DRPL30B Fester Rotational Diffuser

Product Information: FLOWTOOL

The FLOWTOOL is a square swirl diffuser designed for turbulent air supply. It is integrated into a plate to facilitate installation in a modular ceiling. The diffuser does not require fixing as it is supported on the ceiling grid. It is available in different sizes including 12, 16, 20, 30, 36 and 48 inches. The product is available in multiple languages including English, Spanish, Portuguese, French, Italian and German. It is designed for installation in modular ceilings and does not require additional fixing.

Product Usage Instructions

1. Determine the size of the FLOWTOOL required for your installation.
2. Ensure that your modular ceiling has a ceiling grid to support the FLOWTOOL.
3. Place the FLOWTOOL onto the ceiling grid. It does not require any additional fixing.
4. Connect the FLOWTOOL to your air supply system using appropriate connectors.
5. Turn on your air supply system and adjust the air flow as required.
6. Regularly check and clean the FLOWTOOL to ensure optimal performance.

Note: Refer to the product code examples in the user manual to select the appropriate product variant for your installation.

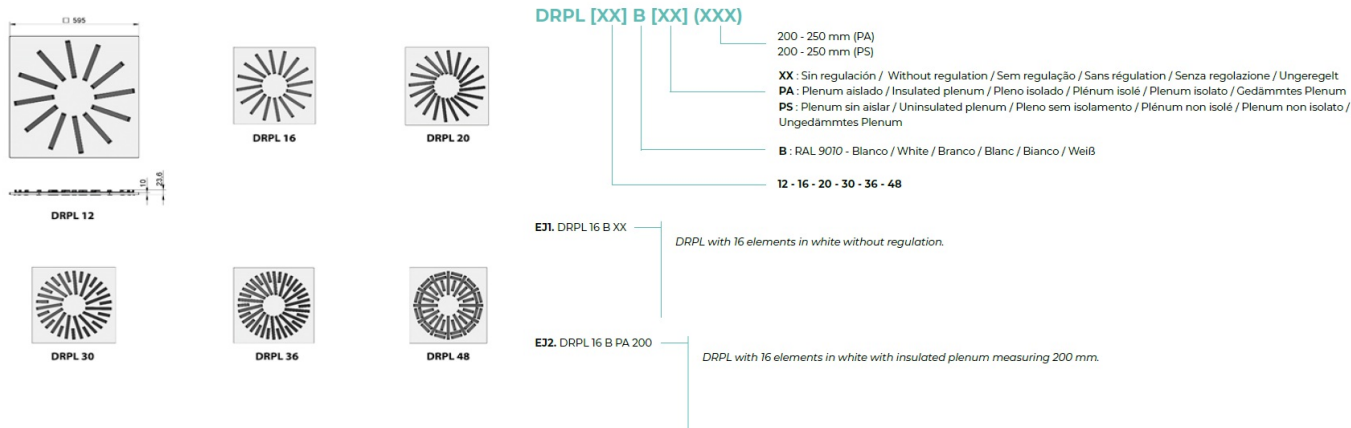

FLOWTOOL

Visit [Flowtool](#) to calculate/select your installation.

SWIRL DIFFUSER FOR MODULAR CEILING

DRPL square swirl diffuser integrated in a plate to facilitate turbulent air supply. Designed for installation in a modular ceiling. Does not require fixing as it is supported on the ceiling grid.
