akubela IR21 Infrared Remote Controller

# **Specifications**

- Temperature and humidity detection
- · USB power supply
- · LED indicator
- · Networking button
- Dimensions: 80mm x 46mm

#### **Product Usage Instructions**

- Place the controller on a flat and stable surface, such as a desk or table.
- Connect the device to a USB wall charger using the provided USB cable. Ensure the wall charger has a DC output of 5V/1A.
- Ensure the surface is clean and dry before applying adhesive.
- Apply the included 3M double-sided tape to the bottom of the controller.
- Remove the backing from the tape.
- Press the device firmly with both hands for 30 seconds to secure it in place.

#### **FAQ**

- Q: What should I do if the pairing process is unsuccessful?
- A: If the pairing process is unsuccessful, two beep sounds will be heard, and a red light will be on for 5 seconds. In this case, try reinitiating the pairing process or check for any connectivity issues.
- Q: How far can the IR controller be placed from the receiver?
- **A:** The distance between the receiver and the IR controller should not exceed 15 meters, with an optimal distance of 7 meters for best performance.
- Q: Can I use any USB wall charger to power the IR controller?
- A: It is recommended to use a USB wall charger with a DC output of 5V/1A to ensure proper power supply to the IR controller.

#### Welcome to Akubela Home!

This installation guide will walk you through installing the Akubela IR controller and putting it into pairing mode.

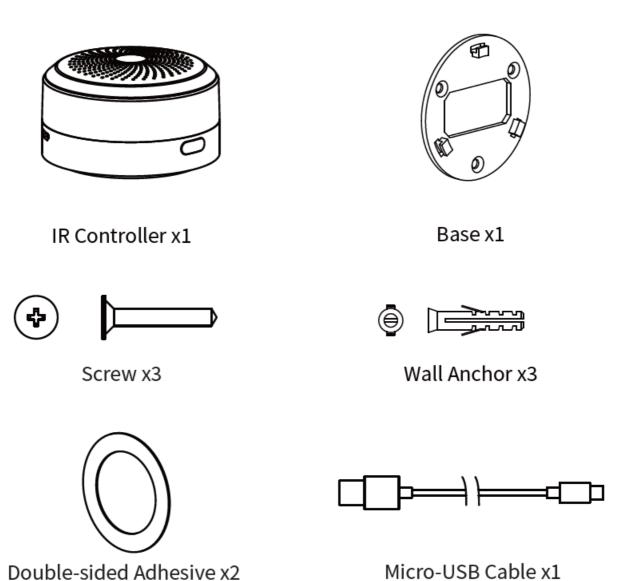

## **Before We Start**

- Your first time installing the Akubela IR controller may take up to 10 minutes.
- You'll get faster after each installation.

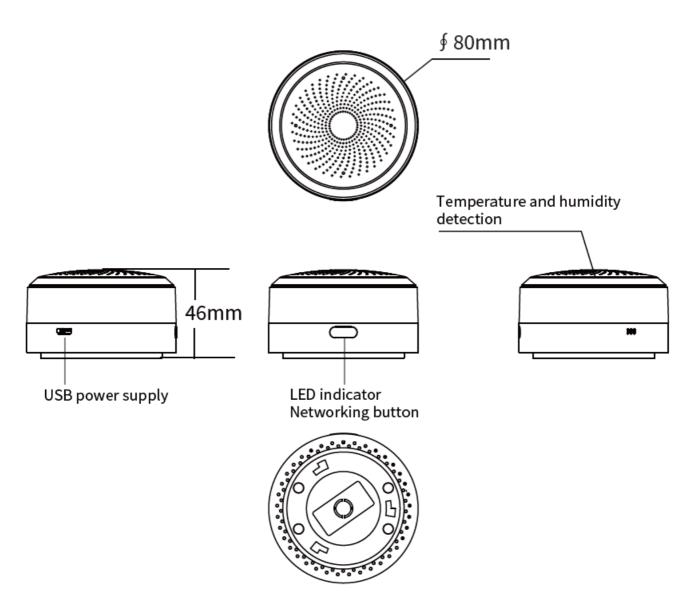

# Warning!

- Keep the device and all its parts out of the reach of children.
- The small parts or accessories contained may be a choking hazard to them.

#### In The Box

# **Product Overview**

#### Installation

• You can place the IR controller in the desired location for immediate use, or use the provided double-sided adhesive or screws for mounting the device on a surface.

# Note

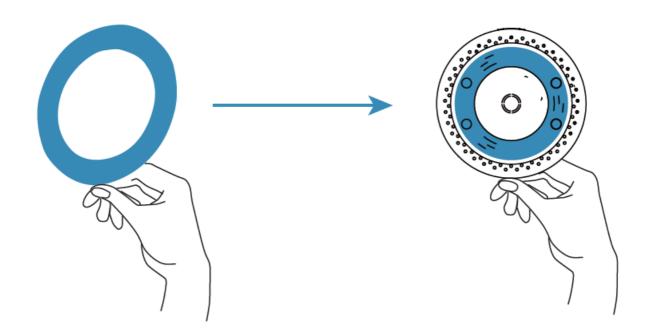

- To ensure the best performance, keep a direct and unobstructed line of sight between the receiver and the IR controller.
- Make sure the distance between them does not exceed 15 meters, and the optimal distance is within 7 meters.

## Placing IR Controller on a Table for Direct Use

- 1. Place the controller on a flat and stable surface, such as a desk or table.
- 2. Connect the device to a USB wall charger using the provided USB cable.

Make sure that the wall charger has a DC output of 5V/1A.

# Mounting IR controller with Double-sided Tape

- 1. Make sure the surface is clean and dry before applying adhesive.
- 2. Apply the included 3M double-sided tape to the bottom of the controller.
- 3. Remove the other backing.
- 4. Press the device firmly with both hands for 30 seconds to secure it in place.

# **Mounting IR controller with Screws**

- 1. Use the base mounting holes as a template to mark the desired location.
- 2. Drill holes at the marked positions with a diameter of 5 mm and a depth of 25 mm. Insert wall anchors into the holes.
- 3. Secure the base using the provided screws.
- 4. Align the notches on the bottom of the controller with the clips on the base, and press the device down to attach it securely.

## **Pairing Mode**

## Note

Before pairing the IR controller, ensure that your HyPanel series devices are installed and have completed their initial setups, as the controller must be used with HyPanel series devices.

## Putting the IR controller into pairing mode

- Power the controller by connecting it to a wall charger using the included USB cable. The charger must have a DC output of 5V/1A.
- 2. Press and hold the button on the side of the controller until a green indicator light blinks slowly and a beep sound is heard. The controller enters the pairing mode.

To add the IR controller to your HyPanel series devices, use either the BelaHome app or HyPanel devices.

• Once successfully paired, a beep sound will be heard, and a green indicator light will be on for 5 seconds.

Alternatively, you can see the IR controller on the panel you want to pair it with.

• If the pairing process is unsuccessful, 2 beep sounds will be heard and a red light will be on for 5 seconds.

# Congratulations!

• You are done with the installation!
