PKPOWER AC Power Cord Cable

PKPOWER 5ft AC Power Cord Cable User Manual

For Lenovo ThinkPad Helix, Edge, T400, T410, T420, T430, T440, T530, T61 Series

Introduction

This manual provides essential instructions for the safe and effective use of your PKPOWER 5ft AC Power Cord Cable. Please read this manual thoroughly before using the product to ensure proper setup, operation, and maintenance. This power cord is designed to provide reliable power to compatible Lenovo ThinkPad series laptops and other devices requiring a similar power connection.

Product Overview

The PKPOWER 5ft AC Power Cord Cable is a replacement or spare power cable for various electronic devices. It features a standard 2-prong US plug (NEMA 1-15P) on one end and a 3-slot 'Mickey Mouse' style connector (IEC C5) on the other, designed to connect to your device's power adapter or directly to the device if it has a compatible inlet.

Image: The PKPOWER 5ft AC Power Cord Cable, displaying the 2-prong wall plug, the 3-slot device connector, and the coiled cable length.

Image: An illustration demonstrating the connection points of the power cord: one end plugs into a standard electrical outlet, and the other connects to a compatible device's power inlet.

Image: An angled view of the power cord, highlighting the cable's construction and printed specifications or certifications along its length.

Setup

1. **Verify Compatibility:** Ensure your device or power adapter requires a 3-slot 'Mickey Mouse' style (IEC C5) power cord and is compatible with the voltage and current ratings of this cable. This cable is compatible with various Lenovo ThinkPad models including Helix, Edge, T400, T410, T420, T430, T440, T530, T61.
2. **Inspect the Cable:** Before use, visually inspect the power cord for any signs of damage, such as cuts, frayed wires, or bent prongs. Do not use a damaged cable.
3. **Connect to Device:** Insert the 3-slot connector (IEC C5) firmly into the corresponding power inlet on your device or its AC adapter.
4. **Connect to Power Outlet:** Plug the 2-prong US plug (NEMA 1-15P) into a standard, grounded electrical wall outlet. Ensure the connection is secure.

Operating Instructions

Once the PKPOWER AC Power Cord Cable is securely connected to both your device and a functional electrical outlet, your device should receive power. The cable is designed for standard household electrical systems with an input voltage range of 100-240V at 50-60Hz. No further operational steps are required for the cable itself.

Maintenance

- **Storage:** When not in use, coil the cable loosely. Avoid tight coiling or sharp bends, which can damage the internal wires.

- **Cleaning:** Disconnect the cable from all power sources before cleaning. Wipe the cable and connectors with a dry, soft cloth. Do not use liquid cleaners or solvents.
- **Inspection:** Periodically inspect the cable for any signs of wear or damage. Replace the cable immediately if any damage is observed.
- **Environment:** Keep the cable away from extreme temperatures, direct sunlight, and moisture.

Troubleshooting

If your device is not receiving power after connecting the PKPOWER AC Power Cord Cable, consider the following:

- **Check Connections:** Ensure both ends of the power cord are securely and fully inserted into the device/adapter and the wall outlet.
- **Test Outlet:** Plug another known working appliance into the same electrical outlet to confirm the outlet is functional.
- **Inspect Cable:** Re-examine the power cord for any visible damage. A damaged cable should not be used.
- **Device Power:** Confirm that your device's power adapter or the device itself is functioning correctly and is not the source of the issue.

If the problem persists after these steps, contact customer support.

Specifications

Feature	Specification
Brand	PKPOWER
Model	AC Power Cord Cable
Length	5 feet (approx. 1.5 meters)
Input Voltage	100-240V AC
Frequency	50-60Hz
Connector Type (Wall)	NEMA 1-15P (2-prong US plug)
Connector Type (Device)	IEC C5 (3-slot 'Mickey Mouse' type)
Color	Black
Certifications	CE / FCC / RoHS
Protection Features	OVP (Over Voltage Protection), OCP (Over Current Protection), SCP (Short Circuit Protection)
Product Dimensions	6 x 4 x 2 inches (packaging)

Feature	Specification
Item Weight	3 ounces
Compatible Devices	Lenovo ThinkPad Helix, Edge, T400, T410, T420, T430, T440, T530, T61 series laptops, and other devices requiring a C5 connector.

Safety Information

To ensure safe operation and prevent damage to the product or connected devices, please observe the following safety guidelines:

- Do not expose the cable to water or excessive moisture.
- Do not use the cable if it is damaged or frayed.
- Ensure the cable is properly rated for the voltage and current requirements of your device.
- Avoid placing heavy objects on the cable or running it through high-traffic areas where it could be tripped over or damaged.
- The cable features built-in OVP (Over Voltage Protection), OCP (Over Current Protection), and SCP (Short Circuit Protection) to safeguard your devices. However, always use the cable with appropriate power sources and devices.
- Disconnect the cable from the power outlet during electrical storms or when unused for extended periods.

Warranty and Support

PKPOWER products are designed and tested to meet or exceed OEM specifications and are CE / FCC / RoHS certified. We stand by the quality of our products.

For any questions, concerns, or support needs regarding your PKPOWER AC Power Cord Cable, please contact PKPOWER customer service. Our friendly and reliable customer service team aims to respond to inquiries within 24 hours.

Please refer to your purchase documentation or the PKPOWER official website for specific warranty terms and contact information.
