Mode Function Description

USB Wired Mode:

USB wired mode switching method: Regardless of whether the power switch is OFF or ON, after plugging in the Type-C cable, it will automatically switch to wired mode and start charging the mouse.

2.4G Wireless Mode:

1. 2.4G mode switching method: turn the power switch at the bottom of the mouse to the ON position, which is 2.4G mode; (the factory has been paired with a 2.4G receiver by default)
2. 2.4G pairing method: need to use a dedicated 2.4G pairing tool.

Low Power Mode:

1. Low power state: the indicator light of the mouse DPI is flashing (red light);
2. Charging state: the indicator light of the mouse DPI is always on (red light);
3. State when fully charged: the indicator light of the mouse DPI is always on (green light); (it will return to normal light effect after 5 seconds on)
4. When the battery voltage is lower than 3.4V: the pilot lamp flashes at a frequency of 0.5hz (red light), prompting to charge;
5. When the battery voltage is lower than 3.2V-3.0V: the mouse will automatically shut down.

Sleep Mode:

1. Level 1 sleep state: After the mouse stops moving for 5 minutes, all lights are turned off, and the mouse enters the first-level sleep state, and the mouse can be woken up by moving;
2. Level 2 sleep state: the mouse stops moving for 15 minutes and enters the level 2 sleep state, which needs to be woken up by pressing a button.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

The device must not be co-located or operating in conjunction with any other antenna or transmitter.
