TPUFO Q8

TPUFO Wireless HDMI Display Dongle Adapter Q8 Instruction Manual

Model: Q8

1. Introduction

The TPUFO Wireless HDMI Display Dongle Adapter (Model Q8) provides a seamless solution for extending your screen wirelessly from various devices to a larger display. This compact and portable adapter supports 4K decoding and delivers an impressive 1080P Full HD output, ensuring high-quality audio and video content. It is designed for ease of use with plug-and-play functionality, requiring no apps, Bluetooth, or Wi-Fi for initial setup. Ideal for business presentations, home entertainment, and multimedia education, the Q8 offers stable transmission with low latency.

2. What's in the Box

- Wireless HDMI Display Dongle Adapter
- HDMI Cable
- Type-C Cable
- AC Adapter
- User Manual

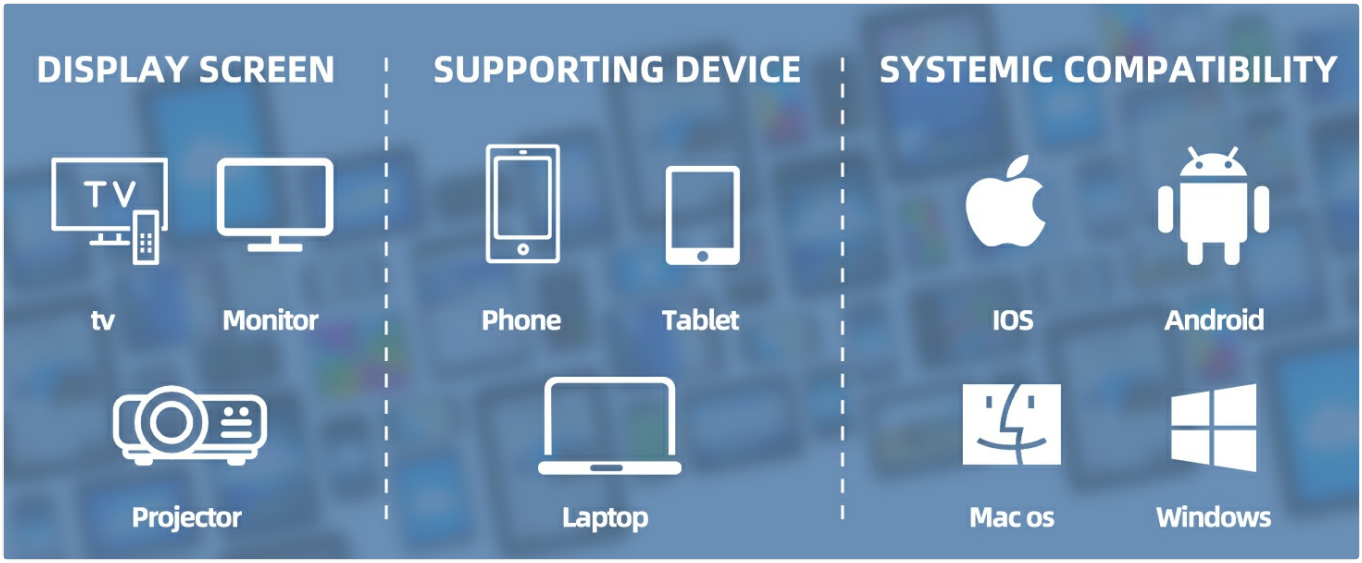

Image: All components included in the TPUFO Wireless HDMI Display Dongle Adapter package.

3. Setup Instructions

1. **Connect the Adapter:** Plug the HDMI cable into the Wireless HDMI Display Dongle Adapter and then into an available HDMI port on your TV, projector, or monitor.
2. **Power the Adapter:** Connect the Type-C power cable to the adapter and the USB-A end to the provided AC adapter. Plug the AC adapter into a power outlet. Alternatively, if your display device has a powered USB port, you may connect the USB-A end directly to it.
3. **Select Input Source:** Turn on your TV/display and use its remote control to select the corresponding HDMI input source where the adapter is connected.
4. **On-Screen Instructions:** The adapter will display setup instructions on your screen. These instructions will guide you through connecting your smartphone, tablet, or laptop.
5. **Switching Modes (Android/iOS):** The adapter supports both Android and iOS devices. To switch between Android and iOS connection modes, press the button on the top of the adapter. The on-screen instructions will update accordingly.

Easy Setup so it's plug and play on any HDMI device

Video: A detailed guide on how to easily set up the TPUFO Wireless HDMI Display Dongle Adapter, demonstrating its plug-and-play functionality with various HDMI devices.

4. Operating Instructions

4.1. Connecting Android Devices

1. Drop-down your phone's notification menu bar.
2. Turn on wireless screen casting (often labeled as 'Smart View', 'Screen Mirroring', 'Cast', etc.).
3. Select the hotspot name displayed on your TV screen (e.g., 'Renkchip-93FC').
4. Wait for the connection to establish.

4.2. Connecting iOS Devices (iPhone/iPad)

1. Open the Control Center by swiping down from the top-right corner (or up from the bottom for older models).
2. Tap on 'Screen Mirroring'.
3. Select the device name displayed on your TV screen (e.g., 'Renkchip-93FC').
4. For initial connection, you may need to enter a verification code displayed on the TV.

Once connected, your device's screen will be mirrored to the larger display. You can switch between Mirror Mode (duplicates your device screen) and Extend Mode (allows for separate activities on your device and the display) depending on your device's capabilities and the content you are viewing.

Image: Explanation of Mirror Mode and Extend Mode, demonstrating how the adapter can duplicate or extend your device's screen.

Image: The adapter is compatible with TVs, monitors, and projectors, supporting phones, tablets, and laptops across iOS, Android, Mac OS, and Windows operating systems.

Video: Demonstrates how to connect and mirror a smartphone screen to a large TV, highlighting the ease of setup and the ability to control content directly from the phone.

5. Maintenance

To ensure the longevity and optimal performance of your TPUFO Wireless HDMI Display Dongle Adapter, please follow these maintenance guidelines:

- Keep the device clean and free from dust. Use a soft, dry cloth for cleaning.
- Avoid exposing the device to extreme temperatures, direct sunlight, or high humidity.
- Do not attempt to disassemble or repair the device yourself, as this will void the warranty.
- Store the adapter in a cool, dry place when not in use.

6. Troubleshooting

6.1. No Signal on TV

- Ensure the HDMI cable is securely connected to both the adapter and the TV.
- Verify that the adapter is receiving power from the AC adapter or a powered USB port.
- Check that your TV's input source is correctly set to the HDMI port where the adapter is connected.
- Try connecting the adapter to a different HDMI port on your TV.

6.2. Certain Apps Not Supported

Please note that the TPUFO Wireless HDMI Display Dongle Adapter is not compatible with certain paid apps that employ "HDCP" video copyright protection. This includes services such as Netflix, Amazon Prime Video, Hulu, Comcast TV, Xfinity, Vudu, Sky Go, and BT Sport. This is a limitation due to content protection protocols, not a defect of the adapter.

Image: A list of supported and unsupported streaming services and apps due to HDCP copyright protection.

6.3. Lagging or Unstable Connection

- Ensure your device is within the recommended transmission distance of up to 16 feet (5 meters) from the adapter.

- Minimize obstructions between your device and the adapter.
- For a more stable connection, it is recommended to connect to a 5 GHz Wi-Fi network if available.
- Restart both your source device and the wireless adapter.

7. Specifications

Feature	Detail
Brand	TPUFO
