2. Setup and Installation

The Waterdrop X16 system is designed for under-sink installation. Ensure you have adequate space and access to a cold water line and a drain.

2.1 Components Checklist

- Main RO Unit
- RO Faucet
- X16-F3 Reverse Osmosis Membrane Filter
- Tubing and Connectors
- Power Adapter
- Drain Saddle

2.2 Installation Steps

1. **Prepare the Installation Area:** Clear the under-sink cabinet. Ensure power outlet is accessible.
2. **Install the Faucet:** Drill a hole (if necessary) in the countertop or sink for the RO faucet. Secure the faucet.
3. **Connect Water Supply:** Turn off the cold water supply. Install the feed water adapter to the cold water line.
4. **Install Drain Saddle:** Attach the drain saddle to the drain pipe above the trap.
5. **Connect Tubing:** Connect the appropriate tubing from the main RO unit to the faucet, feed water adapter, and drain saddle. Ensure all connections are secure.
6. **Install Filter:** Insert the X16-F3 filter into the designated slot on the main unit. Twist to lock.
7. **Connect Power:** Plug the power adapter into the RO unit and then into a grounded electrical outlet.
8. **Flush the System:** Turn on the cold water supply. Open the RO faucet and allow water to flow for at least 30 minutes to flush the system and remove air.

3. Operation

3.1 Initial Use

After installation and flushing, the system is ready for use. The digital faucet will display real-time TDS (Total Dissolved Solids) levels and filter life indicators.

3.2 Dispensing Water

- To dispense water, simply turn the handle on the RO faucet.
- The system will automatically start producing purified water.
- The digital display on the faucet provides immediate feedback on water quality.

3.3 Understanding the Digital Display

The faucet's digital display shows:

- **TDS (Total Dissolved Solids):** Indicates the purity of the filtered water. Lower numbers signify higher purity.
- **Filter Life Indicator:** Shows the remaining lifespan of the X16-F3 filter. Replace the filter when the indicator suggests.

4. Maintenance

4.1 Filter Replacement

The X16-F3 filter requires periodic replacement to maintain optimal performance. The digital display will indicate when replacement is due.

1. **Turn off Water Supply:** Close the cold water supply valve to the system.
2. **Depressurize System:** Open the RO faucet to release any remaining pressure.
3. **Remove Old Filter:** Twist the old X16-F3 filter counter-clockwise and pull it out.
4. **Install New Filter:** Insert the new X16-F3 filter into the housing and twist clockwise until it locks securely.
5. **Reset Filter Life:** Refer to the faucet's instructions for resetting the filter life indicator after replacement.
6. **Flush New Filter:** Turn on the water supply and flush the new filter for 5-10 minutes before consuming water.

4.2 System Cleaning

Periodically wipe down the exterior of the main unit and faucet with a clean, damp cloth. Do not use abrasive cleaners or solvents.

5. Troubleshooting

This section addresses common issues you might encounter with your Waterdrop X16 system.

Problem	Possible Cause	Solution
No water flow from faucet	Water supply off; System not plugged in; Clogged filter	Check water supply valve; Ensure power connection; Replace filter if indicated

Problem	Possible Cause	Solution
Low water pressure	Clogged filter; Low incoming water pressure	Replace filter; Check household water pressure
High TDS reading	Expired filter; Membrane fouling	Replace filter; Contact support if issue persists after filter replacement
Leaking connections	Loose fittings; Damaged O-rings	Tighten connections; Inspect and replace O-rings if damaged
