Jawploy 64GB

User Manual: Jawploy 64GB Digital Voice Recorder

Model: 64GB

Introduction

The Jawploy 64GB Digital Voice Recorder is a compact and powerful audio recording device designed for various applications, including lectures, meetings, interviews, and personal notes. Featuring 64GB of internal memory, it offers extensive storage for your audio files. With its high-fidelity 1536KBPS recording quality and voice-activated recording (AVR) capabilities, it ensures clear and efficient audio capture. This manual provides detailed instructions for setting up, operating, and maintaining your device.

Package Contents

- 1 x Jawploy 64GB Voice Recorder
- 1 x USB Cable
- 1 x User Manual (this document)
- 1 x Operation Manual (additional guide)
- 1 x Box

Setup

1. Initial Charging

Before first use, fully charge the device. Connect the provided USB cable to the recorder's USB port and the other end to a computer's USB port or a compatible USB wall adapter (not included). The device typically charges within a few hours. A full charge provides up to 18 hours of continuous recording.

Figure 2: USB connection for charging and data transfer.

2. Powering On/Off

Locate the power switch on the side of the device. Slide the switch to the "ON" position to power on the recorder. To power off, slide the switch to the "OFF" position.

3. Language Selection

Upon first power-on or after a reset, you may be prompted to select a language. Use the navigation buttons to select your preferred language (e.g., English, French) and confirm your selection.

Operating Instructions

1. Basic Recording

To start recording, simply press the **REC** button. The device will begin capturing audio at 1536KBPS quality. To save the recording, press the **SAVE** button. Files are automatically named by date and time for easy organization.

Figure 3: REC and SAVE buttons for recording operations.

2. Voice-Activated Recording (AVR)

The Voice-Activated Recording (AVR) mode conserves battery and storage space by starting recording only when sound is detected and pausing when it's quiet. To activate or deactivate AVR, navigate through the device's menu settings. Refer to the on-screen prompts for specific steps.

Figure 4: Device screen showing AVR mode option.

3. Playback and AB Repeat

To play back recordings, navigate to the file list using the menu buttons. Select the desired file and press the **PLAY/PAUSE** button. The device features a high-definition built-in speaker and supports headphones via the 3.5mm jack. The AB Repeat function allows you to loop a specific segment of an audio file. During playback, press the AB button to mark the start point (A) and press it again to mark the end point (B). The device will then continuously play the segment between A and B.

Figure 5: Password protection and AB Repeat functionality.

4. MP3 Playback

In addition to recording, the device functions as an MP3 player. Transfer MP3 files to the device via USB. Use the navigation buttons to select music files and the **PLAY/PAUSE** button for playback.

5. Password Protection

To protect your audio files and device access, set up a password. This feature ensures privacy and prevents unauthorized access to your recordings. Consult the on-screen menu for instructions on setting and managing your password.

6. USB Connectivity and File Management

Connect the recorder to your computer using the supplied USB cable. The device will appear as a removable disk, allowing you to easily transfer, copy, or delete audio files. Files are automatically named with the date and time of recording, simplifying organization.

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the device. Avoid using liquid cleaners or abrasive materials.
- **Storage:** Store the recorder in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the device regularly, even if not in use for extended periods.
- **Software Updates:** Check the manufacturer's website periodically for any available firmware updates to ensure optimal performance.

Troubleshooting

Problem	Possible Cause	Solution
Device does not power on.	Low battery; Power switch in OFF position.	Charge the device; Ensure power switch is ON.
Cannot record.	Memory full; Device in playback mode.	Delete old files to free up space; Ensure device is in recording mode.
Poor audio quality.	Distance from sound source; High background noise.	Move closer to the sound source; Use noise reduction feature if available.
Device not recognized by computer.	Faulty USB cable; Driver issue.	Try a different USB cable or port; Restart computer and device.
