Setup Guide

1. Connecting Your Monitor

The ARZOPA portable monitor offers flexible connectivity options for various devices.

USB-C Connection (Full-function)

For devices with a full-function USB-C port (supporting both video and power delivery), simply connect the included USB-C to USB-C cable from your device to either USB-C port on the monitor. The monitor will draw power and receive video signal through this single cable.

Mini HDMI Connection

For devices using HDMI, connect the included Mini HDMI to HDMI cable from your device to the Mini HDMI port on the monitor. Note that HDMI only transfers video signal. You will need to power the monitor separately using the USB-C to USB-C cable connected to a power source (e.g., a wall adapter or another USB-C port on your device

that provides power).
