Product Overview

The Frigidaire Top-Opening 6-Can Beverage Insulated Retro Mini Fridge/Cooler is a compact and versatile cooling solution. It utilizes a thermoelectric cooling system to maintain optimal internal temperatures for your beverages or small items. Its insulated design and multiple power options make it suitable for both home and on-the-go use.

Key Features

- Capacity: Holds up to 6 standard 12oz cans or 4 liters (0.14 cu. ft.) of beverages. Can also be used for skincare products.
- Thermoelectric Cooling: Efficiently cools items 26°F to 28°F below ambient temperature.
- Dual Power Options: Operates via 110-volt (AC) wall outlet or 12-volt (DC) car adapter.
- Insulated Design: Maintains coolness even when unplugged for portable use.

- Stylish Design: Features a leather-like carrying handle, elegant cork lid, and heavy-duty rubber latch.
- Quiet Operation: Designed for minimal noise and vibration.

Setup

Unpacking

Carefully remove the mini fridge/cooler from its packaging. Inspect the unit for any signs of damage. Retain the packaging for future transport or storage.

Placement

Place the unit on a flat, stable surface. Ensure there is adequate ventilation around the unit (at least 2-3 inches of space on all sides) to allow for proper heat dissipation from the thermoelectric cooling system. Avoid placing the unit in direct sunlight or near heat sources.

Power Connection

The mini fridge/cooler can be powered by either a standard 110V AC wall outlet or a 12V DC car adapter.

- **For Home Use (110V AC):** Connect the AC power adapter to the AC input port on the back of the unit. Plug the other end into a standard 110V AC wall outlet.
- **For Car Use (12V DC):** Connect the DC car adapter to the DC input port on the back of the unit. Plug the other end into your vehicle's 12V cigarette lighter socket.

Once connected, the unit will begin to cool. Allow approximately 30 minutes for the internal temperature to stabilize before placing items inside.

Operating Instructions

Cooling Beverages

To cool beverages, simply open the top lid by unlatching the rubber latch and place up to six standard 12oz cans or other small items inside. Close the lid securely to ensure efficient cooling. The thermoelectric system will work to chill the contents.

Using as Skincare Fridge

This unit can also be used to store skincare products such as moisturizers, serums, and beauty tools. The cool temperature can help preserve certain ingredients and provide a refreshing application experience. Ensure all items are sealed to prevent spills.

Portable Use

Thanks to its insulated design, the mini fridge/cooler can maintain its cool temperature for a period even after being unplugged. This makes it ideal for short trips or moving between locations. For extended cooling during travel, use the 12V DC car adapter.

Maintenance and Care

Cleaning

To clean the exterior, wipe with a soft, damp cloth. For the interior, use a mild soap solution and a soft cloth. Ensure the unit is unplugged before cleaning. **Important:** Keep the unit dry to avoid electrical damage. Do not use abrasive cleaners or harsh chemicals.

Storage

If storing the unit for an extended period, ensure it is clean and dry. Store in a cool, dry place away from direct sunlight

and extreme temperatures.

General Tips

- For best cooling performance, pre-chill beverages before placing them in the unit.
- Avoid opening the lid frequently to maintain internal temperature.
- Ensure the rubber latch is securely fastened when the lid is closed.

Troubleshooting

Problem	Possible Cause	Solution
Unit not cooling	Power cord not properly connected. Power outlet not working. Insufficient ventilation.	Check if the power cord is securely plugged into both the unit and the outlet. Test the outlet with another appliance. Ensure there is at least 2-3 inches of space around all sides of the unit for air circulation.
Poor cooling performance	Lid not closed securely. Ambient temperature too high. Unit overloaded.	Ensure the lid is fully closed and the rubber latch is engaged. Move the unit to a cooler environment. Do not overfill the unit; allow space for air circulation inside.
Unusual noise	Unit not on a stable surface. Obstruction in fan.	Place the unit on a flat, stable surface. Unplug the unit and carefully check for any obstructions near the fan vents (on the back).
