Reobiux Q26 camera is compatible with Amazon Alexa and the Tris Home App, available on Google Play and the App Store.

Operating Instructions

Live Viewing and Recording

Access live video feeds from your camera anytime, anywhere through the Tris Home APP. The camera provides 1080P Full HD resolution for clear viewing. You can also record video clips and save them within the app or to an optional SD card (not included) or cloud storage (subscription may be required).

Figure 4: The camera offers 1080P resolution and 4X digital zoom for clear, detailed viewing.

Figure 5: Monitor your home in real-time from your smartphone, with options for live viewing, history, and cloud storage.

Two-Way Audio

The built-in noise-cancelling microphone and speaker allow for clear two-way communication. You can speak through the app to interact with family members or pets in the camera's vicinity.

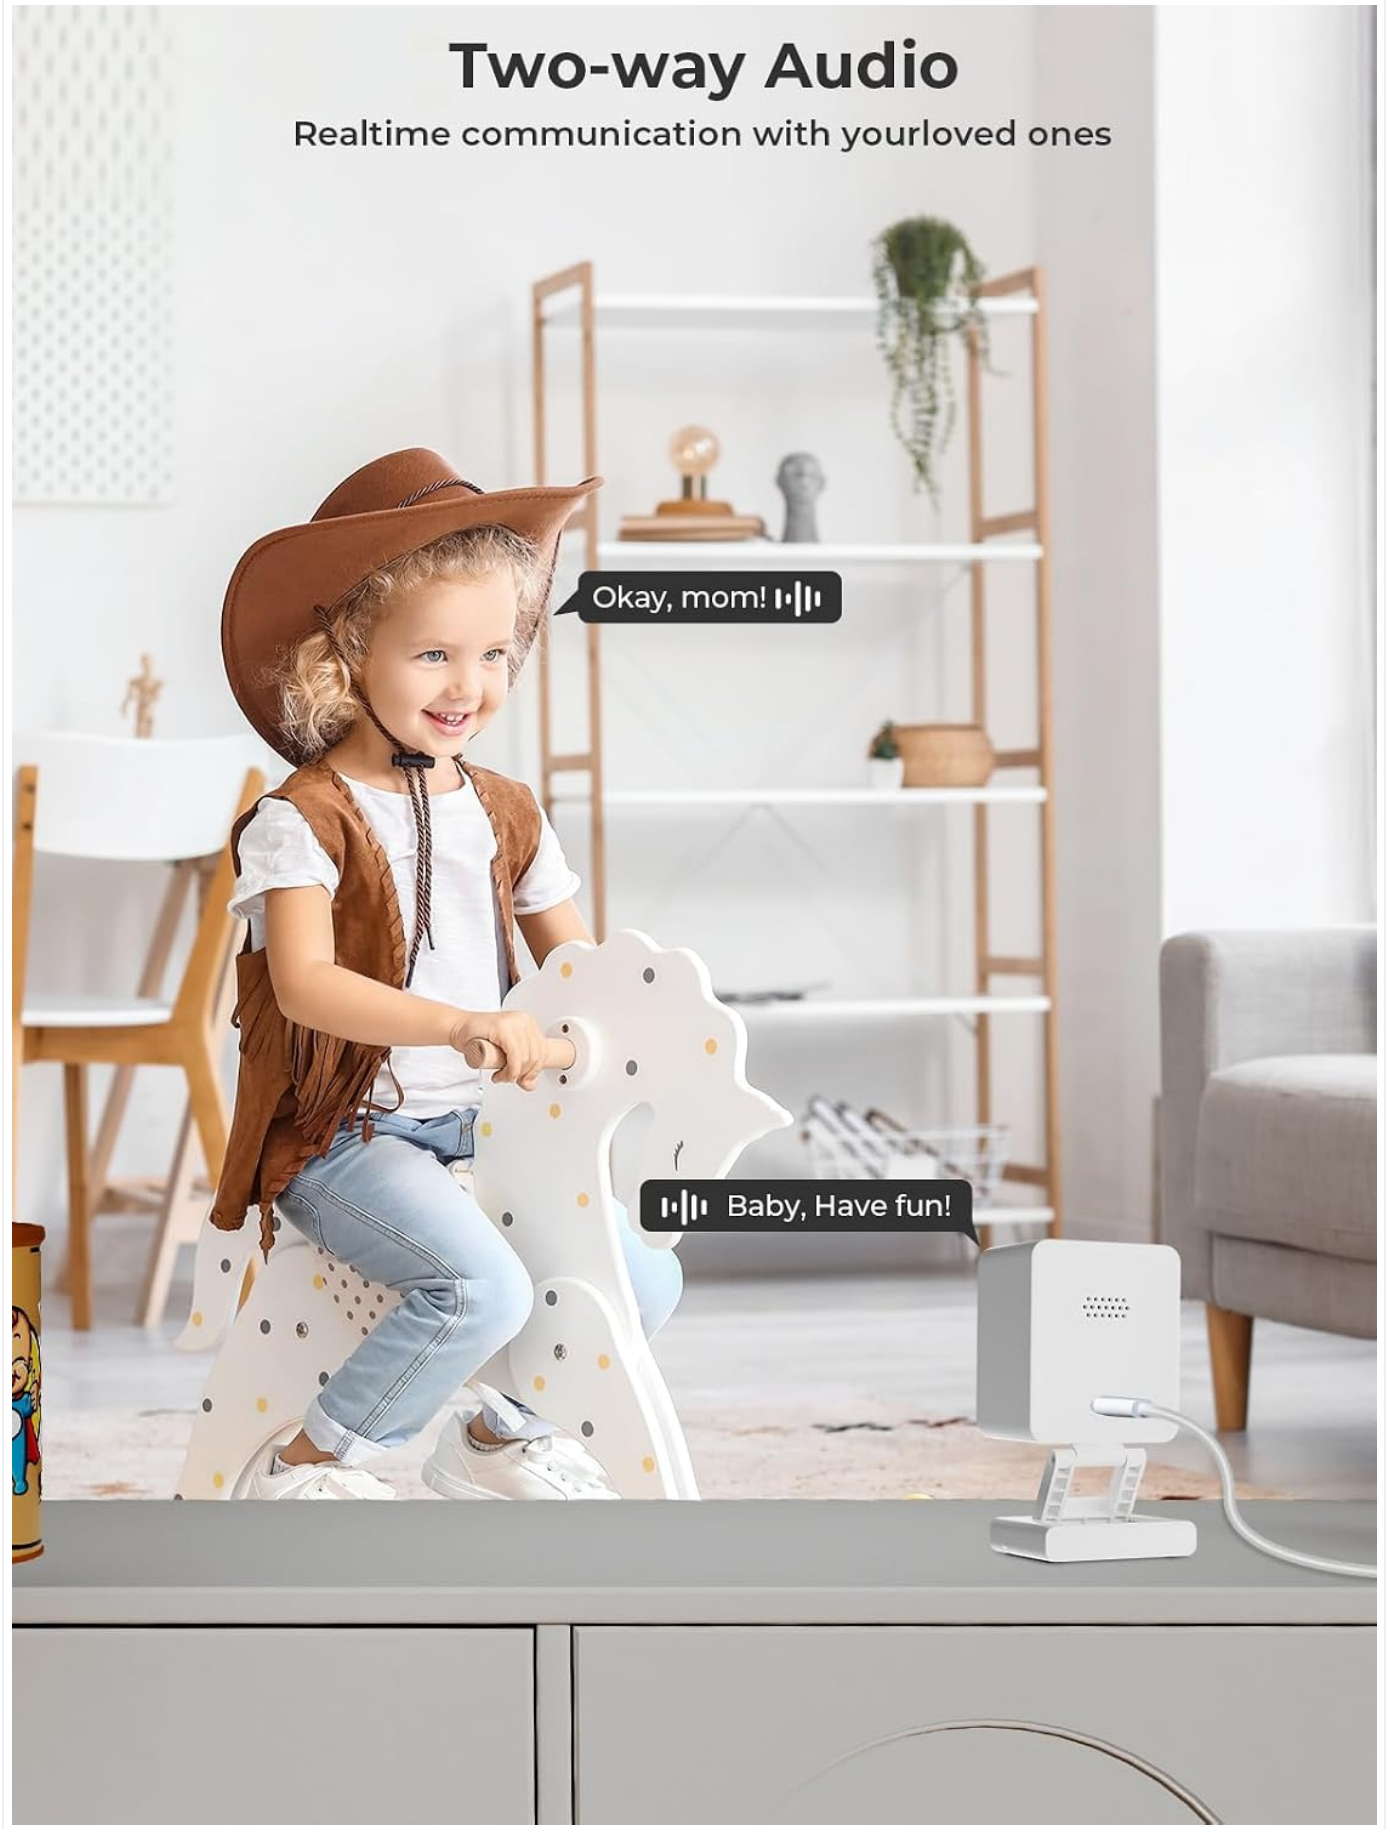

Figure 6: Engage in real-time communication with loved ones using the camera's two-way audio feature.

Your browser does not support the video tag.

Video 1: Demonstrates the two-way audio feature, allowing users to communicate with pets or family members through the camera.

Motion Detection and Alerts

The camera features real-time motion detection. When motion is detected, you will receive instant notifications on your phone, and a 10-second video clip will be recorded and saved in the app. You can customize detection areas and sensitivity levels (medium/low/high) to reduce false alarms. The camera also includes an intelligent siren and spotlight that can be activated upon motion detection.

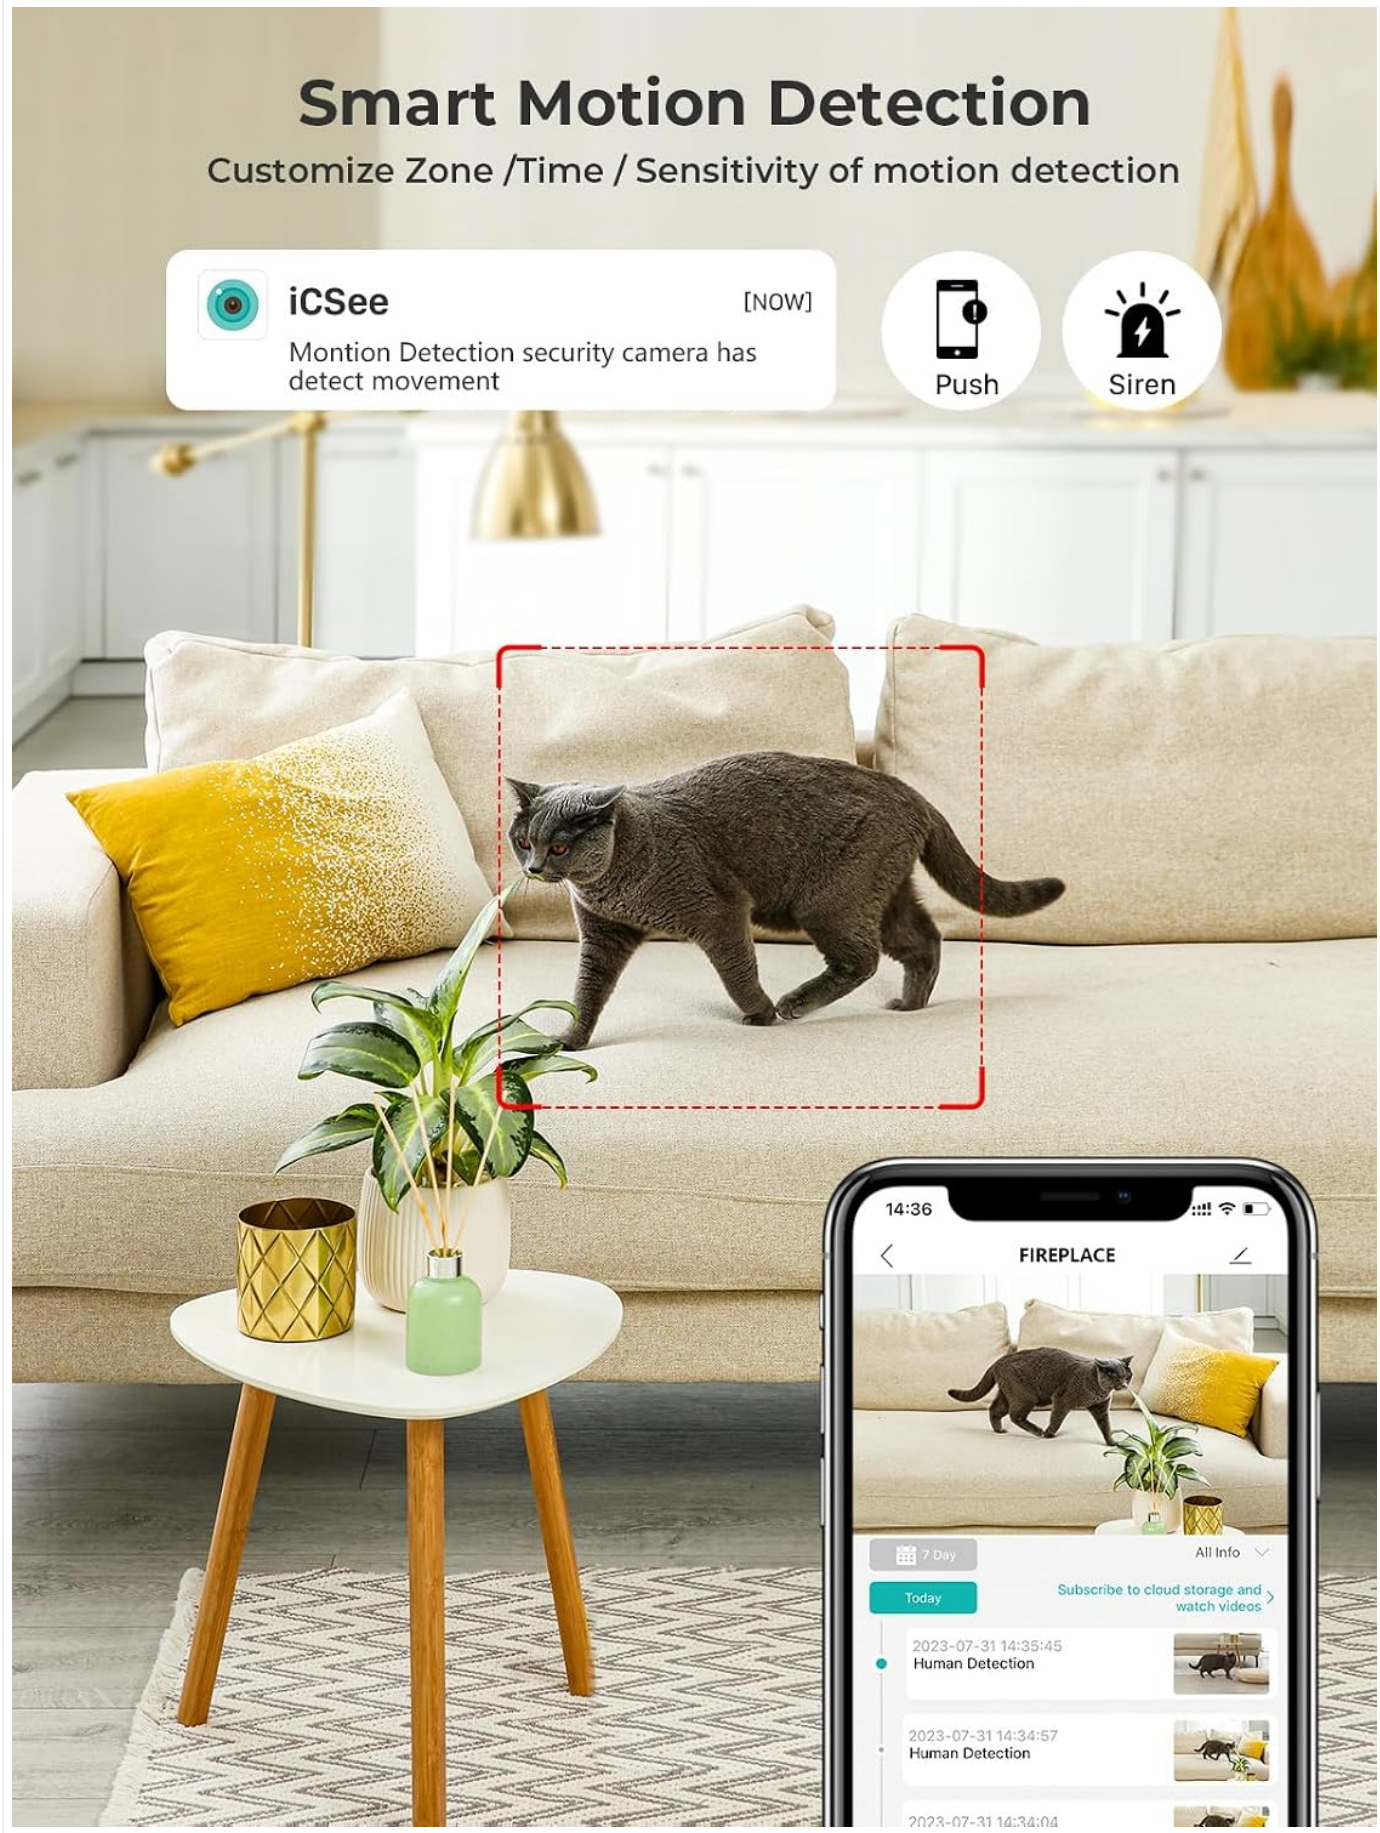

Figure 7: Smart motion detection allows for customizable zones, times, and sensitivity to minimize false alerts.

Figure 8: Configure specific detection areas and set alarm schedules to suit your monitoring needs.

Night Vision Modes

The camera offers advanced night vision with a range of up to 33 feet (10 meters). It supports three distinct light modes:

- **Infrared Mode:** Standard black and white night vision.
- **Colorful Mode:** Provides full-color night vision in low-light conditions.
- **Dual-Light Mode:** Combines infrared and spotlight. The spotlight activates automatically upon motion detection and turns off after 10 seconds, providing temporary color vision and acting as a deterrent.

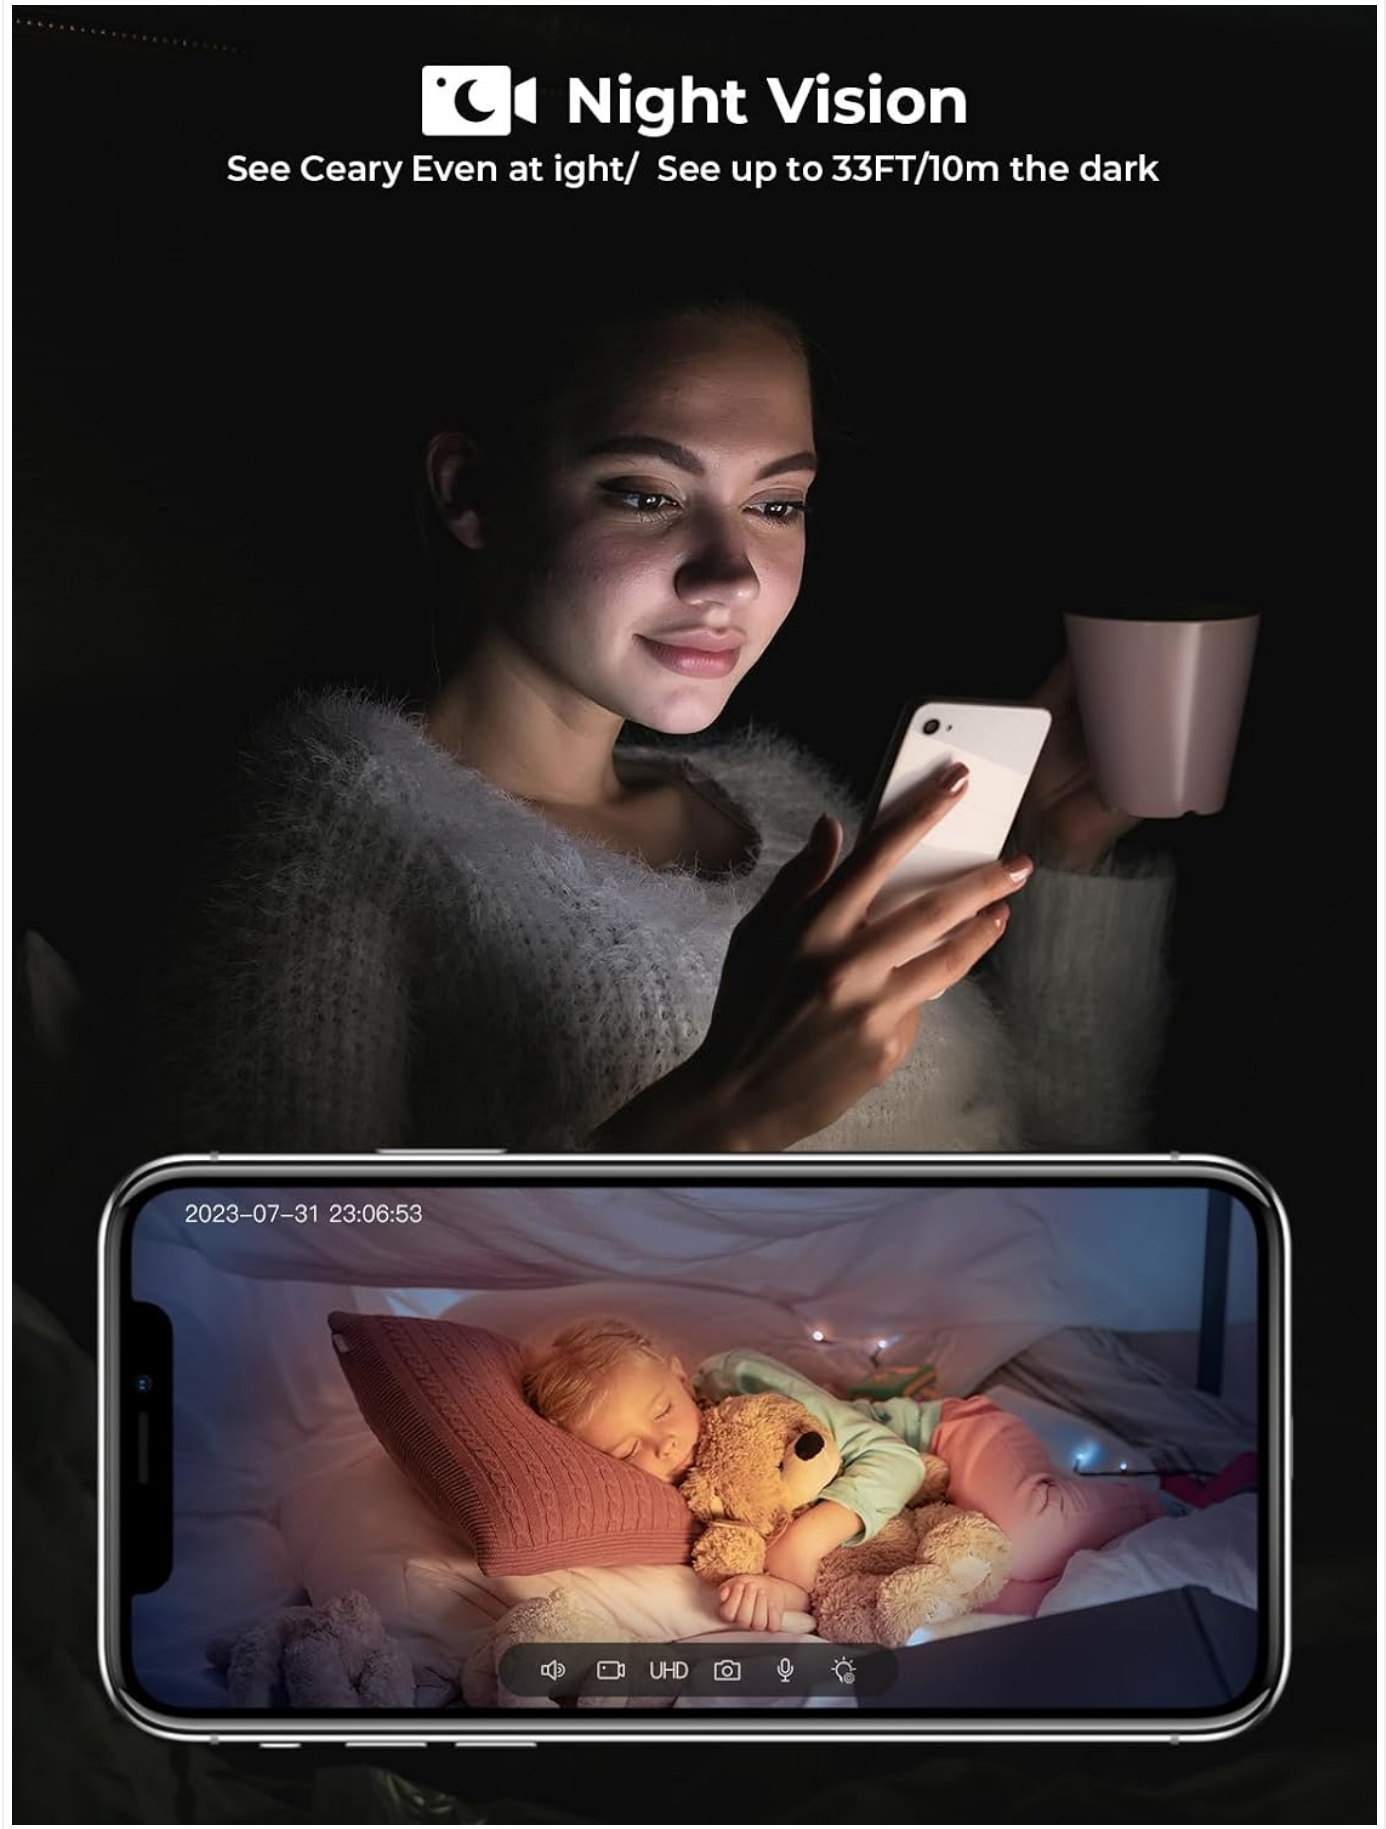

Figure 9: Monitor your baby or pets clearly even in complete darkness with advanced night vision capabilities.

Alexa Compatibility

The Reobiux Q26 camera is fully compatible with Amazon Alexa. You can use voice commands to view live feeds on your Alexa-enabled devices, such as an Echo Show.

Figure 10: Seamlessly integrate your camera with Amazon Alexa for convenient voice control and viewing.

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Avoid using liquid cleaners or aerosols.

- **Firmware Updates:** Regularly check the Tris Home APP for available firmware updates to ensure your camera has the latest features and security enhancements.
- **Network Stability:** Ensure your Wi-Fi network is stable and strong for uninterrupted camera performance.
- **Power Supply:** Always use the original power adapter provided with the camera.

Troubleshooting

Problem	Possible Solution
Camera offline	Check power connection. Verify Wi-Fi signal strength. Restart the camera and your Wi-Fi router. Ensure the camera is connected to a 2.4GHz Wi-Fi network.
No motion detection alerts	Check app notification settings. Adjust motion detection sensitivity in the app. Verify detection area settings. Ensure the camera's view is not obstructed.
Poor video quality	Ensure stable internet connection. Clean the camera lens. Check app settings for video resolution.
Two-way audio issues	Check microphone and speaker permissions in your phone's app settings. Ensure there is no excessive background noise.

For further assistance, please refer to the in-app support or contact customer service.
