CONNECTIONS INSTRUCTIONS

Bluetooth Connection

If you want to use Bluetooth, first connect the projector to a Bluetooth device, and then connect the projector to the other input device (such as a smartphone or computer, etc.). You can set the Bluetooth as below:

1. Click "Setting" on the menu.
2. Choose the "Bluetooth Setting". Find your Bluetooth device and pair it with the projector.
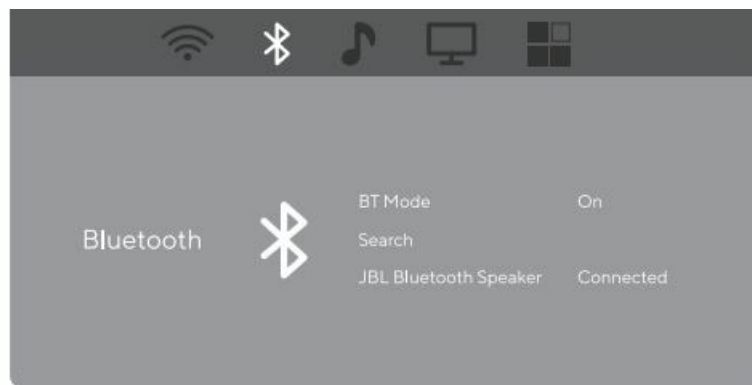

Smartphone Connection

- The wireless connection methods for iOS and Android smartphones are as follows
- **Tip:** Please select "Screen Mirroring" from the home menu, then choose the wireless connection you need.
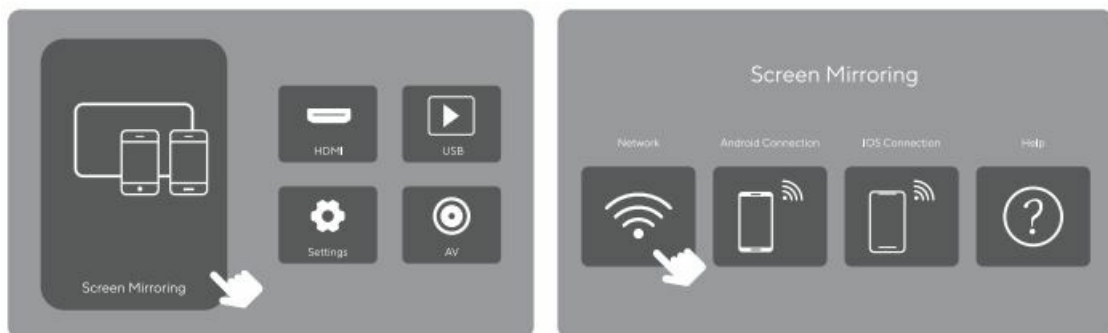

For iOS System

Cellular Connection for iPhone

1. Choose the "iOS Connection" on the interface of Screen Mirroring.
2. Turn on the WLAN of your iOS device and join the network"01 X".
3. Then go to the "Screen Mirroring" of the iOS device and select "01 X" to connect
4. The connection success.
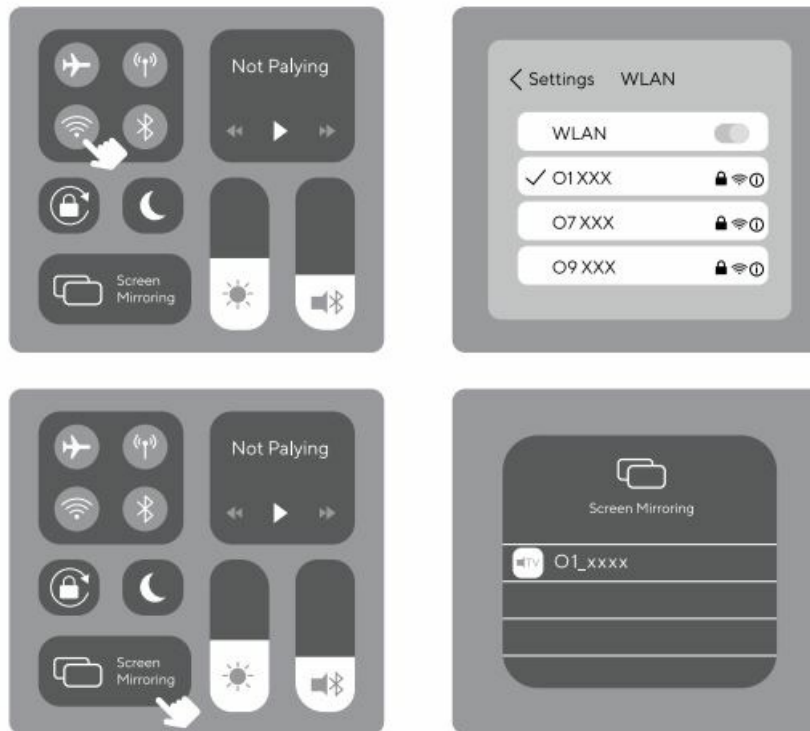

Wi-Fi Connection for iPhone

1. Select "Network from the Screen Mirroring interface and connect your Wi-Fi.
2. Return to the interface and chose the "iOS Connection".
3. Turn on the WLAN of your iOS device and connect to the same Wi-Fi network above.
4. Then go to the "Screen Mirroring" of the iOS device and select "O1 xxxx" to connect.
5. The Wi-Fi connection success.

For Android System

Wireless Connection for Android

1. Please confirm your Android device has the "Screen Casting" function first.
2. Chose the "Android Connection" on the interface of Screen mirroring
3. Turn on the WLAN/Wi-Fi of your Android device.
4. Turn on "Screen Casting" in the phone's Settings, then select "01 X" to connect. Different phones have different names for the mirroring feature, please refer to the chart in the connection prompt screen.
   Tip: You can use both Wi-Fi and the Android phone's data to connect the projector with the above steps.

**Notes for Connecting Smartphones to the Projector**

1. The smoothness of the projector connection is affected by the strength of your Wi-Fi signal. Please make sure that the Wi-Fi signal is good enough.
2. If you connect the projector via a new Wi-Fi network for the first time, please enter the Wi-Fi password in the projector.
3. The projector can support most of the cell phones in the market for wireless connection. However, due to a special security protocol for Google phones, it cannot connect wirelessly or wired to any projector.
4. Some streaming applications (Netflix, Amazon Prime, Disney+) are copyrighted and so do not support smartphone wireless screen casting. There could be problems with no sound or picture. It is not the projector restricting you, but the wireless screen casting restricting you. You can use a Fire TV Stick or connect with your PC via HDMI cable to watch them.

HDMI Devises Connection

- The projector can be connected to devices via the HDMI port. It is compatible with laptops, DVD players, Chromecast, TV sticks, etc.
- Please go to the main menu and select the HDMI input before connecting.
- **Tip:** The simplest way to connect to your laptop is to use an HDMI cable. It's also a good way to see if the projector is working properly.
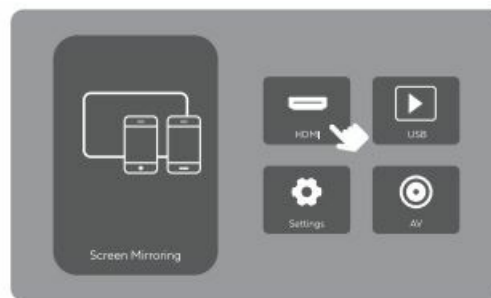

- Connect your device to the projector.
- **iPhone/iPad:** An official Lightning Digital AV adapter is Required (not included).
- **Android:** A USB C to HDMI Adapter/ Miracas-t/Dongle for a projector is Required (not included).
