AJAX SIM Card

INTRODUCTION

- Pre-installed roaming SIM card for reliable connectivity and alarm transmission
- Ajax SIM is a pre-installed SIM card with full network compatibility. It is ready to use straight out of the box. Activation is effortless – just one tap in Ajax PRO apps.
- The SIM automatically selects the best available network and switches between carriers as needed to ensure uninterrupted communication and fast event transmission.
- Each SIM is locked to a specific hub and can't be used on other devices.

Key features

- 2G/3G/4G (LTE) connectivity
- No personal data collection
- Fraud protection
- Auto search for the best network available
- Streamlined system installation

Instant connectivity & seamless operation

- Auto-selection of the strongest signal
- Compatibility with 2G/3G/4G (LTE) networks
- Data transmission only

Hassle-free installation

- No need for operator testing
- No need to insert the SIM into a phone
- Pre-set configurations
- Simple activation
- Configuration via apps

- The business model involves two key parties: installers and distributors.

- Distributors supply Ajax Services to installers, while installers provide them to end users.
- Both installers and distributors earn monthly from each activated Ajax SIM. With no fixed MSRP (list price), installers can set prices based on their market.
- End users pay installers after the first month of subscription, and installers forward payments to distributors.

Security measures

- Fraud protection
- Each card is locked to its specific hub
- **Minimal data collection:** SIM and hub identifiers

Technical specifications

OS Malevich	2.16 or later
Ajax PRO Desktop	Windows 3.11 or later / macOS 3.11 or later
Ajax PRO: Tool for Engineers	iOS 2.27 or later / Android 2.30 or later
