AIRZONE DFCIPx Circular Diffuser with Plenum

Product Information: DFCIPx Circular Airzone Diffuser with Plenum

The DFCIPx Circular Airzone Diffuser with Plenum is a circular diffuser that facilitates airflow supply in 4 directions. It comes with a plenum made from galvanized steel with mechanical airflow regulation and a lateral connection for a circular duct. The product is available in different sizes with varying dimensions of L (mm), H (mm), X (mm), Y (mm), and E (mm).

Product Usage Instructions:

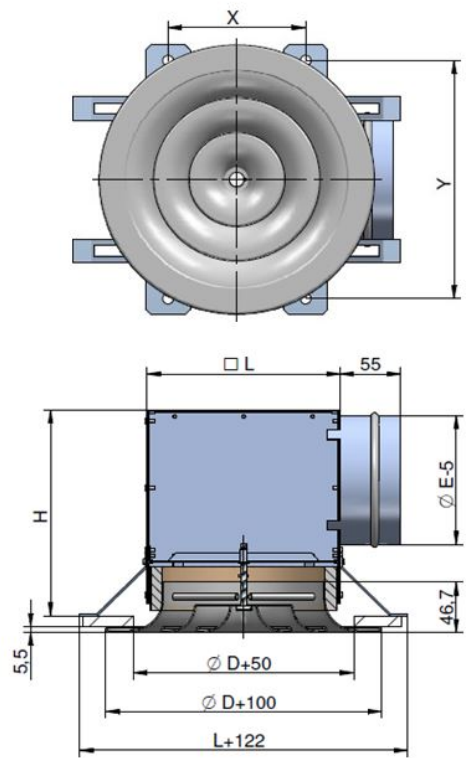

1. Unfold the fixing tabs.
2. Insert the threaded rod, fix it, and tighten it with a nut.
3. Fix the diffuser to the plenum using the screw provided.
4. Adjust the opening to adapt the air output to your needs.

Note: The product should be installed by a professional technician.

AIRZONE CIRCULAR DIFFUSER WITH PLENUM

DFCI circular diffuser which facilitates airflow supply in 4 directions. Plenum made from galvanized steel with mechanical airflow regulation. Lateral connection for circular duct.
