5. Maintenance

Proper care will ensure the longevity and appearance of your cabinet.

Cleaning:

Wipe the cabinet surfaces with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish. Dry immediately with a soft, clean cloth.

General Care:

- Periodically check all screws and fasteners to ensure they are tight.
- Avoid placing hot items directly on the cabinet surface; use coasters or protective pads.
- Protect from prolonged exposure to direct sunlight to prevent fading.

6. Troubleshooting

If you encounter any issues with your cabinet, refer to the following common solutions.

Door Alignment:

If the cabinet doors appear misaligned or do not close properly, hinge adjustments may be necessary. Most hinges allow for three-way adjustment (up/down, left/right, in/out) using a screwdriver.

- **Left/Right Adjustment:** Turn the screw closest to the cabinet frame to move the door left or right.
- **Up/Down Adjustment:** Loosen the screws holding the hinge plate to the cabinet, adjust the door vertically, then retighten.
- **In/Out Adjustment:** Turn the screw furthest from the cabinet frame to adjust how close the door sits to the cabinet body.
