### Ajax Online Zigbee Lights for Pairing with Philips Hue Bridge

## Instructions for pairing with Philips Hue Bridge

### IMPORTANT

Please do not power the LED controller & lights yet. Please follow the instructions.

1. Open the Hue App and press Settings.

# Settings

Out of home control  
Not logged in

Hue Bridges

Philips hue >

Room setup

Manage rooms and assign lights

Light setup

Add new lights or change names

Accessory setup

Configure sensors & switches

Entertainment areas

Position your lights for entertainment

Widgets & Apple Watch

HomeKit & Siri

Home

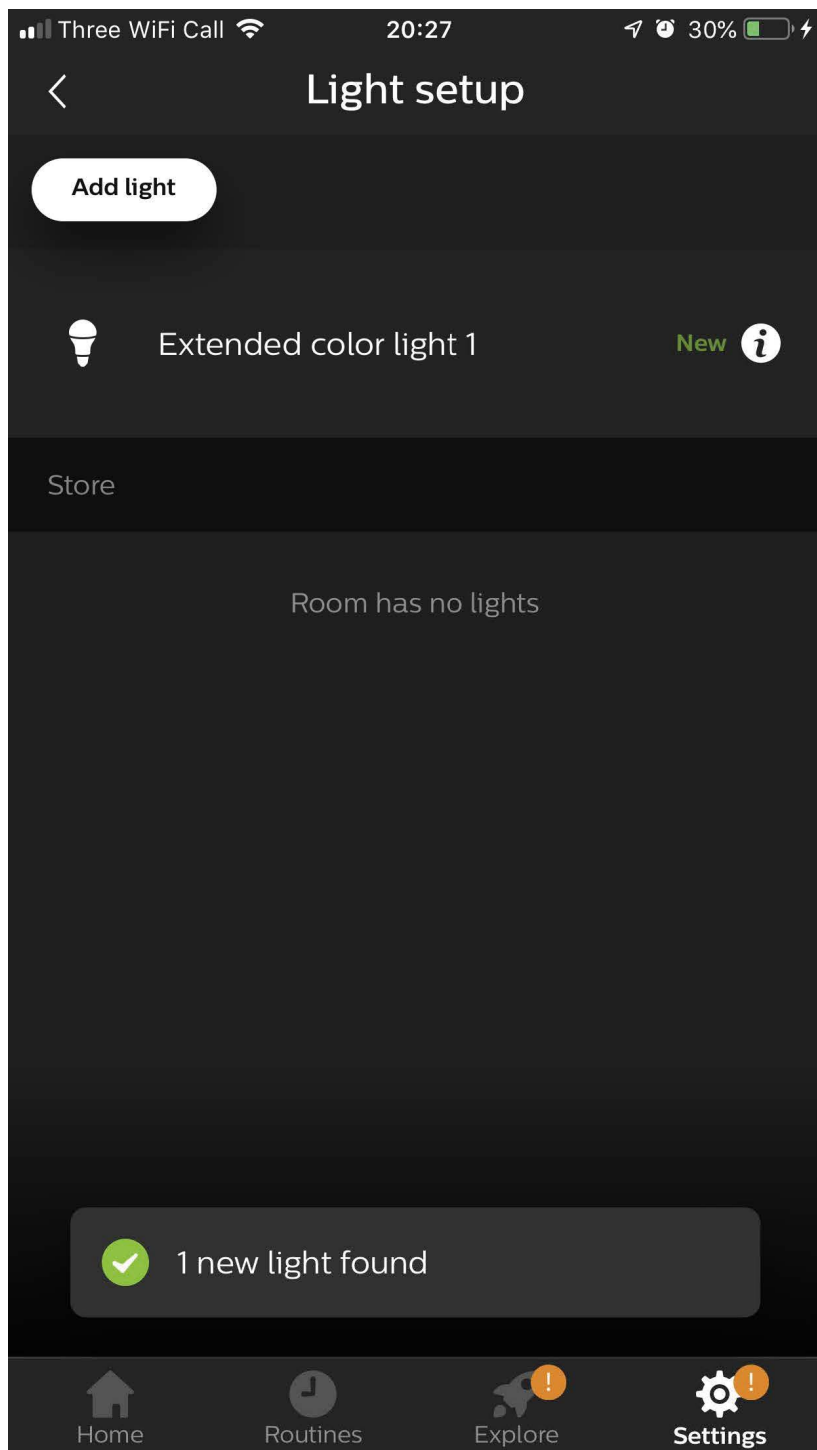

Routines

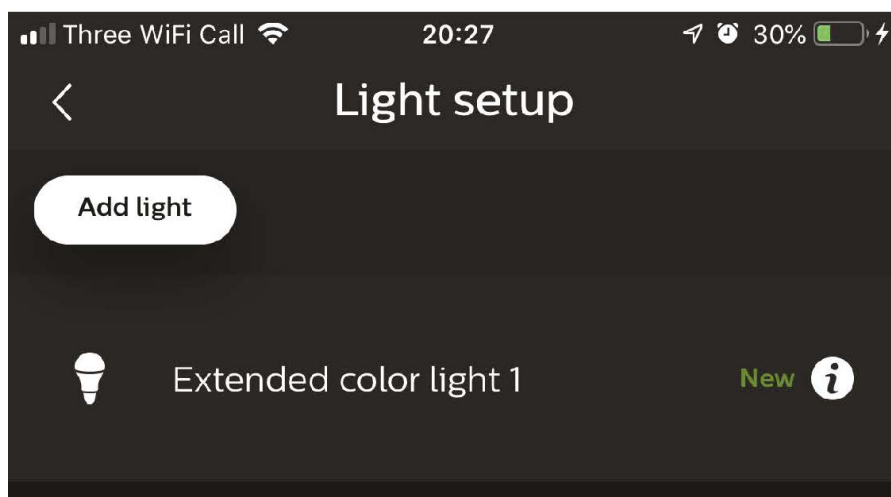

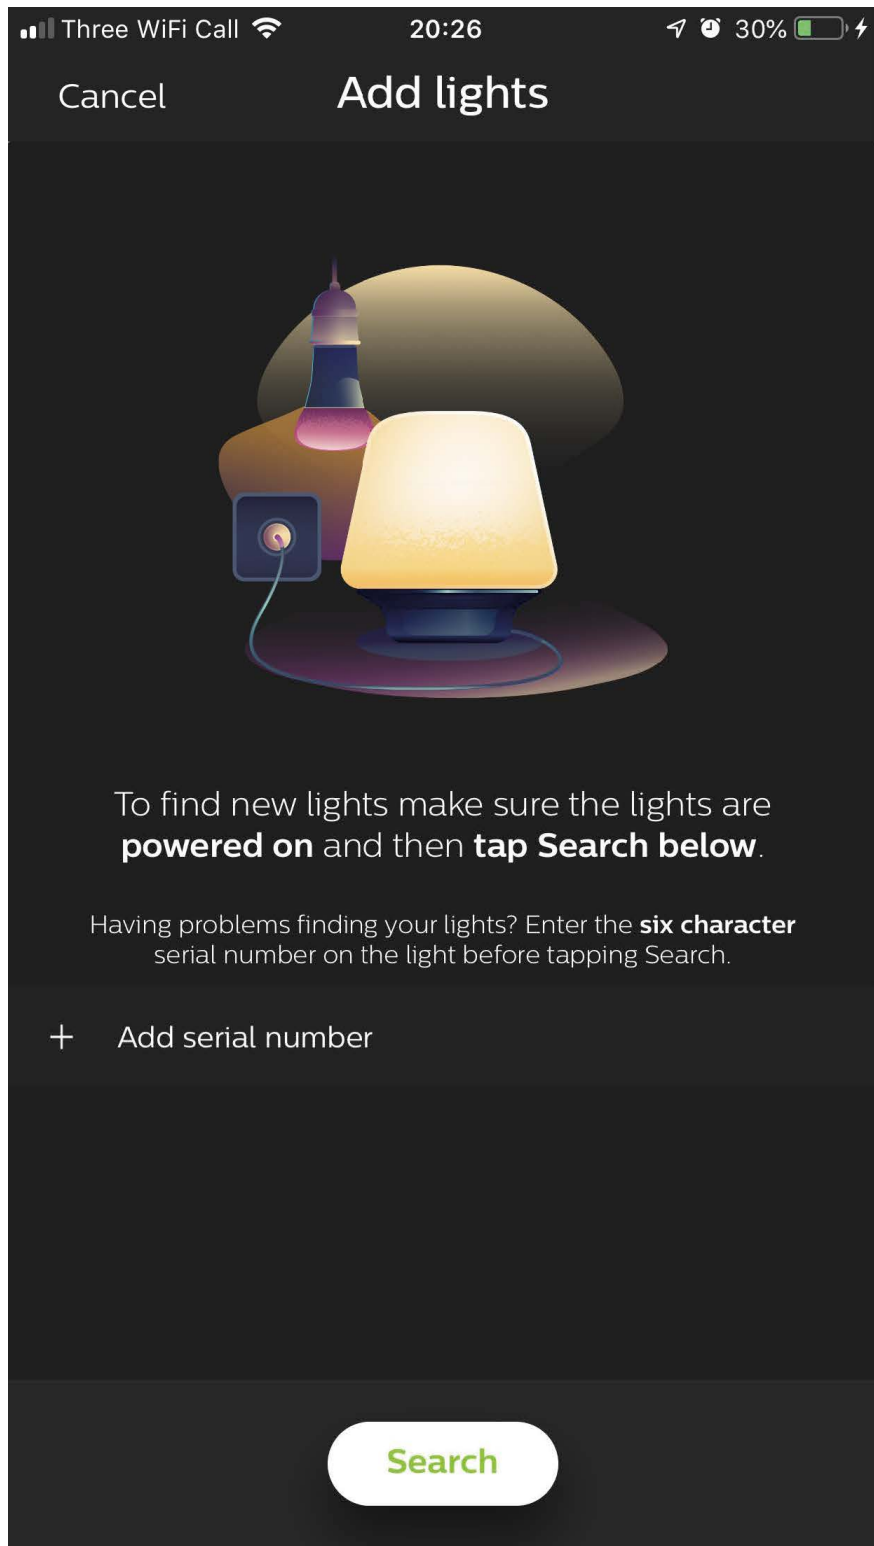

Explore

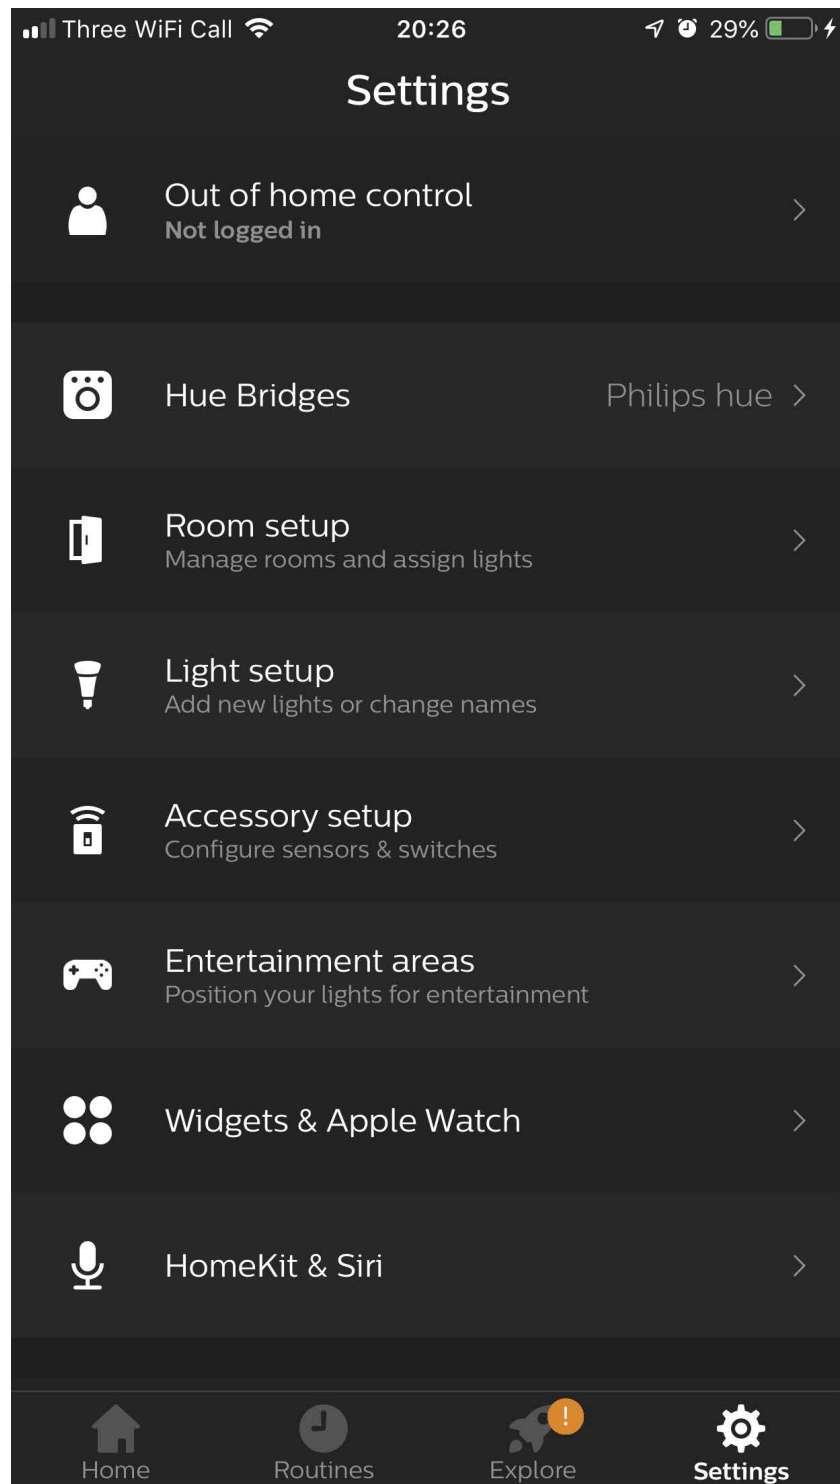

Settings

2. Select Light setup and select "Add Lights"

3. Firstly select “Search”. Then connect the LED controller & strip to the mains and turn on power. The new light will show as “Extended color light”

4. Add to room via room setup

Cancel

Save

Living room

Room type

 Living room >

Add default scenes

Light selection

Extended color light 1

Living room

Fay plus kaly

Bedroom

Hue strip with fay

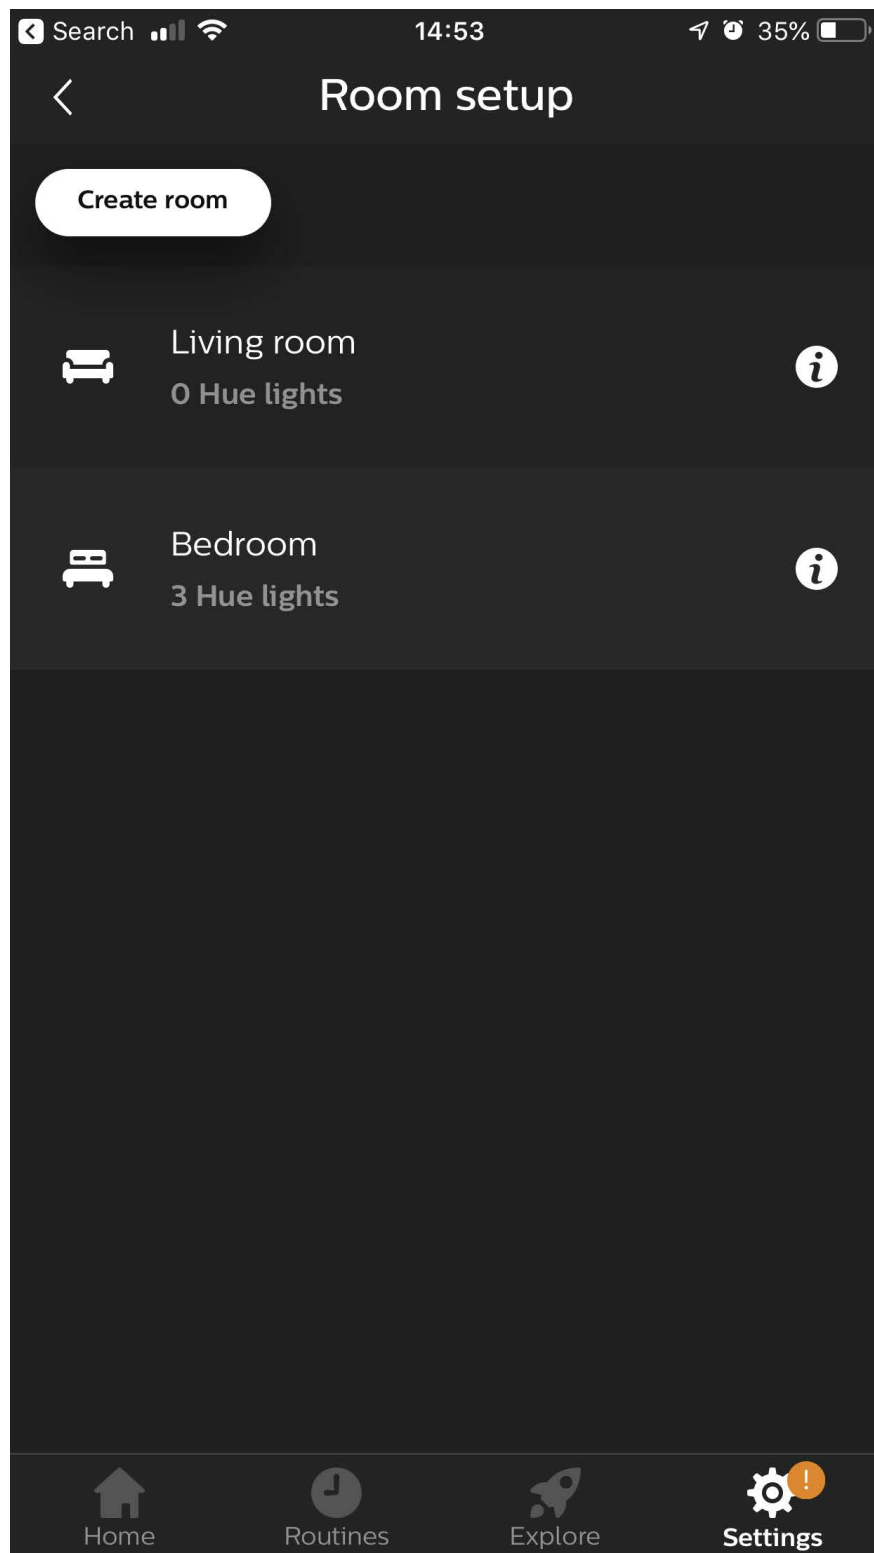

Bedroom

Fay jessie

Bedroom

5. Now create a room or add the newly discovered light to existing room\*

### FACTORY RESET

- If this fails, reset the controller by: step 1 – plug in the LED strip  
step 2 – wait for 5 secs (min)  
step 3 – turn LED strip ON/OFF 5 times  
reset will be confirmed when LED strip will flash in various colors.
