Item Model Number	OSGL001
Batteries	1 AA batteries required
Power Source	Solar Powered
Luminous Flux	500 Lux
Coverage	5 meters
Battery Cell Type	Lithium
Average Battery Life	50,000 hours
Warranty Description	1 year
Date First Available	June 8, 2020

WHAT’S IN THE BOX

- Solar Stake Light
- User Manual

PRODUCT OVERVIEW

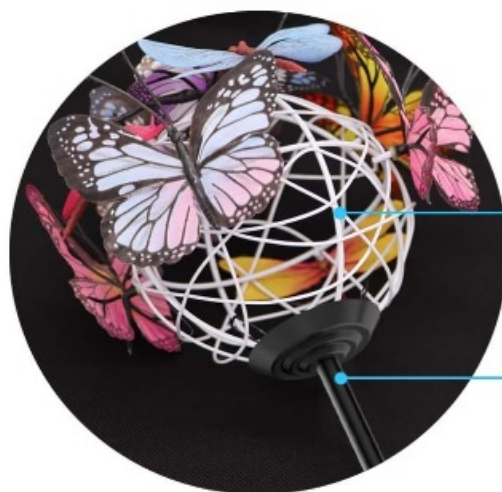

FEATURES

- **Powered by Solar Energy:** The lights come with rechargeable batteries already installed, so you won't have to worry about running wires or plugging them into an outlet.
- The light fixtures are designed to charge automatically when exposed to sunshine, so they are always ready to use when the battery is fully charged.
- **Green Lights:** Depending on the sunshine they receive throughout the day, the solar lights can keep on shining for 6-8 hours after being fully charged.
- Butterfly lights with seven separate color themes provide a colorful and animated light show that will liven up any outdoor area, whether it's a garden or a park.
- **Stylish and Original Butterfly and Dragonfly Stakes:** Each stake features a trio of dragonflies and six butterflies crafted from polyester fabric in a variety of colors that evoke the natural beauty of insects.
- Made from high-quality, fade-resistant polyester fabric, these butterflies will retain their vivid colors for years to come.

High Quality Material

Like-alive total 12 Butterflies and 6 Dragonflies

With Polyester Fabric Material(Not Easy to Fade)

Dandelion iron ball

Compression resistant and no deformation.

2.5mm Thick Ground Insertion

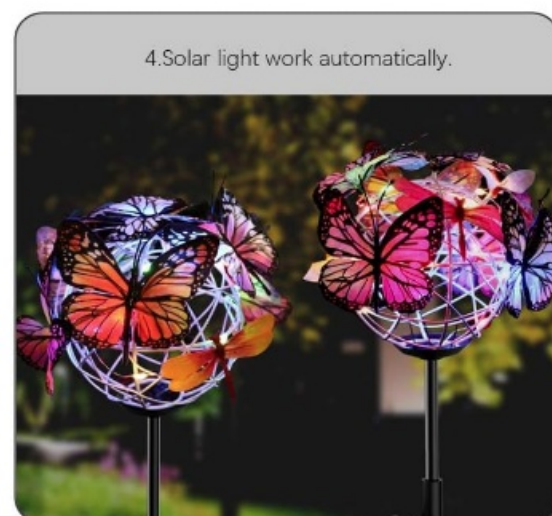

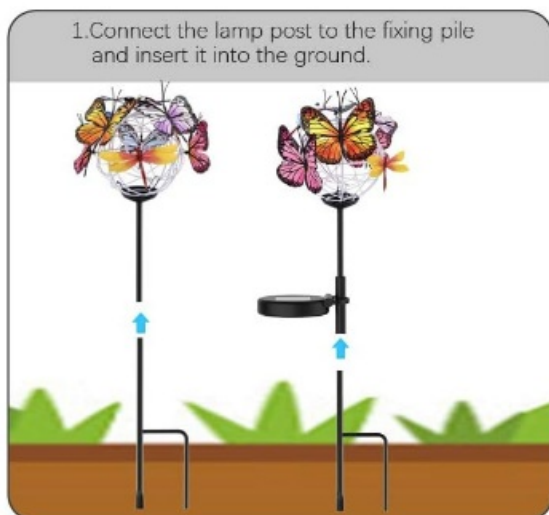

Antirust metal material with anti-corrosion and anti-oxidation paint.

- **Dandelion Iron Balls with a Compression-Resistant Design:** These balls will keep the fixture from deforming and will last a long time because of their design.
- The ground insertion poles are constructed from rust-resistant metal and painted with anti-oxidation and anti-corrosion finishes to ensure their durability.
- The solar garden lights have an easy-to-follow installation procedure. Simply drive the stake into the ground; no tools are needed for installation.
- The lights are ideal for usage outside due to their waterproof design, which has an IP65 classification and allows them to resist rain and other severe weather conditions.
- The lights' 1.2-volt power source is both energy-efficient and suitable for usage in outdoor settings, making them ideal for conservation efforts.
- **Durable Battery:** The solar-powered lights are equipped with a top-notch lithium battery that is designed to endure for an average of 50,000 hours, guaranteeing reliability and durability.
- These solar stake lights are perfect for a variety of outdoor spaces, including gardens, flowerbeds, walks, and cemeteries, where they cast a lovely, multicolored glow.
- Perfect for the green thumb on your holiday shopping list, these solar butterfly lights are sure to be a hit with any gardener on your list.
- These lights are compact and lightweight, measuring only 12.5 ounces and measuring 3 by 5 by 5 inches. They are also easy to store and travel.

SETUP GUIDE

- **Take it out of the box:** Make sure you get every item of the butterfly solar stake lights before carefully taking them out of the packing. This includes the stakes, butterflies, dragonflies, and poles.
- After making sure the polarity is correct, insert the supplied AA lithium battery into the light fixture's specified battery compartment.

How to use

- For best charging results, place the solar panel so that it receives direct sunshine throughout the day.
- Be remember to flip the switch to the "ON" position to enable the solar charging and lighting feature before placing the lights outdoors.
- For optimal light charging, choose a spot that receives continuous sunshine throughout the day.
- To set up the light fixture, make sure the metal pole is stable and insert the stake into the ground. Push the stake down firmly.
- To get the most out of the sun all day long, you should align the solar panel so that it faces upward.

- **Arrange the Lights as You Like:** To make a stunning illuminated display in your garden, set the butterfly posts along pathways or close to flowerbeds.
- To make sure the batteries are fully charged, let the lights charge in the sun for at least 8 hours before using them for the first time.
- Turn on the lights at night after a full day of charging to make sure they're functioning properly.
- Check the 7-color themes working properly by watching the lights at night while testing the color-changing LEDs.
- If the stakes are sagging or about to go over, put them in place with extra support and set the lights up.
- **Get the Lights Where You Want Them:** Get the lights where you want them so they cast the light you want and look their best as decor.
- If you have bought more units, you may install them all at once to make your garden or outdoor area look nice. Just follow the same installation methods each time.
- **Indulge in the Show:** After everything is in place and adjusted, sit back and marvel at the enchanting effect that the multi-colored butterfly lights will have on your outside space.

CARE & MAINTENANCE

- It is imperative that you always put the switch to the "OFF" position before cleaning or servicing the solar lights.
- **Maintaining an Effective Solar Charging System:** On a regular basis, use a gentle cloth to wipe the solar

panel clean of dust and debris.

- **Dust the Fabric Butterflies and Dragonflies:** To keep them looking nice and prevent dirt from getting on them, gently dust them with a microfiber towel.
- **Check the Battery:** Make sure to inspect the battery for any indications of wear and degradation on a regular basis. If the battery stops holding a charge, you should get a new one.
- **Inspect for Physical Damage:** Look for signs of physical damage, such as broken stakes or cracked glass, on the solar lights. As needed, replace broken components.
- If you must clean the metal or fabric components of the light fixture, do it with gentle soap and water rather than harsh chemicals. To keep the materials in good condition, stay away from strong chemicals.
- **Winter Storage:** To avoid freezing and damage from severe weather, it is recommended to bring the lights within during the winter months in colder climates.
- Remember to replace the batteries as needed because rechargeable lithium batteries can lose some of their effectiveness over time. When the lights cease charging or the battery life decreases, it's time to replace the batteries.
- Inspect the metal parts for rust and corrosion by looking for telltale symptoms. Remove any rust and, if required, coat with a protective covering.
- If the lights aren't getting enough light to charge, try moving them to a spot where they'll get the most sunshine at all times of day.
- In order to keep the lights in their proper places and give them a professional appearance, it is important to keep the stakes straight in the ground.
- **Keep the Fabric in Good Condition:** Protect the design of the butterflies by keeping the polyester fabric from getting tangled in dirt or being stretched too thin.
- If the lights aren't working, you can find out what's wrong by inspecting the battery, switch, and wiring for signs of damage.
- After dark, check the lights frequently to make sure they continue to work as intended by turning them on and off.

TROUBLESHOOTING

Issue	Solution
Light doesn't turn on	Ensure the solar panel is positioned to receive sunlight.
Dull or dim light	Clean the solar panel and ensure it's not obstructed by dirt.
Short battery life	Replace the AA lithium battery if it no longer holds charge.
Light flickering	Check the wiring for loose connections or corrosion.
Solar panel not charging	Make sure the panel gets direct sunlight during the day.
Not enough brightness	Move the light to a sunnier spot for better solar charging.
No light at night	Ensure the light is turned on and that it's fully charged.
Light not staying on	Ensure the light switch is set to the "on" position.
Water leakage	Verify that the light is properly sealed to prevent rainwater intrusion.
Broken or cracked stake	Inspect the stake for damage and replace if necessary.

PROS & CONS

Pros:

- Solar-powered for eco-friendly and cost-effective operation.
- The colorful butterfly design adds a charming touch to any outdoor area.
- 500 Lux luminous flux offers bright, clear lighting.
- 50,000-hour battery life ensures long-lasting illumination.
- Easy installation with no wiring required.

Cons:

- Limited 5-meter coverage, may not be ideal for larger spaces.
- Battery performance may degrade over time, requiring replacement.
- Weather-dependent as it relies on solar power for charging.
- May require regular cleaning to maintain optimal brightness.
- AA battery replacement may be needed after extended use.

WARRANTY

The Aiscool OSGL001 Butterfly Solar Stake Light comes with a **1-year warranty** from the date of purchase. The warranty covers any manufacturing defects or issues that arise under normal use. However, damages caused by improper installation, misuse, or harsh weather conditions are not covered under the warranty. If you experience any issues with the product, you can contact the manufacturer for support or a replacement. Be sure to retain your proof of purchase to qualify for the warranty.
