INSTALLATION GUIDE

STEP 1 – FLIP IT OVER
Flip your sampler and remove the bottom RAM cover lid
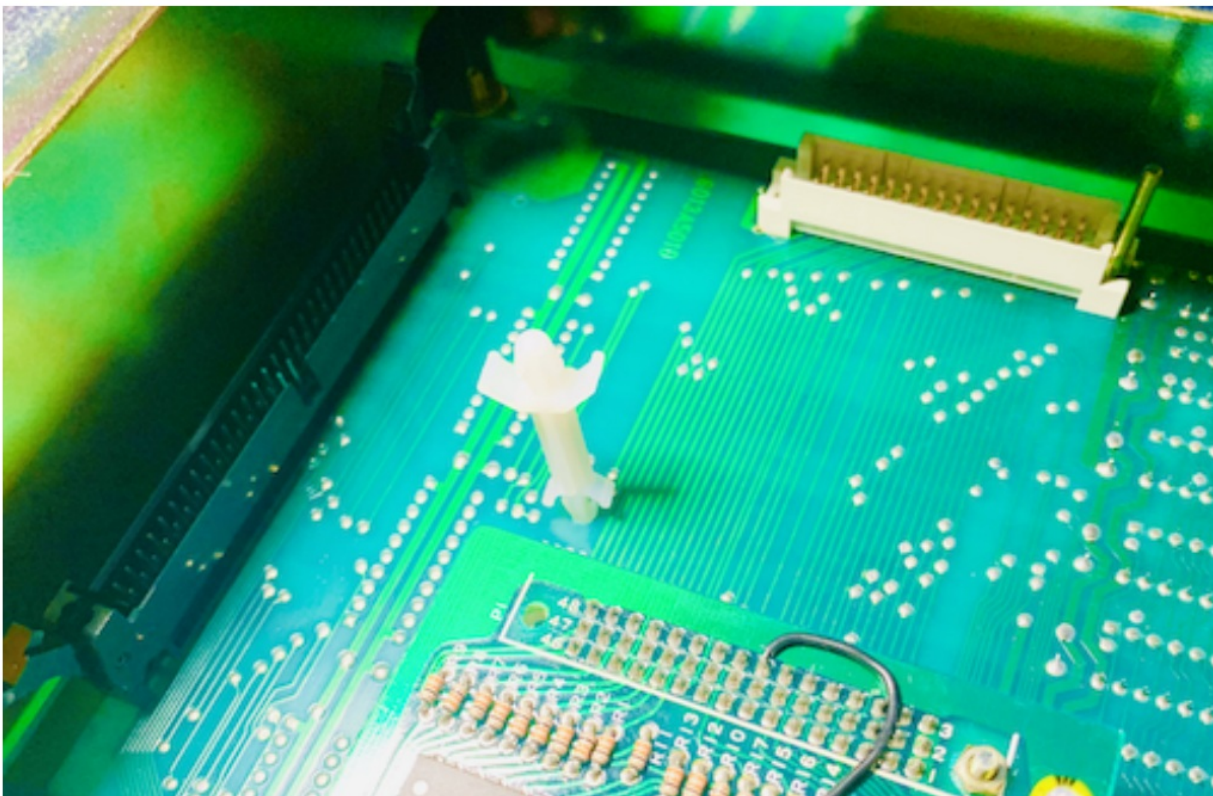

**STEP 2** – INSERT THE PLASTIC THING
If your sampler's board does not have the small plastic PCB holder, one is included with your RAM module; insert it to the board – just push it softly into the hole

STEP 3 – INSERT THE RAM MODULE
The RAM modules are keyed, they can't be inserted backwards – just push them into the socket

STEP 4 – FIX IT WITH THE PLASTIC WASHER AND M2.5 NUT
A plastic washer and M2.5 nut is also included with each RAM module; just tighten it with hand, that should be enough
