Braun PL 5152

Braun IPL Silk Expert Pro 5 PL 5152 User Manual

Your comprehensive guide to safe and effective permanent hair removal.

1. Introduction

This manual provides essential information for the safe and effective use of your Braun IPL Silk Expert Pro 5 PL 5152 device. Please read all instructions carefully before first use and retain this manual for future reference.
The Braun IPL Silk Expert Pro 5 PL 5152 is an Intense Pulsed Light (IPL) device designed for permanent visible hair reduction. It is suitable for use by women on various body areas.

2. Package Contents

Your Braun IPL Silk Expert Pro 5 PL 5152 package includes the following items:

- Braun IPL Silk Expert Pro 5 PL 5152 Device
- Pouch for storage
- Precision Cap
- Standard Head
- Venus Shaving System
- Power Cord

3. Setup and First Use

3.1 Powering the Device

The Braun IPL Silk Expert Pro 5 PL 5152 is a corded electric device. Connect the power cord to the device and then to a power outlet. Ensure the device is securely connected to power during use for optimal performance.

3.2 Attaching Treatment Heads

Select the appropriate treatment head for the area you intend to treat:

- **Standard Head:** For larger body areas like legs, arms, and back.
- **Precision Cap:** For smaller, sensitive areas such as the face, bikini line, and underarms.

To attach a head, align it with the device's applicator window and gently press until it clicks into place. To remove, gently pull it off.

3.3 Skin Tone Test

Before your first full treatment, perform a skin tone test on a small area of skin you intend to treat. This helps determine your skin's reaction to the IPL and ensures the correct intensity level is used.

1. Shave the area to be tested.
2. Turn on the device. The SensoAdapt™ sensor will automatically detect your skin tone and adjust the light intensity.
3. Place the treatment window firmly against your skin.
4. Press the flash button.
5. Wait 24-48 hours. If the skin in the tested area shows no adverse reactions (e.g., redness, irritation, blistering), you can proceed with treatment at the suggested intensity.

4. Operating Instructions

4.1 Preparing the Skin

Before each treatment, ensure the skin is clean, dry, and free of any lotions or creams. Shave the area to be treated to ensure the light energy is absorbed by the hair follicle below the skin surface.

4.2 Powering On and Mode Selection

Press the power button to turn on the device. The device features a SensoAdapt™ sensor that continuously reads your skin tone and adapts the flash intensity for safe and effective treatment. You can also manually adjust the intensity if needed, though automatic mode is recommended for most users.

4.3 Treatment Technique

There are two main methods for applying the IPL flashes:

- **Gliding Mode:** For larger areas like legs and arms. Hold the flash button down and glide the device slowly and continuously over your skin.
- **Stamp Mode:** For smaller or sensitive areas like the bikini line, underarms, or face. Place the device on the skin, press and release the flash button, then lift and move to the next adjacent area.

Ensure the entire treatment window is in full contact with your skin to allow the device to flash.

4.4 Treatment Schedule

For optimal results, follow the recommended treatment schedule:

- **Initial Phase:** Treat once a week for the first 4-12 weeks.
- **Maintenance Phase:** After the initial phase, treat every 1-2 months or as needed to maintain results.

Individual results may vary. Consistency is key for effective hair reduction.

5. Maintenance and Care

5.1 Cleaning the Device

After each use, ensure the device is switched off and unplugged. Clean the treatment window and the surrounding area with a dry, lint-free cloth. Do not use abrasive cleaners or immerse the device in water as it is not water resistant.

5.2 Storage

Store the device and its accessories in the provided pouch in a cool, dry place, away from direct sunlight and out of reach of children.

6. Troubleshooting

- **Device not turning on:** Ensure the power cord is securely connected to both the device and a working power outlet.
- **Device not flashing:** The device will only flash when the treatment window is in full contact with your skin and the skin tone sensor detects a suitable skin tone. Ensure proper contact and check the skin tone indicator lights.
- **Skin irritation after use:** Mild redness is normal. If irritation persists, apply a cool compress. Discontinue use if severe or prolonged irritation occurs and consult a healthcare professional.
- **No visible hair reduction:** Ensure you are following the recommended treatment schedule and technique. Hair growth cycles vary, and it may take several weeks to see noticeable results.

7. Specifications

Feature	Detail
Brand	Braun
Model Number	PL 5152
Product Dimensions	20 x 20 x 20 cm
Item Weight	1 Kilogram
