Aoxun 10' x 12' Hardtop Gazebo

Aoxun 10' x 12' Hardtop Gazebo Instruction Manual

Model: 10' x 12' Wood-Like

Introduction

This manual provides essential instructions for the safe assembly, operation, and maintenance of your Aoxun 10' x 12' Hardtop Gazebo. Please read all instructions carefully before beginning assembly and retain this manual for future reference. The gazebo features a durable aluminum frame with a wood-like finish, a galvanized steel double roof, and includes both privacy curtains and insect netting for versatile outdoor enjoyment.

This image displays the fully assembled Aoxun 10' x 12' Hardtop Gazebo, showcasing its wood-like aluminum frame, brown privacy curtains, and galvanized steel double roof. It is positioned on a patio deck beside a swimming pool, furnished with outdoor seating, illustrating its intended use as an outdoor living space.

Safety Information

Adherence to these safety guidelines is crucial for preventing injury and damage to the product.

- Always follow the provided installation instructions precisely.
- Use the included expansion bolts to secure the gazebo to a stable foundation.
- Assemble the gazebo with at least three to four people to ensure safety and ease of installation.
- Be cautious when using the ceiling hook; do not exceed the weight limit of 25 pounds.
- Keep the gazebo clear of flammable materials.
- Do not use the gazebo during severe weather conditions, including strong winds, heavy snow, or thunderstorms.

Package Contents

Your Aoxun Hardtop Gazebo is shipped in multiple boxes. Please note that these boxes may be delivered on different days. Verify all components are present before beginning assembly.

This diagram illustrates the delivery process, indicating that the gazebo components are shipped in four separate boxes, which may arrive on different days. This information is crucial for customers to anticipate and manage their deliveries.

Typical components include:

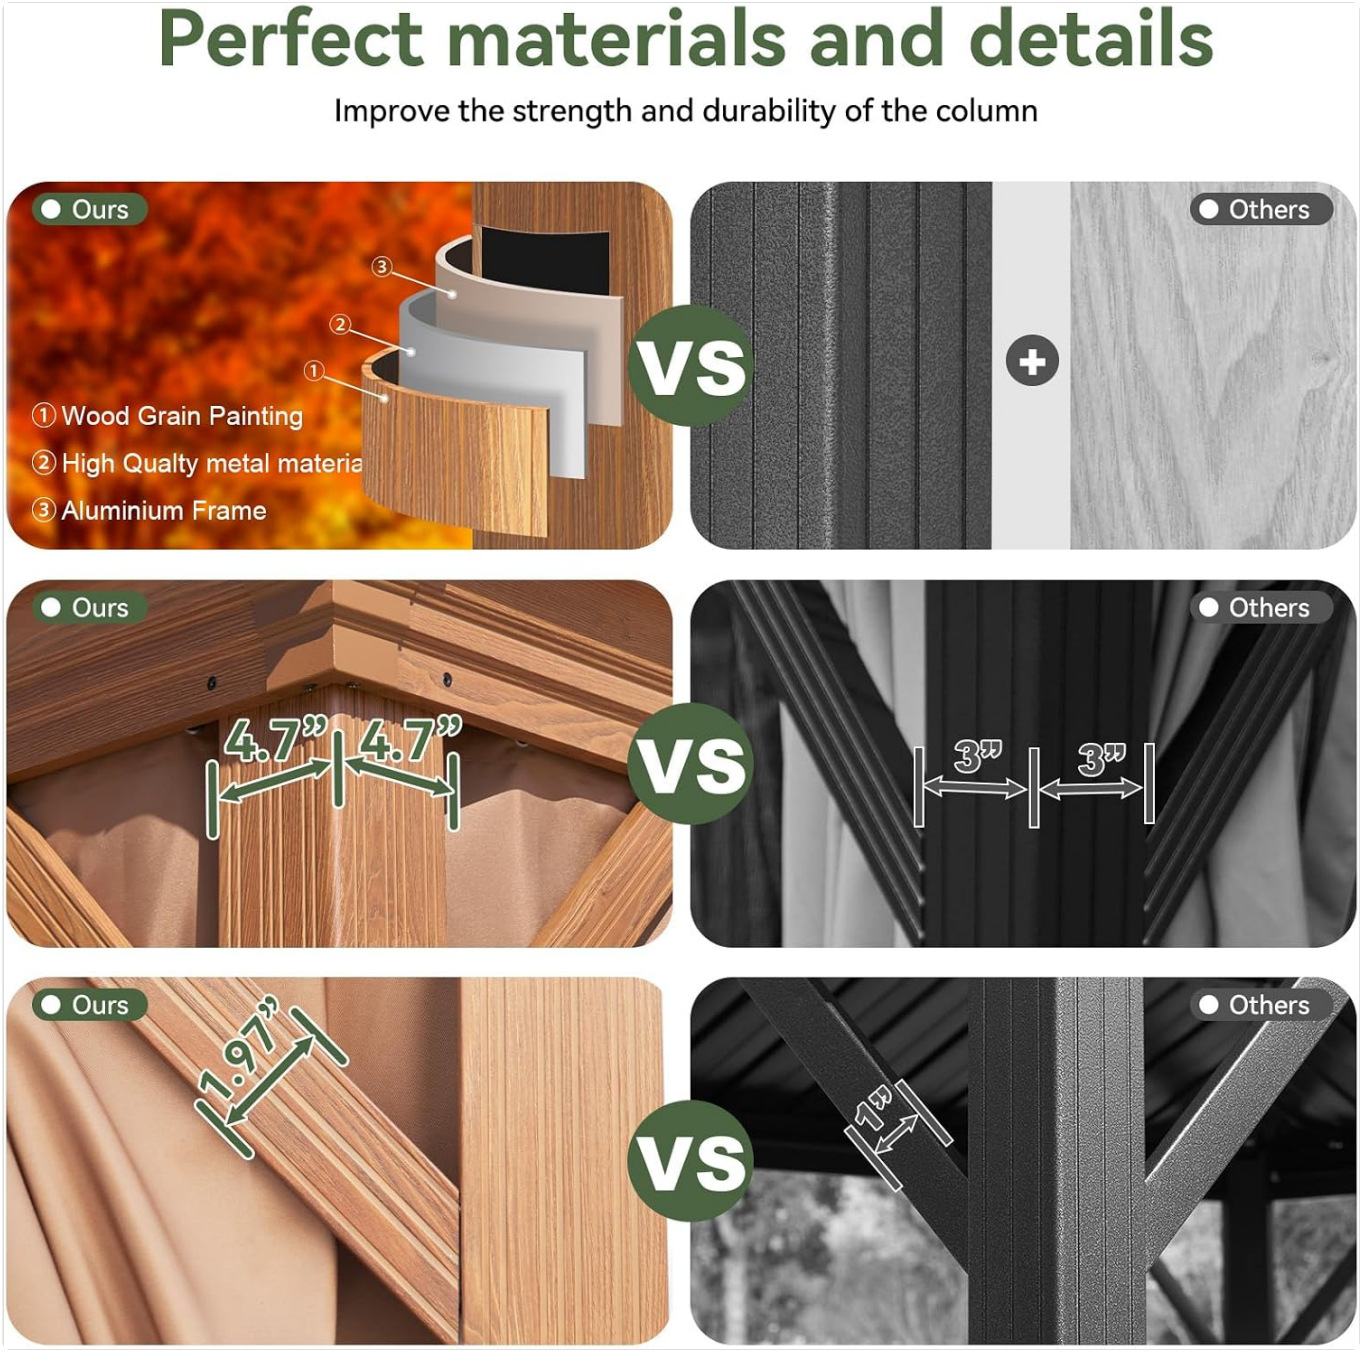
- Aluminum frame posts and beams
- Galvanized steel roof panels
- Privacy curtains
- Insect netting
- Hardware kit (screws, bolts, washers, expansion bolts)
- Assembly tools (basic wrenches, hex keys)
- Instruction manual

Setup and Assembly

Assembly typically requires 3-4 people and can take 2-4 hours. Follow the detailed pictorial instructions provided in your package. Do not fully tighten screws until a section is complete to allow for minor adjustments.

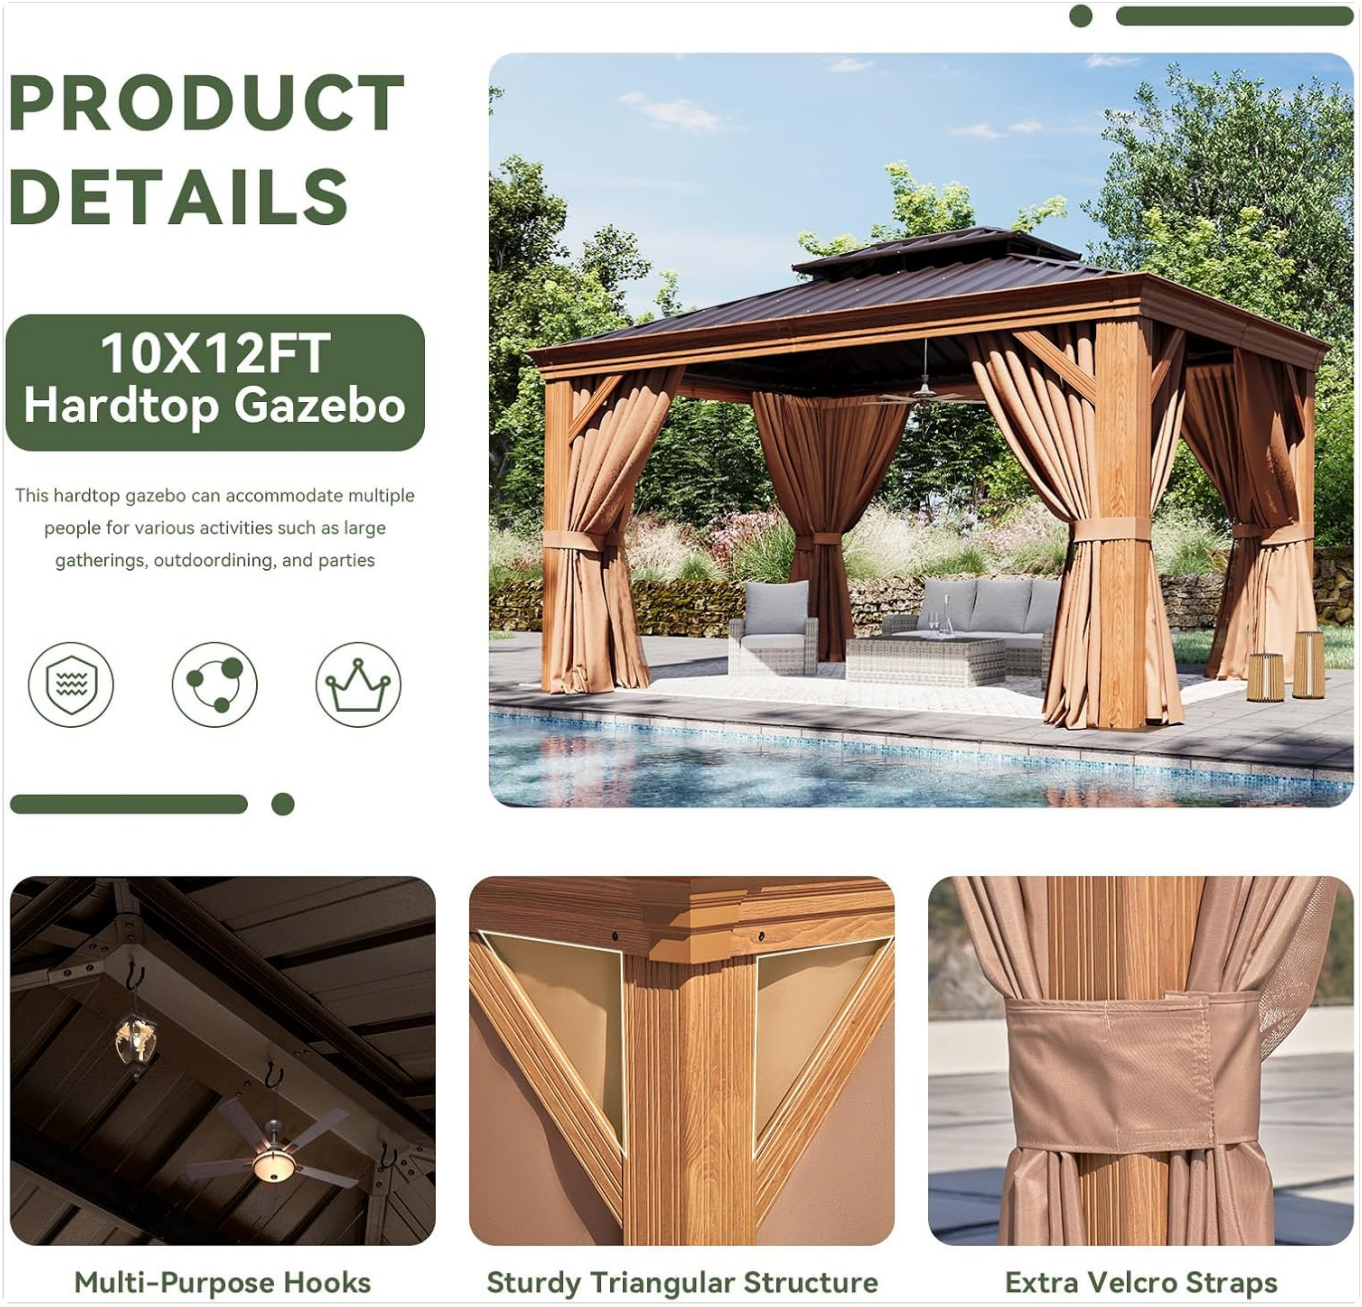
Key Structural Features:

- **Aluminum Frame with Wood Grain:** The frame posts (4.7"L x 4.7"W) are constructed from sturdy aluminum with a powder coat and thermal transfer printing for a natural wood-like appearance.
- **Galvanized Steel Double Top:** The roof is made from powder-coated galvanized steel, designed for durability and resistance to rust and harsh weather.
- **Triangular Structure:** Angle braces enhance overall stability.
- **Water Gutter Design:** An integrated drainage system directs water from the roof edge through the poles to the ground, preventing accumulation.



This image provides a detailed comparison of the Aoxun gazebo's column construction against a generic alternative. It highlights the Aoxun column's layered design, featuring wood grain painting, high-quality metal material, and an aluminum frame, emphasizing improved strength and durability.

This image illustrates the gazebo's superior slope drainage system. Rainwater is depicted flowing efficiently from the galvanized steel double roof, through integrated gutters, and down the support poles, preventing water accumulation and ensuring quick drainage.



This close-up image focuses on the sturdy triangular structure at the gazebo's corners, demonstrating the enhanced stability and durability provided by this design element.

Anchoring:

For optimal stability and wind resistance, it is essential to anchor the gazebo properly. The gazebo is designed to withstand 47-55 mph winds when secured with expansion bolts.

This graphic compares the wind resistance capabilities of the gazebo based on its installation method. It shows wind resistance ratings for placement directly on the ground, with anchoring stakes, and with expansion bolts, emphasizing the importance of proper anchoring for maximum stability.

Operating Instructions

Curtains and Netting:

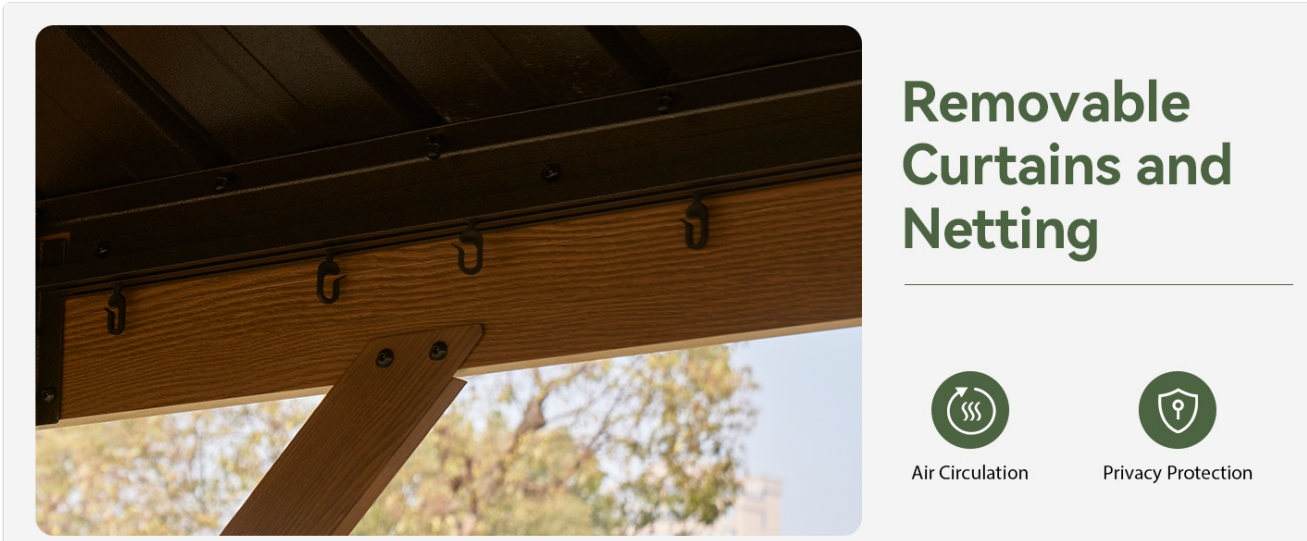
The gazebo includes both insect netting and privacy curtains, which operate on a dual track system. This allows for flexible configuration:

- **Insect Netting:** Provides protection from mosquitoes and other pests while maintaining air circulation and an open view.
- **Privacy Curtains:** Offer privacy and can help retain warmth in cooler conditions.

This image details the gazebo's detachable curtains and built-in mosquito netting. It shows the dual track design, allowing for flexible configuration to provide ventilation, privacy, and protection from insects.

Ceiling Hooks:

The gazebo is equipped with three ceiling hooks. These hooks are designed to support lightweight items such as fans, decorative lighting, or other embellishments. The maximum weight capacity for each hook is 25 pounds.



This image shows the three integrated ceiling hooks within the gazebo's roof structure, designed to support items such as fans, decorative elements, or lighting fixtures.

Maintenance

Regular maintenance will extend the life and appearance of your gazebo.

- **Cleaning:** Clean the aluminum frame and steel roof with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Fabric Care:** Curtains and netting can be spot cleaned with mild detergent. Ensure they are completely dry before storing or retracting to prevent mildew.
- **Weather Preparedness:** The gazebo is designed for all-weather use, including snow loading up to 6 inches deep. However, during severe weather conditions (e.g., hurricanes, blizzards, extreme winds), it is recommended to remove curtains and netting and, if possible, secure or temporarily disassemble the structure to prevent damage.

This split image demonstrates the gazebo's suitability for all-weather use. One side shows it under sunny skies, emphasizing its UV protection, while the other side shows it covered in snow, indicating its resilience against winter conditions.

Troubleshooting

- **Missing Parts:** If you find any parts missing upon delivery, please contact Aoxun customer service immediately with your purchase details.
- **Assembly Difficulties:** Review the instruction manual carefully. Ensure all components are correctly oriented before tightening fasteners. A second or third person can significantly aid in complex steps.
- **Water Leakage:** Check that all roof panels are correctly installed and sealed. Ensure the drainage system is clear of debris.

Specifications

Feature	Detail
Brand	Aoxun
Model	10' x 12' Hardtop Gazebo (Wood-Like)
Product Dimensions	142.9"L x 117.3"W x 114.5"H (approx. 11.9'L x 9.8'W x 9.5'H)
Floor Area	116.62 Square Feet
Item Weight	316 Pounds
Frame Material	Aluminum (with wood grain finish), Alloy Steel
Roof Material	Galvanized Steel (Double Top)
Water Resistance Level	Waterproof
UV Protection	25 (Protects against 99% UV rays)
Wind Resistance	47-55 MPH (with expansion bolts)
Snow Loading Depth	Up to 6 inches
Assembly Required	Yes (Recommended 3-4 people)
Ceiling Hook Capacity	25 lbs

This diagram provides the key dimensions of the Aoxun 10' x 12' Hardtop Gazebo, including its length, width, and height, offering a clear understanding of its overall size.
